THE VALUE OF SOUND DESIGN

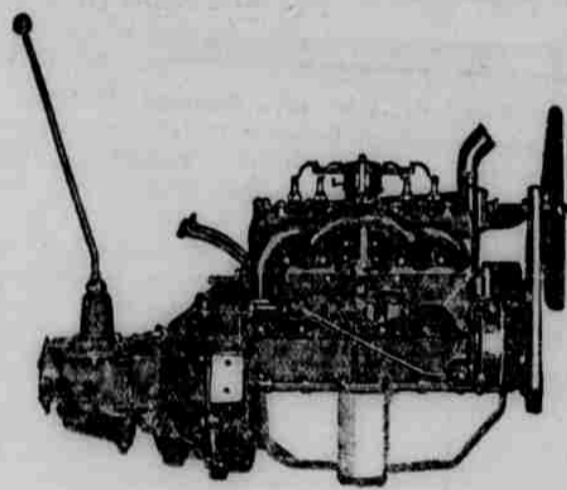

New Ford engine gives outstanding acceleration, speed and power without sacrificing reliability or economy

THE good performance of the Ford car, so apparent on every highway, is due largely to the sound mechanical design of the engine.

It has outstanding acceleration, speed and power, yet that is only part of its value to you. Greater still is the fact that it brings you all these features without sacrificing either reliability or economy.

That is the reason the Ford car has given such satisfactory service to millions of motorists all over the world and has been chosen by so many large companies that keep accurate cost figures. In every detail of construction it has been carefully planned and made for the work it has to do.

The design of the compression chamber is an important factor in the efficiency of the Ford engine. It is built to allow free passage of gases through the valves and to thoroughly mix the fuel

by producing turbulence within the cylinders during compression. The spark thus flashes quickly through the whole fuel charge, resulting in quieter and more effective engine performance. Other factors are the direct gravity gasoline feed, the specially designed carburetor, the new hot-spot manifold, aluminum pistons, chrome silicon alloy valves of larger diameter, statically and dynamically balanced crankshaft and flywheel, the simplicity of the electrical, cooling, lubrication, and fuel systems and accuracy in manufacturing.

Annual Meetings—
Both of Maupin's warehouse companies will hold their annual meetings on Saturday, July 12. These meetings are for the purpose of going over the year's business and to transact other business that may come up for discussion.

Has Erysipelas—
Mac Holloman went to the forest to cut fence posts Monday morning. He attempted to fell a tree but was taken with a spasm of erysipelas which caused him to return to camp, which is on Salmon river near Swin. Mac came to town yesterday and obtained a remedy for the ailment.

Sheep to Wind River—
Tom Ashley has started his flock of sheep, numbering 1900 head, to Washington, where he will graze them this season on the Wind River pastures. Since embarking on the sheep business the Ashleys have built up a fine flock.

Maupin's Milkman—
H. E. Wray's dairy business is growing daily. Since inaugurating the milk line Mr. Wray has succeeded in working up a large clientele, he delivering around 100 quarts of milk to the stores and to private customers each day. In addition to this he also makes delivery of a considerable amount of cream and milk in bulk. The Wray dairy herd is made up of blooded and accepted milk stock and his dairy is a model of perfection, being modern and kept in the most clean manner.

Outing at Clear Lake—
John Confer and wife packed up their camp outfit and on Tuesday filled their tin Lizzie with gas and oil and pointed its head toward Clear lake. There they will enjoy the mountain breezes and incidentally pull a few trout from the waters of the lake.

Warned to Get Plates—
The secretary of state on Monday telegraphed all state traffic officers and peace officials advising them that motorists who have not procured their 1930-1931 license plates are operating in violation of the law and are subject to arrest.
