

My Hair is Extra Long

Feed your hair; nourish it; give it something to live on. Then it will stop falling, and will grow long and heavy. Ayer's Hair Vigor is the only hair-food you can buy. For 60 years it has been doing just what we claim it will do. It will not disappoint you.

"My hair used to be very short. But after using Ayer's Hair Vigor a short time it began to grow, and now it is fourteen inches long. This seems a splendid result to me after being almost bald for years."—Mrs. J. H. PIERCE, Colorado Springs, Colo.

Made by J. C. Ayer & Co., Lowell, Mass. Also manufacturers of Sarsaparilla, Pills, Cherry Pectoral.

GREAT TUNNEL PLANNED.

Central Pacific to Pierce the Sierra Nevada Mountains.

"The boring of what will be the longest tunnel in the United States, and one of the longest in the world, has very recently been determined upon by the Central Pacific Railroad Company," says J. Mayne Baltimore in the Technical World Magazine.

"Chief Engineer William Hood has finished plans and reports for the proposed gigantic six-mile hole to be bored through the Sierra Nevada Mountains in California, a short distance west of the town of Truckee, Ariz.

The object of this great tunnel is to cut down the present mountain climb of 7,017 feet by fully 2,000 feet, and thus eliminate many of the present curves and much of the grade. Chief Engineer Hood's reports contain some modifications of his first series of surveys, made some years ago, and these will doubtless be approved by President Harriman; and work, it is expected, will very soon be commenced on this great tunnel.

"It is estimated that the tunnel will cost not less than \$10,000,000 and that among other things it will cheapen the annual expenses of operating trains over the mountain division by fully \$100,000. Being over 30,000 feet in length, the tunnel will be one of the longest in the world and certainly the longest in the United States. The longest now in existence on this continent is the 16,000-foot bore in the Cascade range in Washington, on the Great Northern Railroad."

Fortune's Wheel.
"See that old chap?" remarked the clubman, pointing out the window to an old peddler, who carried a basket of shoe laces. "Well, he came to this country from Russia ten years ago. He borrowed some money to purchase a basket and began to peddle shoe laces. How much do you think he's worth to-day? Just make a guess."

"Wrong," said the clubman. "He isn't worth a cent and he still owes for the basket."—Puck.

The Useful Earthworm.

Darwin estimates that there are 100,000 earthworms quietly at work for the advantage of the upper six feet of every acre. They continually turn over the soil and drag down leaves and grass, and thus they loosen the soil and fertilize the ground, so that necessary air can reach the roots that spread and grow.

Protection of American Birds.

The movement for the protection of birds in America has long since assumed formidable proportions, says American Homes and Gardens. Much of the credit for the work accomplished is due to the Audubon societies, which exist in thirty-five States, and which for a number of years have carried on an active work for the conserving of bird life. The results accomplished are considerable. A "model law" drawn up by the American Ornithologists' union is now in force in thirty States and the District of Columbia. The Lacey law excludes from interstate commerce all birds killed illegally in any State, and makes those who kill small game within short distances. Absolute protection has not yet been given the birds everywhere, but a great and important work has been well begun and is being carried forward.

Laws prohibiting the sale of game out of season, even when killed in season, look toward the same end of conserving bird life. Public attention has been aroused on the subject, and even the manufacturer of air rifles no longer calls attention to the fact that they will kill small game within short distances. Absolute protection has not yet been given the birds everywhere, but a great and important work has been well begun and is being carried forward.

Clear as Thick Ink.
On the South Side is a Chinaman who has not been in Chicago long enough to master the English language, save that he has grasped the meaning of a few words. The other day he went into the store of a tradesman, but was unable to make any one in the store understand what he wanted.

To the clerk he kept saying "tling, tling." After all had given up in despair and when John was about to make his departure, the proprietor happened to make his appearance. At once "tling" to him was string and he procured a section of rope the size of a clothesline.

John looked at it for a moment, took it in his yellow fingers and then said "young tling." Then the merchant went to a cabinet, pulled out a drawer and came back with a spool of thread. The Mongolian's face was at once wreathed with smiles. He handed over his nickel and went about his business with the air of a man who had accomplished a great undertaking.—Chicago News.

A Habit With Him.
There was a business man in a little Western town who never had a good word for anybody. Every one held him in more or less fear and many disliked him strongly. He made no effort to cultivate friendships, and at one time or another almost every inhabitant of the village had had a quarrel with him. One day the old lion tried to board a train which did not stop. He was thrown a great distance and fell in a heap on the track in the rear of the departing train. The group of villagers on the depot platform thought that their hereditary enemy had been killed before their eyes and were ready to drop all their bitter prejudices at the grave.

