

Help! Help! I'm Falling

Thus cried the hair. And a kind neighbor came to the rescue with a bottle of Ayer's Hair Vigor. The hair was saved! In gratitude, it grew long and heavy, and with all the deep, rich color of early life. Sold in all parts of the world for sixty years.

—About one year ago I lost nearly all of my hair following an attack of measles. I was advised by a friend to use Ayer's Hair Vigor. I did so, and as a result I now have a beautiful head of hair. —Miss W. J. Brown, Menomonee Falls, Wis.

No More Cold Rooms

If you only knew how much comfort can be derived from a PERFECTION Oil Heater—how simple and economical its operation, you would not be without it another day.

You can quickly make warm and cozy any cold room or hallway—no matter in what part of the house. You can heat water, and do many other things with the

PERFECTION Oil Heater

(Equipped with Smokeless Device)

Turn the wick as high or low as you can—there's no danger. Carry heater from room to room. All parts easily cleaned. Gives intense heat without smoke or smell because equipped with smokeless device.

Made in two finishes—nickel and japan. Brass oil fount beautifully embossed. Holds 4 quarts of oil and burns 9 hours. Every heater warranted. If you cannot get heater or information from your dealer, write to nearest agency for descriptive circular.

THE Rayo Lamp cannot be equalled for its bright and steady light, simple construction and absolute safety. Equipped with latest improved burner. Made of brass throughout and nickel plated. An ornament to any room whether library, dining-room, parlor or bedroom. Every lamp warranted. Write to nearest agency if not at your dealer's.

STANDARD OIL COMPANY

The Inquisitive Barber.
No doubt many readers have heard of the austere disposition of America's greatest living actor, Richard Mansfield. Perhaps the following conversation, which took place in one of Boston's leading hotels, better illustrates the satirical nature of the player. Entering the barber's shop one morning, he was immediately recognized as Richard Mansfield by the barber.

"Good morning," said the barber affably.

A grunt was the only reply.

"Well, how was things over at the house last night?"

"What house?" answered the actor ironically.

"The Hollis," said the barber.

"What do you mean, sir?"

"Why, are you not Richard Mansfield?" the barber asked.

"Oh, no, indeed," replied Mr. Mansfield. "I just got out of jail this morning."

"What! You're not Richard Mansfield; and you just got out of jail this morning! What for, pray?"

"For assaulting inquisitive barbers," was the response.

Bad Blood

Is the cause of all humors, eruptions, boils, pimples, scrofulous sores, eczema or salt rheum, as well as of rheumatism, catarrh and other troubles. The greatest blood remedy for all these troubles, proved by its unequalled record of cures, is

WOMEN'S VOICES

Thousands of women suffer daily headache, dizzy spells, languor, nervousness and a dozen other symptoms of kidney trouble, but lay it to other causes.

Keep the kidneys well, and these aches and troubles will disappear.

Mrs. Anthony Cadrette, 77 Mechanic St., Leominster, Mass., says: "My night failed, I had sharp pain in my back and bearing-down pains through the hips. I was nervous, fretful and miserable. The urine was greatly disordered and I began to have the swellings of dropsy. I was running down fast when I started using Doan's Kidney Pills. A wonderful change came and after using them faithfully for a short time I was well."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Far-Reaching Echo.
The Officer—You say the chauffeur struck his horn just as the machine rounded the man?
The Witness—Yes, sir.
The Officer—Was the victim killed instantly?
The Witness—So instantly, sir, that he must have heard the echo of that horn in the next world.

LEGISLATORS MEET

Oregon Solons Seeking Information on Public Matters.

PENDLETON ENTERTAINS THEM

Visit Washington's Jute Mill and Oregon State Normal School at Weston.

Pendleton, Or., Oct. 30.—Whether Oregon should supplement its stove foundry in the Salem prison with a jute mill was studied today in the Walla Walla jute plant of the Washington state prison by Governor Chamberlain, of Oregon, 33 members of the Oregon legislature, C. W. James, superintendent of the Oregon penitentiary, and others. While the lawmakers have not expressed their opinions on the subject freely, it is evident that many of them do not favor the change.

This is the attitude also of Governor Chamberlain and Superintendent James. They argue that the stove foundry brings to the state a revenue twice as big as a jute mill would do, that a jute mill would launch the state in a business which is in large measure speculative and risky and liable to heavy losses because the raw product from India is manipulated by a trust; that the finished bags would be sold to consumers near the factory, thereby discriminating against others not favored by proximity to the plant; that Oregon's participation in the business would not regulate prices, because it could make only 12 per cent of the bags used, and the Washington plant doubled in size could make only 25 per cent of the bags used in that state; and that the change to a jute mill would entail upon the state an expenditure of perhaps \$125,000.

