

Hood's Sarsaparilla

Has surpassed all other medicines, in merit, sales and cures. Its success, great as it has been, has apparently only just begun. It received more testimonials in the last two years than any previous two—over 40,000. It has the abiding confidence of the people—the strongest proof of its unequalled worth. It purifies the blood, cures all blood diseases, all humors and all eruptions. It strengthens the stomach, creates an appetite and builds up the whole system. It cures that tired feeling and makes the weak strong. In nasal liquid, or in new tablet form, 100 Doses One Dollar.

If Marriage Had Been a Failure. If marriage had been a failure this civilization would not be here. So many men are brave after the event. Many compensations have come in life that are not included in our pay. One of the very best remedies for unpleasant conversation is to stop talking. Sometimes we send a thief to catch a thief that robbed a thief.

The golden calf will always be worshipped, though it wear the tail of a monkey or the ears of an ass.—American Illustrated Magazine.

To Break in New Shoes. Always shake in Allen's Foot-Ease, a powder. It cures hot, swelling, itching, swollen feet. Cures corns, ingrowing nails and bunions. All ailments of the feet. Don't accept any substitute. Simply mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.

Pardoned. "Who is the distinguished-looking man?" asked the stranger. "That man save me a good deal of trouble once," replied the man on the corner. "He interrupted me in the middle of a sentence and—"

"Ah, I see. You were going to say something improper and—"

"Now! I was in de penitentiary an' he wuz Governor of de State at de time."—Philadelphia Ledger.

Present-Day Philosophy. These fellows who are eating brain food in the hope of finding brains are too late. It is better to be a man with a hoe than a rake. Never undervalue yourself—the world will do that for you. It is within the scope of any man's fancy to be as big an ass as he pleases. No permanent good comes out of any public movement that is inspired by malice.—American Illustrated Magazine.

The Man on the Steps. They were going to the matinee. She was up in her boudoir putting on finishing touches, and he was sitting impatiently on the front steps. "George," she called down sweetly, "just one minute more until I find my gloves."

"Five minutes passed. "George," came from above, "wait another second. I've lost my pin."

Twenty minutes slipped by. "George," she continued, "don't go. One moment. A button just jumped off my shoe."

Long silence. Then George calls wearily: "Hurry a little, Ethel. If you get down in another five minutes we can make the evening performance. Matinee's over long ago."

The Real Definition. "The legitimate drama!" said the playwright, scornfully, as Manager Flasco handed him back his rejected manuscript. "I hear nothing but the legitimate drama!" What is the legitimate drama, anyway?

"The legitimate drama," said Manager Flasco, coldly, "comprises all those plays which their authors being dead, may be produced without the payment of royalties."

Feminine Attraction. Dolly—Yes, the prettiest girl in our Sunday school sold kisses at 99 cents each to help along the church fair. Somehow the young men were shy about taking them at that price.

Dick—No wonder. You must have been trying to attract the girls. Young men are not looking for 99-cent bargains.—Chicago News.

Rubbing It In. Old Skinned—Hub! So you want to marry my daughter, eh?

Young Man—Well, I guess that's the size of it.

Old Skinned—Um—yes. Can you support her in the style to which she has been accustomed?

Young Man—I can—but I'm not mean enough to do it.

No Need of It. "Can't I sell you a painless corn cure, madam," said the pedlar.

"No, you can't!" snapped the woman of the house. "I have no painless corns." Then the door was shut with a sudden slam.—Chicago Tribune.

The Difference.

A. H. Kirkland of Boston is conducting a fight against the moth. He has imported from Zurich a great quantity of moth parasites, and with the help of the little creatures he and the people of Massachusetts hope to obliterate the moth completely.

"Our work may succeed," said Mr. Kirkland recently, "or we may err somewhere, and it may fail. It must succeed if we make no mistakes—but then, you know, mistakes are common."

"Mistakes are common everywhere. I heard a lawyer and a doctor taunting one another this afternoon about them."

"You make a good many mistakes, I suppose," the lawyer said.

"You too, no doubt," said the doctor.

"But doctors' mistakes are often buried deep under ground," said the lawyer.

"Yes," said the doctor, "and lawyers' mistakes often swing six feet in the air!"

Fallacy About Jewelers. Jewelers, when watches are with them for repairs, are frequently insulted with the remark:

"I trust there is no danger of crystals being substituted for the jewels in the works of my watch."

For a great many persons think there are dishonest jewelers who make a practice, with "full-jeweled" watches, of substituting crystals for the jewels at an enormous profit.