One ran up to where the fallen monarch lay, and, seeing signs of returning life, anxiously asked: "Are you badly hurt, captain?"

With the first short breath the fallen man was able to draw he gasped: "No, you d—d old fool! That's the way I always get off a train."—Kansas City Times.

Engaged in a Noble Work.
Employer—Jimmy, I let you off yesterday afternoon because you said you had some necessary work to do and one of my clerks says he saw you an hour or two later at the ball game.

Office Boy—Yes, sir; I was rootin' fur de home team.

NO EXPENSE SPARED

Hill Says North Bank Road Is Best Ever Built.

MAY BUILD DIRECT TO SPOKANE

A Road With Low Grades and Easy Curves is the Main Object Sought by Builder.

Portland, July 14.—James J. Hill, president of the Great Northern, and one of the most dominant figures in the railroad world, reached Portland last evening by the steamer Capital City from the Dalles. With him are Louis W. Hill, vice president of the Great Northern; Howard Elliott, president of the Northern Pacific; W. I. Darling, chief engineer of the Northern Pacific; A. H. Hogeland, chief engineer of the Great Northern; all of St. Paul; C. M. Levey, president of the Portland & Seattle railway, and B. E. Palmer, assistant general superintendent of the Northern Pacific, of Tacoma, and Cory T. Hutchinson, an electric engineer from New York. In the party are four stenographers and Mr. J. J. Hill's servant.

In speaking of the new road down the north bank, Mr. Hill said: "It is likely the Portland & Seattle will be extended to Spokane. We cannot say definitely, but there are surveys in the field, and if we can get a low grade, we will no doubt build. We could use the Northern Pacific line from Pasco, but it is expected that the line will extend from Portland to Spokane. The Portland & Seattle railway will be the best new road that was ever built in the United States. It will be a road of low grades and few curves, and it will be very expensive, but when it is built it will be the best construction ever undertaken in this country."

"Low grades are equivalent to deep water in the harbor. Portland can overcome the lack of deep water by easy grades. The Columbia river offers great opportunities in low grades, but construction is fearfully expensive. There are miles where the cost of building the road will run over \$100,000 to the mile. And this is exclusive of the cost of tunnels, of which there are several to the mile in many places."

Mr. Hill said that he does not need to look over his terminals in the city, as he knows already what they are. Work will be begun soon, he said, on the required buildings to care for the business handled by the new Hill road in this city.

CHAINS WELDED ON THEM.

Brutal Treatment of Sealers Captured by Russians.

Victoria, B. C., July 14.—Captain T. H. Thompson and Joe Knapp, American citizens; Edward McNeill, George McNeill, Canadian; Jose Villola, a Spaniard, who reached Kobe after being released from prison in Siberia after serving two years, were cruelly treated, according to letters received here. The prisoners were sent hunters employed on the Japanese sealer Kyoichi Maru, formerly the Diana, of San Francisco, and were captured by the cruiser Gromobol in August, 1904, and taken to Nicolaiefsk, and thence to Khabarovsk.

Captain Thompson, navigating officer of the sealer, whose home is in San Francisco, was suspected of being a spy because of some drawings found in a notebook. He was loaded with chains welded on his arms and legs by blacksmiths, and confined for six months in a small, unlit cell, built of wood and swarming with vermin. When brought out for trial he was unable to walk, and was practically dragged to the court along the snow. The trial had been concluded when the prisoners were brought in, and each had been sentenced to 16 months' imprisonment.

Fortune in Bogus Claim.

New York, July 14.—W. K. Atwell, United States district attorney at Dallas, Tex., visited the office of the county register here today to gather information which he expected to use in connection with the prosecution of Joseph L. Cowan, of Dallas. The alleged fraud was committed in soliciting and receiving payments from the heirs of James Hartfield, who died in this city many years ago, for the purpose of establishing a claim to a tract of land along the east side of Central Park, New York, now worth hundreds of millions.

Forest Fire Near Sandpoint.

Butte, Mont., July 14.—A Sandpoint special says: Owing to a bad forest fire burning for the second time this season, the Spokane International Railroad company has suffered losses near Colburn. Several hundred ties, poles and piling, which belonged to the company, went up in smoke, caught in the path of the fire, which is thought to be under control this morning. The fire drove out Contractor Purvis, the men and horses being hurried to Colburn for safety. The railway company lost two culverts.