The Oregonians examined the jute mill with keen interest. It was not running, because the day was one of its alternate idle ones, the idleness coming from short jute supply. But several of the 70 looms were put in motion for exhibition. The visitors, headed by Governor Chamberlain, were conducted through the plant by Governor Mead and M. F. Kincaid, the new superintendent.

The chief argument for the jute mill is that manufacture of grain sacks, unlike that of stoves, does not compete with free labor and that it gives farmers sacks cheaper than the market price.

After viewing the Walla Walla plant, the visitors went to Weston to view the Normal School at that place and thence came to Pendleton, where they attended a dinner and smoker tonight, given by the Commercial Association.

At the Weston Normal School the party was greeted by Robert C. French, president of that institution, and was led to the assembly hall of the school where some 240 students were gathered. President French, to show that the institution was not a local high school for Weston, asked the pupils residing in Weston to arise, then those whose homes were beyond the town. The latter number visibly exceeded the former.

President French said afterward that of the 133 pupils in the normal department, only 22 are residents of Weston. In addition are 102 young pupils in the training department, all from Weston, their studies ranging from kindergarten to eighth grade. The age of normal pupils ranges from 15 to 27, most of them being 17, and 19.

Governor Chamberlain spoke commendably of the school, saying it would always have a place in his heart. Representative Davey, of Marion, encouraged the friends of the school by declaring that it is one of the indispensable educational institutions of Oregon. Representative Vawter, of Jackson, spoke the same sentiment and jokingly said that Governor Chamberlain's remarks had put him on record and that he would be remembered when he should stand upon the appropriation bill of the Republican legislature. Other speakers were Senator Smith, of Umatilla, and J. H. Raley, of Pendleton.

The town of Weston took an afternoon holiday to receive the visitors. At the station, a mile distant from the school, numerous conveyances were waiting their arrival, to convey them up town. The keen interest of Weston in its normal school was evidenced by the appreciation its citizens showed of the visit of the Governor and the Legislators.

At tonight's dinner Governor Chamberlain urged co-operation of Oregon and Washington for improvement of the Columbia river and the protection of salmon. Governor Mead responded that in improvement of that river Washington "ought to co-operate with your state." But he pointed out that Seattle controlled a great part of the legislative power of Washington, and that it was not so well informed of the needs of the Columbia river as it might be.

LEGISLATORS MEET

Buffalo Bill to Rescue.

Runners Sent by Renegades for Help to Drive Out Whites.

Cody, Wyo., Nov. 5.—Colonel William F. Cody ("Buffalo Bill"), accompanied by Colonel Brock and several members of the party which returned a few days ago from a big bear hunt in the Big Horn Mountains, left here for Sheridan, Wyo., intending to hold a conference with the Utes before the latter start on their overland march to Fort Meade, where they are to stay in charge of the Sixth Cavalry until spring.

Notwithstanding the agreement which was reached at the conference between the soldiers and the Utes, there are fears of a general uprising of all northern Indians. "Buffalo Bill," who is familiar with Indian characteristics, has been kept closely advised of the developments in the recent troubles, and he believes the matter will not be entirely settled by the arrangement which puts an end to the wanderings and depredations of the Utes under Appah and Black Whisker. At last night's conference, the renegades have been going to all the tribes of the Sioux, Northern Cheyennes and Crows, with a view of inducing them to join in driving the whites out of the land, and Colonel Cody believes that steps should be taken at once to counteract efforts of these messengers to stir up revolt. On his arrival at Sheridan, Colonel Cody will confer with the military authorities as to the exact methods of procedure.

GREAT FAMINE IN CHINA.

Ten Million on Verge of Starvation—Crops an Utter Failure.

Shanghai, Nov. 5.—Admiral received from the Chinese government a report of the most desperate nature prevail in the Northern part of the great Province of Kiang-Su, with but one exception the most fertile and valuable of many provinces of the empire. Ten millions of the province are reduced to stern want.

Crops are an utter failure and scenes of suffering that rival anything known in the history of the world from every point in the region. Food riots, which have been marked with much bloodshed, are reported daily, and so far the officials have taken no steps to relieve distress. In fact, the famine is spreading to the cities all of the local governors have been ordered to give the people in their homes at all hazards, and further rioting has resulted from this step.

All of the local diplomatic representatives have received advices from foreigners in the famine-stricken region urging them to use all their influence to have the imperial government take steps to aid sufferers. A Presbyterian missionary who has just returned from the region declares that thousands of persons have already starved to death, and that unless immediate aid is forthcoming the death list will be appalling.

CINCH ON YELLOWSTONE.

Major Pitcher Recommends That Competition Be Established.