As a matter of fact, there is no truth in this suspicion. A jeweler, no matter how dishonest, could not steal the jewels in a watch, for they are valueless; they only cost 10 cents apiece.

In antique watches the jewels were often costly. In modern watches they are never worth more than \$15 a gross.

He Was Looking Ahead. In a cozy chair Mr. Trouble Hunter sat in front of a big warm stove, and looked sad as the smoke curled from his clear Havana cigar.

His lovely wife placed her arm on the top of the chair back and with the other hand stroked his troubled brow.

"Has something gone wrong in business, dear?" she asked.

He remained silent.

"You've been disappointed over something?"

He remained silent and on his face care brooded.

"What on earth is worrying you, dear?" she asked with tears in her voice.

"I was just thinking," he said sadly, "of the approach of spring, when I'll have to take the stovepipe down."—Indianapolis Star.

Bricks from Sand. A correspondent of Cardiff, Wales, reports that great sand dunes extend for miles along the north coast of the British Channel. These, in addition to being utterly worthless for all purposes, are also a menace to the narrow strip of lowlands between them and the hills. A company of business men have determined to put the sand to some use, and if their works prove profitable an industry will be built up on the dunes. The plan is to manufacture bricks from sand. The experiment has proved a success on the continent where the bricks are produced in several colors and take a glaze satisfactorily. Some experts claim that these bricks made of sand and lime will be the building brick of the future in Wales and the United Kingdom.

Makes a Difference. Dwellers in apartment houses sometimes seem to forget that conversations in the entrance halls may be overheard by other tenants. This was the greeting which a belated husband received at the door of his apartment recently:

"Don't talk to me! I know very well what you would say! But I know—you have been off playing poker and lost all your money!"

"No, I didn't, my dear; I won twenty dollars," was the conciliating answer.

The other voice suddenly modulated. "Well, perhaps after all we women are a little too severe—a man should have a little recreation now and then."

Reform Needed. "Senator," asked the reporter, "is there likely to be any reform legislation in the near future?"

"Probably not," answered the eminent statesman, "but the conviction is growing that there ought to be a change in the form of administering the oath in courts of justice."

"In what respect?"

"Well, it is felt that a witness should be sworn merely to tell the truth and nothing but the truth. Telling the whole truth is not only unnecessary in most cases, but is sometimes highly injudicious."

IN THE NATIONAL HALLS OF CONGRESS

Monday, May 14. Washington, May 14.—The session of the senate today passed without an exciting incident and without the adoption of a single amendment to the railroad rate bill, notwithstanding that measure was under consideration practically all the time from the hour of convening, 11 o'clock, until adjournment at 5:15 p. m. The most characteristic feature of the day was the rejection of amendments. This was accomplished either by direct vote or by the process of laying on the table and one followed another in rapid succession.

Among the provisions thus adversely disposed of were several intended to fix the liability of railroad companies for injury to employees. The presentation of provisions intended to accomplish this purpose had the effect of bringing out a practically authoritative statement that the committee on interstate commerce will report the independent house bill on that subject which is now pending before it.

When the senate adjourned, the eighth section, regulating the personnel of the Interstate Commerce commission, was under consideration and adjournment was secured at a somewhat earlier hour than usual in the hope that there could be prepared a more acceptable provision covering that subject than has heretofore been presented.

Wednesday, May 9. Washington, May 9.—The senate spent the greater part of the day again in the consideration of the question of divorcing the production of coal and other commodities from their transportation, and closed that branch of its work by adopting a modified provision formally offered by Elkins, but originally suggested by McLaurin. There was again much sparring over parliamentary points, but there was at no time any adjournment on Tuesday, and when the coal question was finally closed, the progress was so rapid that the first section was entirely disposed of before the senate adjourned. Other amendments were also adopted, but a long and arduous session followed by LaFollette was voted down by practically a party vote, all but two republicans voting against the amendment.

Thursday, May 10. Washington, May 10.—Shells and projectiles for the Navy department will, after June 30, 1906, be purchased by the bureau of Ordnance in the open market, instead of, as now the practice, in secret markets from firms engaged in the manufacture of these articles. This change in existing conditions was brought about through the efforts of the chairman of the appropriations committee, Tawney, of Minnesota, who offered an amendment to the naval appropriation bills which the house had under consideration today.

Friday, May 11. Washington, May 11.—After passing 320 pension bills, the house today devoted much time to considering a point of order made by Tawney against an appropriation for a new steel floating drydock, provided in the naval appropriation bill. The chair held the point of order well taken, in a carefully prepared opinion.