Contract for Washings.

Washington, July 14.—Secretary Bonaparte today awarded the contracts for the two 16,000-ton battleships South Carolina and Michigan, one to the Cramps, of Philadelphia, and the other to the New York Shipbuilding company, of Camden, N. J. The Cramps' bid was \$3,540,000 and that of the New York Shipbuilding company \$3,585,000. The boats are to be of the reciprocating type, so far as engines are concerned.

New Outbreak in Santo Domingo.

Washington, July 14.—Broken telegraph wires between Monte Christi and Cape Haytien, the cable terminus in Santo Domingo, are reported to the Navy department today by Commander Sutherland, an almost invariable sign of revolutionary trouble there.

Thousands Without Homes.

Nizhni, Novgorod, July 17.—A fire which broke out here today raged for six hours before it was checked. When it was finally extinguished 275 houses had been destroyed and more than 3,000 families had been rendered homeless. The loss is placed at \$400,000.

CLEARING AWAY DEBRIS.

Hundreds of Carloads Dumped Daily From San Francisco.

San Francisco, July 17.—Certain visitors to San Francisco have given loud voice to their disappointment at seeing the city debris strewn three months after the disaster. "It is an impossible task that San Francisco has undertaken," they write home, and their lamentations come back by wire to this city.

It is true that almost three months have elapsed, and it is also true that acres and acres of debris lie in the heart of the city. Moreover, it is highly possible that much of the debris will remain for several months.

What these visitors have neglected to observe is that the debris is being carted away at the rate of 240 carloads a day. The dirt is carried in wagons to the bunkers on First street, and from there trains convey it to the Protero swamps, where it is doing reclamation work.

Throughout the old business section of the city dangerous walls still stand, but the board of works has taken steps to have them torn down. This board has also called upon property owners to clear away the sidewalks on which their buildings front. When this is done many of the streets still blocked by debris will be opened. Such important streets as Stockton and Pine are not passable their entire length. The city is not waiting idly for the disappearance of the debris, but reconstruction and cleaning are going on simultaneously.

MINING FRAUDS IN BRAZIL.

Country is Full of Schemes to Obtain Money of Gullible.

Washington, July 17.—Consul General George E. Anderson, in a report to the bureau of manufacturers from Rio Janeiro, charges that while some bona fide Brazilian diamond mines may result profitably, that country is full of schemes which are either out-and-out frauds or are based on claims and facts so slight as to make them little less than frauds.

The report says the United States and Great Britain, especially New York, Chicago and London, are the chief financial base of operations for a number of promoters, who have never done any mining, and that there are a number of so-called mining companies now soliciting stock subscriptions in the United States whose officers are not even certain where the land they claim as property lies.

The report says that experienced men in Brazilian mining fields say that not a single mining company operating in the gold and diamond fields of Brazil has paid a dividend. The consul general adds that it is a lamentable fact that a large proportion of the Brazilian mining enterprises are frauds and that there are now men of the United States with enterprises which represent nothing more than the money they can get from the American public.

TEST OF CANNED MEATS.

Congress Will Know What Is Effect of Age.

Washington, July 17.—The bureau of chemistry, agricultural department, is to carry on a series of tests this summer to ascertain definitely whether canned meats deteriorate. One of the bitter contentions over the meat inspection amendment to the agricultural appropriation bill hinged on the senate requirement that packers should place the date of manufacture on each can of meat.

The packers, however, insisted that this was unwarranted, because they claimed that meat, once put up in air tight cans, would last forever. They declared that canned meat was as good in ten years as it was in ten days, and they brought to bear testimony of an official of the department to corroborate their statements. Some members of congress had their doubts about this, however, so it has been decided to make a thorough investigation and find out whether the packers were correct or not.

Wounded Hacked With Axes.

Siedlice, Russian Poland, July 17.—The Mariavite Catholic strike has again been resumed, owing to the action of the court in returning to its owners the Catholic church recently captured by the Mariavites in the village of Gremchov. After the return of this church to the Catholics it was again attacked and recaptured by the Mariavites. The wounded were most horribly maltreated, beaten, hacked with hatchets and axes, stripes of their flesh being torn out, teeth and ears missing and eyes gouged out.

Officers Preach Revolution.

St. Petersburg, July 17.—At a meeting held today at Gatchina, 30 miles from St. Petersburg, attended by three of the Guard regiments, an officer addressed the men on the subject of the soldiers' union, which is being organized. He pointed out that the league was democratic and was being organized for the purpose of guarding the constitution and establishing constitutional institutions and to prepare the army to come over to the people when they were ready and armed for resistance. The speech was received with applause.

