

Spring Humors

Come to most people and cause many troubles,—pimples, boils and other eruptions, besides loss of appetite, that tired feeling, fits of biliousness, indigestion and headache.

The sooner one gets rid of them the better, and the way to get rid of them and to build up the system that has suffered from them is to take

Hood's Sarsaparilla and Pills

Forming in combination the Spring Medicine *par excellence*, of unequalled strength in purifying the blood as shown by unequalled, radical and permanent cures of

Scrofula **Salt Rheum**
Scald Head **Boils, Pimples**
All Kinds of Humor **Psoriasis**
Blood Poisoning **Rheumatism**
Catarrh **Dyspepsia, Etc**

Accept no substitute, but be sure to get Hood's, and get it today.

The certain way to be cheated is to fancy one's self more cunning than others.—Charron.

TO CURE A COLD IN ONE DAY

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

Nansen does not believe in modern sport. His motto is "Plenty of bodily exercise, but no sport."

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO., Toledo, O. Sold by druggists, 75c. Hall's Family Pills are the best.

By taking revenge, a man is but even with his enemy; but passing it over, he is superior.—Bacon.

INHERITED SCROFULA

When a child I had a very severe attack of Diphtheria, which came near proving fatal. Upon recovery the glands of the neck were very much enlarged, and after the free use of iodine, the right one was reduced to its normal size, but the left one continued to grow—very slowly at first, until it was about the size of a goose egg, which began to press on the windpipe, causing difficult breathing, and became very painful. An incision was made and a large quantity of pus discharged. The gland was removed, or as much as could with safety be taken out. For ten years I wore a little piece of cloth about an inch long in my neck to keep the place open. During this time I had to have it cut open by the doctor every time I took cold or the opening clogged. In the Spring or early Summer of 1884 I was persuaded by my wife to use S. S. S., which I did, strictly in accordance with directions. I took twenty-six large bottles, and was entirely cured, for I have not suffered since that time. B. S. RAGLAND.

Royal Bag Mfg. Co., Charleston, S. C.

Only a constitutional remedy can reach an hereditary disease like Scrofula. When the blood is restored to a normal condition and the scrofulous deposits are carried off there is a gradual return to health. S. S. S.

is well known as a blood purifier and tonic. It is the only guaranteed, strictly vegetable remedy sold. If you have any signs of Scrofula, write us and our physicians will advise you free.

NEW SPRING SUSPENSION FOR AUTOMOBILES.

Louis A. Hill, of Washington, D. C., is the inventor of a spring suspension system for automobile frames where-by there is supposed to be a greater ability of the springs to absorb the vibration and varying thrust from both the motor and the road. The construction consists of four semi-elliptical springs placed upon the axles in the usual manner, with their outer ends hinged to the ordinary frame extensions. The inner ends of the semi-elliptical springs, however, are shackled to the ends of side springs, fastened at their centers to the side members of the running gear frame.

It is claimed that in effect the rear halves of the rear springs and the front halves of the front springs are comparatively rigid, while the spring portions between the axles are extremely flexible. The inventor claims that the system adapts itself to cars of all weights and wheel bases, and that as the wheel base increases the compensating spring between the end springs is naturally increased in the correct proportion.

FISHER MAID OF MARKEN, HOLLAND.

Marken is in reality only a wide sand bank in the Zuyder Zee, that historic gulf in the German Ocean which makes the coast of Holland such a picturesque locality. This sandy island is inundated during most of the winter, but its hardy inhabitants, all of them engaged in fishing, do not mind this particularly, living almost entirely in boats. The dwellings are set on piles and are only one story in height. These little

houses are painted in the brightest colors, red, green, yellow and blue. The costumes of both sexes are highly picturesque, gay colors predominating. The women are quite as hardy as the men and engage in the same occupations. The fisher maidens of Marken have often furnished models for the painters who find so much inspiration in the Netherlands.

San Francisco's Climate.

In San Francisco they are telling a story that is worth repetition, and will be appreciated by those who have encountered the climate of the Golden Gate City, says the Philadelphia Press Sunday Magazine. An Irishman came to America to visit. He was a true son of Erin, with an Irish appreciation of all things beautiful.

He went to San Francisco for a sight-seeing trip, and while strolling through the city with a friend, exclaimed: "What foine trees! So green! What makes it?"

"Climate," answered the friend, briefly.

A little later he cried out: "Arrah! the complexions of your ladies. So beautiful! What—"

"Climate," interrupted the friend. The Irishman subsided for awhile.

Now, San Francisco isn't exactly a prairie, and not many moments passed until the two encountered one of the small mountains they call knolls out there.

"Begorra," said the visitor, "and how d'ye think O'm going to get up that?"

"Climb it," said the friend.

The Irishman stopped and looked at his companion. "The devil ye say? Seems to me lverything is climate out here."

We hear a great deal about women being fond of their church; yet in nine cases out of ten, when a woman gets married, she will give up her church if her man demands it.