Saturday, May 12. Washington, May 12.—The senate proceedings today were devoted exclusively to the consideration of the railroad rate bill, and they included many interesting and some sensational features. The actual accomplishments of the day consisted in the completion of the consideration of the Allison amendments, covering the question of review by courts of the orders of the Interstate Commerce Commission.

There were several of these provisions and all were accepted as presented or suggested by the Iowa senator, showing an almost perfect agreement among Republican senators. Indeed, one of the noteworthy features of the day was the practical unanimity of the Republicans. They not only voted almost solidly for the Allison amendments, but were just as nearly united against opposing propositions. When an adjournment was reached, there was still prospect of the continuance of the debate for next week.

Sunday, May 13. Washington, May 13.—The House of Representatives devoted the day to the naval appropriation bill, and accomplished the reading for amendment of the first 15 pages. During this time several topics incident to the measure were discussed, including the difficulty of obtaining enlisted men in the navy, the location of the naval training station on the Great Lakes, the cost of smokeless powder, and finally the expenditure of \$200,000 a year for chains for ships. This last matter was under consideration when the House adjourned.

Monday, May 14. Washington, May 14.—The house today devoted much time to considering a point of order made by Tawney against an appropriation for a new steel floating drydock, provided in the naval appropriation bill. The chair held the point of order well taken, in a carefully prepared opinion.

Tuesday, May 9. Washington, May 9.—Nearly the entire time of the house was today taken up by two propositions—first, whether by the navy department should go into the open market and purchase anchors, chains and cordage, or continue to manufacture these articles in the government yards, as is now done; and second, whether the cost of transporting coal from Atlantic and Gulf ports to the Philippines in American bottoms should be limited to \$5 or \$6 per ton.

On the first proposition a substitute was adopted, giving the secretary of the navy the right to purchase these articles in open market if a saving could be made.

The second proposition did not carry.

Wednesday, May 10. Washington, May 10.—The House of Representatives devoted the day to the naval appropriation bill, and accomplished the reading for amendment of the first 15 pages. During this time several topics incident to the measure were discussed, including the difficulty of obtaining enlisted men in the navy, the location of the naval training station on the Great Lakes, the cost of smokeless powder, and finally the expenditure of \$200,000 a year for chains for ships. This last matter was under consideration when the House adjourned.

Thursday, May 11. Washington, May 11.—Bailey's non suspension amendment, applying to orders of the Interstate Commerce commission as covered by the railroad rate bill, which has occupied so much of the attention of the senate in connection with that bill, was today adversely disposed of by the decisive vote of 23 to 54, practically a party vote.

An amendment by Rayner confining the court review to constitutional questions was also voted down. A number of other amendments were rejected.

Friday, May 12. Washington, May 12.—An amendment limiting to two years the life of the commission's orders was adopted.

Saturday, May 13. Washington, May 13.—In connection with the consideration of the railroad rate bill, the house today passed a resolution providing for the appointment of a committee to investigate the operations of the Interstate Commerce Commission.

Sunday, May 14. Washington, May 14.—The house today devoted much time to considering a point of order made by Tawney against an appropriation for a new steel floating drydock, provided in the naval appropriation bill. The chair held the point of order well taken, in a carefully prepared opinion.

Monday, May 15. Washington, May 15.—The session of the senate today passed without an exciting incident and without the adoption of a single amendment to the railroad rate bill, notwithstanding that measure was under consideration practically all the time from the hour of convening, 11 o'clock, until adjournment at 5:15 p. m. The most characteristic feature of the day was the rejection of amendments. This was accomplished either by direct vote or by the process of laying on the table and one followed another in rapid succession.

Among the provisions thus adversely disposed of were several intended to fix the liability of railroad companies for injury to employees. The presentation of provisions intended to accomplish this purpose had the effect of bringing out a practically authoritative statement that the committee on interstate commerce will report the independent house bill on that subject which is now pending before it.

When the senate adjourned, the eighth section, regulating the personnel of the Interstate Commerce commission, was under consideration and adjournment was secured at a somewhat earlier hour than usual in the hope that there could be prepared a more acceptable provision covering that subject than has heretofore been presented.

Tuesday, May 9. Washington, May 9.—The senate spent the greater part of the day again in the consideration of the question of divorcing the production of coal and other commodities from their transportation, and closed that branch of its work by adopting a modified provision formally offered by Elkins, but originally suggested by McLaurin. There was again much sparring over parliamentary points, but there was at no time any adjournment on Tuesday, and when the coal question was finally closed, the progress was so rapid that the first section was entirely disposed of before the senate adjourned. The most characteristic feature of the day was the rejection of amendments. This was accomplished either by direct vote or by the process of laying on the table and one followed another in rapid succession.