Killed at Peterhof.

London, July 17.—A dispatch to a news agency from St. Petersburg says that General Koslov, of the headquarters staff, was murdered in the park at Peterhof Saturday. His assailant used a revolver. The three shots fired were all effective. The murderer was a well dressed man. He has been arrested, but not identified. The case is regarded as mysterious, as General Koslov was not connected with any political agitation.

Thousands Without Homes.

Nizhni, Novgorod, July 17.—A fire which broke out here today raged for six hours before it was checked. When it was finally extinguished 275 houses had been destroyed and more than 3,000 families had been rendered homeless. The loss is placed at \$400,000.

RHEUMATISM

ALMOST AS COMMON IN SUMMER AS IN WINTER.

While the damp, cold, changing weather of Winter intensifies the pains and other disagreeable symptoms of Rheumatism, it is by no means a winter disease exclusively. Through the long months of Summer its wandering pains and twitching nerves are felt by those in whose blood the uric acid, which produces the disease, has accumulated.

Rheumatism is a disease that involves the entire system. Its primary cause results from the failure of the eliminative organs, the Liver, Kidneys and Bowels, to carry out of the system the uric acid, or natural refuse matter. This coming in contact with the different acids of the body forms uric acid which is taken up and absorbed by the blood. This acid causes fermentation of the blood, making it sour and unfit for properly nourishing the body, and as this vital stream goes to every nook and corner of the body, the poison is distributed to all parts. The nervous system weakens from lack of rich, pure blood, the skin becomes feverish and swollen, the stomach and digestion are affected, the appetite fails and a general diseased condition of the entire system is the result.

Not only is Rheumatism the most painful of all diseases, with its swollen, stiff joints, throbbing muscles and stinging nerves, but it is a formidable and dangerous trouble. If the uric acid is allowed to remain in the blood, and the disease becomes chronic, chalky deposits form at the joints, and they are rendered immovable and stiff, and the patient left a helpless cripple for life. Every day the poison remains in the system the disease gets a firmer hold. The best time to get rid of Rheumatism is in warm weather; because then the blood takes on new life and the skin is more active and can better assist in the elimination of the poisons. With the proper remedy to force the acid out of the blood, and at the same time build up and strengthen the Liver, Kidneys, Bowels and other organs of the body, Rheumatism can be permanently cured. External applications relieve the pain and temporarily reduce the inflammation, and for this reason are desirable, but they cannot have any effect on the disease. The blood is poisoned and the blood must be treated before a cure can be effected.

S. S. S., a remedy made from roots, herbs and barks, is the best treatment for Rheumatism. It goes into the blood and attacks the disease at its head, and by neutralizing the acid and driving it out, and building up the sour blood so it can supply nourishment and strength to every part of the body, it cures Rheumatism permanently. S. S. S. is the only safe cure for the disease; being purely vegetable, it will not injure the system in the least, as do those medicines which contain Potash or some other mineral ingredient. S. S. S. tones up every part of the body by its fine tonic properties. While cleansing the blood of all poisons it builds up the appetite and digestion, soothes the excited nerves, reduces all inflammation, relieves pain and completely cures Rheumatism in every form—Muscular, Inflammatory, Articular or Sciatic. If you are worried with the nagging pains of Rheumatism, do not wait for it to become chronic, but begin the use of S. S. S. and purge the blood of every particle of the poison. Write for our book on Rheumatism, and ask our physicians for any advice you wish. We make no charge for either.

THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.

Last Summer I had a severe attack of Inflammatory Rheumatism in the knees, from which I was unable to leave my room for several months. I was treated by two doctors and also tried different kinds of liniments and medicines which seemed to relieve me from pain for awhile, but at the same time I was not any nearer getting well. One day while reading a paper I saw an advertisement of S. S. S. for Rheumatism. I decided to give it a trial, which I did at once. After I had taken three bottles I felt a great deal better, and I continued to take it regularly until I was entirely cured. I now feel better than I have for years.

CHAS. E. GILDERBLEVE.
613 2nd Street, Newport News, Va.

MAKING ARTIFICIAL ICE CREAM.

Cottonseed Oil Used Instead of the Ordinary Ingredients.

"When Prof. Stillman of Stevens Institute gave a dinner to two friends, at which most of the viands were made artificially by chemical means," writes Lawrence Perry in the Technical World magazine, "he had small idea of the furor his efforts would produce. But he has received hundreds of letters asking how different dishes were produced—so many that he has not had time to answer many of them."