THE MORMONS' BIG ORGAN.

Ten Years in Building, and Five Complete Instruments in One.

It was in 1863 that President Young first spoke of building a big organ, one that would be in harmony with the mammoth tabernacle. Great difficulties were encountered in the building of the instrument, particularly in securing suitable wood for the gigantic pipes with which it was equipped. Some of these pipes took as much as 800 feet of lumber.

The mountains far and near were fairly scoured for the proper kind of pine, hundreds of loads of which were hauled by teams from a point nearly 300 miles south of Salt Lake. It required two months to make a round trip.

The workmen were all pioneer settlers. The method of uniting the wood was unique, the closest joining being done by means of home-made glue, the making of which consumed hundreds of cattle hides, while numberless calfskins were used in making the bellows.

Altogether ten years were consumed in the building. Since the time that it was first given to the public there have been numerous changes and additions, until to-day it is recognized as one of the very best organs in the world, if not, indeed, the best and the grandest.

A year ago a great many of the old pipes were taken out and thoroughly overhauled, and more than 4,000 new ones were added. The instrument's action is marvelous and more responsive than a grand piano, as it has no "inertia" to overcome. The repeating power of each key is 726 times to the minute. All of the latest mechanical devices have been incorporated in the instrument and any combination of tone desired can be distinctly brought out. Especially fine are the "string" tones, the violin, viola, gamba, 'cello and bass; the clarinet, two oboes, bassoon, eight varieties of the flute tones (each one true to its name), four piccolo stops, four trumpets, tube trombone, saxophone, clarion and the vox humana, which is the pet of the organ and makes "human" tones that deceive even the trained musician.

In all, the organ contains 408 stops and accessories—five complete organs, viz.: solo, swell, great, choir and pedal. The speaking length of the pipes varies from a quarter of an inch to thirty-two feet. In "full organ" passages the immense bellows displace 5,000 cubic feet of air per minute.—Deseret News.

Mere Truth.

During the Boxer rebellion, five years ago, when soldiers were hurried into China by all nations, the American troops received the most stringent orders against looting. Word came to General Chaffee one day that some of the soldiers were under suspicion, and he instantly ordered them all out and, company by company, required officers and men to swear individually to their innocence or guilt. The demonstration was chiefly meant as a warning and preventive.

An hour or two before this roll call a young officer, walking in the Forbidden City, had, in putting his hand upon a garden paling, found the small brass knob surmounting the picket loose. It was of no intrinsic value, and he had put it in his pocket as a souvenir of the China campaign.

As General Chaffee and his staff rode down the line, the young officer suddenly recalled the brass ball in his pocket. It burned him like fire; it rose to his throat; it seemed to fill his vision. As the inspectors approached him, some slight irregularity in his line made the young officer spring forward, call his men to dress ranks and make their affidavits quickly. In the moment's excitement his own name was passed by—perhaps the single omission in the entire army.

"Say, uncle, would you have told?" demanded a small boy, overhearing the incident recounted the other day.

"Oh, sure!" was the prompt reply.

In every sensational court trial you will hear that "most of the spectators are women."

Ayer's

Give nature three helps, and nearly every case of consumption will recover. Fresh air, most important of all.

Cherry Pectoral

Nourishing food comes next. Then, a medicine to control the cough and heal the lungs. Ask any good doctor.

"I first used Ayer's Cherry Pectoral 43 years ago. I have seen terrible cases of lung disease cured by it. I am never without it."
ALBERT G. HAMILTON, Marietta, Ohio.

25c., 50c., \$1.00. All druggists. J. C. AYER CO., Lowell, Mass.

Health demands daily action of the bowels. Aid nature with Ayer's Pills.

The early morning bath gold in its mouth.—Franklin.

Millions of Vegetables.

When the Editor read 10,000 plants for 16c, he could hardly believe it, but upon second reading finds that the John A. Salzer Seed Co., La Crosse, Wis., than whom there are no more reliable and extensive seed growers in the world, makes

this offer which is made to get you to test Salzer's Warranted Vegetable Seeds. They will send you their big plant and seed catalog, together with enough seed to grow

- 1,000 fine, solid Cabbages,
- 2,000 rich, juicy Turnips,
- 2,000 blanching, nutty Celery,
- 2,000 rich, buttery Lettuce,
- 1,000 splendid Onions,
- 1,000 rare, luscious Radishes,
- 1,000 gloriously brilliant Flowers,

ALL FOR BUT 16c POSTAGE, providing you will return this notice, and if you will send them 20c in postage, they will add to the above a package of famous Berliner Cauliflower. [P. C. L.]

King Edward has given to the monks of the Great St. Bernard monastery a piano to replace the one given by his mother half a century ago.

If you want to get the biggest returns for your labor and your ground, you can't afford to plant anything but

FERRY'S SEEDS

—the standard after 45 years' test. They always produce the largest and surest crops. All dealers sell them. Our 1905 Seed Annual free on request.
