## We have joined with Firestone to not only meet but BEAT Mail Order and other Special Brand tires on Price-Quality-Service

Come in and see the facts for yourself

YOU no longer need to send for tires by mail, nor do you have to buy tires made by some unknown manufacturer. Firestone prices are now the lowest in tire history, but more important than that, Firestone quality has never been higher.

We've taken the mystery out of tire buying

Visit our store and we will show you the "inside facts" about tires. We have actually cut up new tires and have the cross sections for you to examine—you will easily see why Firestone quality is so outstanding.

Don't worry about punctures and blowouts

Punctures and blowouts are bothersome and most people fear them—but NOW, because of the patented Double Cord Breaker, Firestone has practically eliminated them. Come in and let us show you this feature that puts two extra plies of cord right under the tread where most road wear comes and where punctures and blowouts start.

### Compare Prices and Specifications

Because Firestone Tires hold all world records on road and track for speed, safety and endurance, many people think they are high priced—but just check these low prices—then compare quality—you will be dollars and miles ahead.

Size 4.50-21	Our Tire	Mail Order Tire

### PAGE, LINE AND PARAGRAPH

More than 31,000,000 visitors enjoyed the recreational opportunities of the national forests in 25 states, Alaska, and Porto Rico in 1929. Three-fourths of these visitors were transient tourists, and seven out of every eight traveled in automobiles.

The possibilities in fur farming as a business enterprise are illustrated, according to the Biological Survey, U. S. Department of Agriculture, by the fact that all the silverfox pelts sold on the raw-fur markets to-day, more than 98 per cent are from ranch-bred foxes.

If your sheep, calves, or pigs have a husky cough at this time of the year, look out for lung-worms. Isolate infested animals and give them special care and feed. Put the animals on high, dry pasture, or put them up and feed dry feed. Give plenty of pure water and provide them with some kind of shade.

An intertilled crop following clover or alfalfa is a good thing in crop rotation, but it is a mistake to grow two or more intertilled crops and several small-grain crops in succession on the same land.

G. & C. MERRIAM CO.  
 Springfield, Mass., U. S. A.

Two small-grain crops of the same kind or two intertilled crops are the maximum number of nonleguminous crops that should be grown in succession.

Sowing winter wheat on the latest safe date in the fall helps to prevent injury from the scab disease, which reduces the yields and lowers the quality of much wheat in the Central States and eastward. The seed should be thoroughly clean, graded and treated. The scab fungus also attacks corn, and in regions where scab flourishes wheat should not be sown after corn unless the stalks are removed and the stubble plowed completely under.

In the summer, high-producing dairy cows need grain to supplement the pasture. Cows giving more than 20 pounds of milk a day should have, in addition to good pasture, 1 pound of grain to each 4 to 6 pounds of milk produced. The grain mixture, which may be corn, oats, wheat bran, or barley, should be ground. For cows producing more than 35 pounds of milk, there should be at least one high-protein concentrate, linseed oil meal or cottonseed meal, in the grain ration.

### "INSIDE" INFORMATION

Carrots are a good source of vitamins, if quickly cooked or grated raw in a vegetable salad.

Solid spruce-pulp fillers and especially treated strawboard fillers are used considerably in packing eggs for cold storage. These fillers help to prevent the characteristic flavor of cold storage eggs.

Sweet potatoes, when properly cured, can be ground into a meal or flour which will last indefinitely and will not lose its flavor when used

in making pies and custards. Sweet potato flour, used with wheat flour, makes bread of good texture, color, and flavor.

French toast is an appetizing way of using stale bread, and provides a main dish for breakfast, lunch or supper. Allow one-half to three-fourth cup of milk to 2 eggs. Beat the mixture, salt lightly, and dip slices of bread into it until well soaked. Fry in butter or well-seasoned fat in a heavy smooth skillet. Use moderate heat and let the toast become golden brown on one side before turning.

At the markets this fall you may find potatoes in handy size cotton bags of unique design. The Bureau of Home Economics of the U. S. Department of Agriculture, and the

North Carolina Agricultural College developed this new "consumer package." One side of the bag is an open-mesh fabric through which the buyer may inspect the size and quality of the Potatoes. The other half of the bag is a close weave to display the producers brand. The bag increases the incentive for growing good potatoes and marketing them as a graded product under a trade brand. The sacks also expand the market for the cotton crop.

### Attention, Wheat Haulers

We have a heavy duty trailer for sale. Has a good rack and is one and one-half ton capacity. Trailer made from rear end of two-ton truck. See it at the B. B. Wrecking plant, The Dalles, and ask for price and terms.