"The chemical processes which he employed were some of them simple and some quite complicated. To make vanilla ice cream by artificial means, for instance, the alchemist took some triple refined cottonseed oil and placed it in a centrifugal machine which revolved at a velocity of 3,000 revolutions a minute. A beautiful emulsion was thereby produced, which was then flavored, chemically, of course. The flavor was obtained by the addition of vanilla, glucin and nitrobenzol. They said that ice cream composed as above is sold in many Southern States where cottonseed oil is more plentiful and consequently cheaper than milk or cream. It is far from harmful, tastes good and does not melt as quickly as the genuine ice."

A Freak Statue.

One of the most interesting freak statues in England is to the memory of Sir R. Holmes. It is to be seen in the church at Yarmouth, Isle of Wight. The funny thing about it is that it was not originally intended to represent that naval celebrity. It was sculptured for and represented Louis XIV. of France and was being conveyed to that country when the vessel containing it (and also the sculptor) was captured by an English ship commanded by Sir R. Holmes.

The body was finished, the head being left for completion on its arrival in France. On learning who it was for the English commander compelled the sculptor to finish it by chiseling his (Holmes') head on the King's body.

Had Tried It.

"You ought to try taking a long walk on an empty stomach."

"Why, doctor, I did the other day, after the races were over, and felt all the worse for it."

UTTERLY WORN OUT.

Vitality Sapped by Years of Suffering With Kidney Trouble.

Capt. J. W. Hogen, former postmaster of Indianapolis, now living at Austin, Texas, writes: "I was afflicted for years with pains across the loins and in the hips and shoulders. I had headache also and neuralgia. My right eye, from pain, was of little use to me for years. The constant flow of urine kept my system depleted, causing nervous chills and night sweats. After trying seven different kinds of medicine, I had the good fortune to hear of Doan's Kidney Pills. This remedy has cured me. I am as well today as I was twenty years ago, and my eyes are perfect."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Retort Courteous.

"Aw—captain, you used to be a what'er, didn't you?"

"Yes."

"Would you mind telling me—aw—what kind of bait you used in catching a whale?"

"Dudes, when we could get 'em, young feller."—Chicago Tribune.

Couldn't Deny It.

Prospective Investor—The earthquake, of course, has disturbed property values out here a great deal.

San Francisco—Well, sir, to tell the truth, our real estate fluctuates like the mischief while the quake was on.—Chicago Tribune.

Encouraging Him.

The Young Man (ardent, but bashful)—Miss Hope, I shall try to show you that I am not—er—as big a fool as I seem. You mustn't judge me by appearances.

The Young Woman—Certainly not, Mr. Wrightson. You don't make your appearances here often enough for that.

Getting Direct Action.

Beryl (at the phone)—The idea of sending a kiss by telephone! Do you suppose I want to be kissed on my ear?

Jasper (at the other end of the wire)—Well, can't you put the receiver to your lips for a moment? * * *

There!—Chicago Tribune.

STATE OF OHIO, CITY OF TOLEDO, [ss. Lucas County.]

FRANK J. CHENEY makes oath that he is senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, County and State aforesaid; and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of HALL'S CATHARTIC CURE.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1906.

A. W. Notary Public.

Hall's Cathartic Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O. Sold by Druggists, etc.

Hall's Family Pills are the best.

Decidedly Improved.

Mr. Snagaby (rummaging in closet)—Maria, this is a new hat, isn't it? Why don't you wear it? It looks better than anything you have worn this season.

Mrs. Snagaby—That's my old hat. It blew off my head the other day and I was run over by a street car, and I think you are just as mean as you can be!—Chicago Tribune.

CLASSIFIED ADVERTISING

Portland Trade Directory

Names and Addresses in Portland of Representative Business Firms.

Divorce Increasing.

Divorces seems to be growing more prevalent every succeeding year. In 1905 there were 202 divorces in New York City. In 1904 there were 843.

The same increase is true of Chicago, where in 1905 there were 1,145 divorces, and in 1904 there were 2,350. In Philadelphia in 1904 614 divorces are on record, against 304 in 1905. In Boston there were 230 cases of divorce in 1905, and 512 in 1904.

Nearly all the larger cities show a corresponding increase of divorces.

CASH I am prepared to purchase First or second mortgage on Real Estate in any State. I will make loans. Write for particulars. H. E. Noble, 312 Commercial Bldg., Portland, Or.