THE WINNING STROKE

If more than ordinary skill in playing brings the honors of the game to the winning player, so exceptional merit in a remedy ensures the commendation of the well informed, and as a reasonable amount of outdoor life and recreation is conducive to the health and strength, so does a perfect laxative tend to one's improvement in cases of constipation, biliousness, headaches, etc. It is all-important, however, in selecting a laxative, to choose one of known quality and excellence, like the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., a laxative which sweetens and cleanses the system effectually, when a laxative is needed, without any unpleasant after effects, as it acts naturally and gently on the internal organs, simply assisting nature when nature needs assistance, without griping, irritating, or debilitating the internal organs in any way, as it contains nothing of an objectionable or injurious nature. As the plants which are combined with the figs in the manufacture of Syrup of Figs are known to physicians to act most beneficially upon the system, the remedy has met with their general approval as a family laxative, a fact well worth considering in making purchases.

It is because of the fact that SYRUP OF FIGS is a remedy of known quality and excellence, and approved by physicians that has led to its use by so many millions of well informed people, who would not use any remedy of uncertain quality or inferior reputation. Every family should have a bottle of the genuine on hand at all times, to use when a laxative remedy is required. Please to remember that the genuine Syrup of Figs is for sale in bottles of one size only, by all reputable druggists and that full name of the company—California Fig Syrup Co., is plainly printed on the front of every package. Regular price, 50c per bottle.

CALIFORNIA FIG SYRUP CO.
Louisville, Ky. San Francisco, Cal. New York, N.Y.

Not that Kind of a Place. "All my threats don't bother him at all," said the collector. "No?" replied the merchant, "said we could go as far as we liked, eh?" "Well—er—I think the place he mentioned was farther than you'd like."—Philadelphia Press.

FITS permanently cured by Dr. Kline's Great Nerve Restorer. Send for FREE 24 trial bottle, and receive Dr. R. H. Kline, Ltd., 361 Arch St., Phila., Pa.

Obviously. Trusty Henchman—Senator, I think I ought to tell you that your political stock is running low out in our section. Senator Lotsman—If there is anything the matter with my political stock you haven't been attending to your duty in looking after my fences—that's all.

Mothers will find Mr. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

The Hard-Working Reformer. "Sometimes," said Uncle Eben, "it 'pears to me like a reformer was one o' deshere people dat has to talk two hours an' a half to 'spress one o' de ten commandments. An' dar warn't no dispute 'bout dat in de firs' place."—Washington Star.

How's This? We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Prop., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him. WERT & THOMAS, Wholesale Druggists, Toledo, O. WALKER, KIRKMAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces in all cases. Price 75c per bottle. Sold by all Druggists. Testimonials free. Hall's Family Pills are the best.

What Father Thought. A New York teacher of instrumental music was one day telling the father of a pupil, a lad of 10 years, of the progress made by the boy in his studies. "I think he is improving a great deal," said the professor. "He will certainly learn to play the piano."

"Is that so?" asked the father, much gratified. "I didn't know whether he was really improving or whether I was merely getting used to it."—Harper's Weekly.

WASTED TO A SHADOW. But Found a Cure After Fifteen Years of Suffering

A. H. Stotts, messenger at the State Capitol, Columbus, O., says:

"For fifteen years I had kidney troubles, and though I doctored faithfully, could not find a cure. I had heavy backaches, dizzy headaches and terrible urinary disorders. One day I collapsed, fell insensible on the sidewalk, and then wasted away in bed for ten weeks. After being given up, I began using Doan's Kidney Pills. In a couple of months I regained my old health, and now weigh 188 pounds. Twelve boxes did it, and I have been 83 days for a cover at night if we get to bed, and I will say that I have gotten more comfort out of your medicine than any other one article that I ever owned."

(The name and address of the writer of this testimonial letter may be had on application.)

ELEVATES WATER by WATER POWER

THE COLUMBIA HYDRAULIC RAM

PUMPS AWAY UNCEASINGLY WITHOUT ANY ATTENTION

THE COLUMBIA HYDRAULIC RAM is a simply constructed and inexpensive machine that can utilize a small fall of water for the purpose of raising a portion of it to any desired height. It is the farmer's friend in the "dry season" and is indispensable to those owning land high above ditches. It will furnish water for domestic purposes, even elevating pure water of the spring by means of the impure or muddy water, as found in some streams. Requires no attention. Practically no cost of maintenance, there being no parts to get out of order. A ram will pay for itself in a short time. Every ram installed is giving utmost satisfaction. We keep a large stock constantly on hand. Write to our Hydraulic Department today for illustrated literature.