Washington, Nov. 5.—According to the annual report of Major John Pitcher, Acting Superintendent of the Yellowstone National Park, the monopoly enjoyed by the Yellowstone Lake Boat Company for the transportation of tourists from Upper Geyser Basin to the Thumb is becoming a serious problem. Major Pitcher has recommended that competition be established in some way, or that the stage lines be permitted to operate their own boats, in order to give the tourist the choice of boat or land transportation to the Thumb.

The Yellowstone Lake Boat Company charges \$3 a head for the trip, which is 18 miles distance. Its franchise expires on July 21 next. Major Pitcher emphasizes his recommendation of last year that the garrison at Fort Yellowstone be increased to a four-troop or squadron post.

STEEL INDUSTRY EXPANDS.

Washington, Nov. 5.—A bulletin issued by the Department of Commerce and Labor says that exports of iron and steel manufacture show an increase of about 25 per cent in the nine months ended with September, and imports of a similar character show also an increase of practically 25 per cent in the same period as compared with the same months of the preceding year.

The growth in operations of iron and steel, the bulletin says, was larger in the nine months ended with September, 1906, than in any corresponding period of our export trade. It is the result of the increase in the corresponding period of the preceding year was over \$24,000,000.

Carnegie Institute Damaged.

Pittsburg, Nov. 5.—Fire threatened the destruction of the Carnegie institute, valued at \$6,000,000, and the most beautiful structure of its kind in America. The fire originated in the power room in the basement, from defective electrical wires, and was extinguished after damaging the building to the extent of \$20,000. There were many persons in the music hall of the institution attending an organ recital when the fire was discovered, but all reached the street in safety.

Blank Hand Throws Bomb.

New York, Nov. 5.—Unsuccessful in their attempts to blackmail Francisco Messina, a prosperous tailor of Brooklyn, members of the so-called Black Hand Society so the police say, hurled a dynamite bomb against the front door of the tenement-house in which he lives and conducts his business. Damage of \$5,000 to the building and surrounding property was caused. Scores of persons felt the shock of the explosion, but no one was injured. Messina has received letters demanding \$400 to \$1,000. Detectives arrested two men on suspicion.

Mine Diamonds in Kentucky.
Lexington, Ky., Nov. 5.—With a view of mining diamonds in Elliott and Carter counties, Samuel Pearson, of Scranton, Pa., and W. J. Rice, of San Juan, P. R., have organized the Kentucky Transvaal Diamond Mining Company, with a capital of \$100,000. Pearson, who spent years as an engineer in the diamond fields of South Africa, says that the indications for diamonds are better in Kentucky than in South Africa.

Pirates Seize Launches.
Hongkong, Nov. 5.—Reports have been received that Chinese pirates have seized a British launch and two Chinese launches in West River, and escaped with \$10,000 in booty after a running fight. No casualties are reported.

ACNE, TETTER, ECZEMA, PSORIASIS, SALT RHEUM.

There is nothing more distressing than an itching, burning skin disease, and upon the return of warm weather those who are afflicted with skin troubles find the symptoms appearing and know that they will be tormented through the hot summer months. The blood is heated with humors and acrid matter, and as they are forced to the surface the skin seems to be on fire. The treatment of skin diseases with external applications is all wrong, because they do not reach the trouble which is in the blood. The most such treatment can be expected to do is, allay the itching and burning and cover up the trouble for awhile, but as soon as it is left off the disease returns.

All food taken into the body contains, in some form, the elements necessary to sustain the different parts. One portion is used for the making of blood, another for muscle, one for bone, still another for fat, and so on. After these different properties are extracted from the food there still remains a portion that is useless, or waste matter, which is intended to be disposed of through the natural channels of bodily waste, the Liver, Kidneys and Bowels. At this season of the year, however, these organs become torpid, dull and sluggish, and fail to perform this duty, and these accumulations remain in the system and are absorbed by the blood to ferment and sour, producing burning acids and acrid humors. The blood cannot properly nourish the system while in this impure condition, and begins to throw off these acids through the pores and glands of the skin, producing Acne, Eczema, Tetter, Psoriasis, Salt Rheum and skin diseases of every description.

ECZEMA appears usually with a slight redness of the skin, followed by pustules from which there flows a sticky fluid that dries and forms a crust, and the itching is intense. It is generally on the back, breast, arms, legs and face, though other parts of the body may be afflicted. In **TETTER** the skin dries, cracks and bleeds, and is often very painful. The acid in the blood dries up the natural oils of the skin, causing a dry, feverish, hardened condition and giving it a leathery appearance. **ACNE** makes its appearance on the face in the form of pimples and black-heads, and is particularly disagreeable because of its unsightly appearance, while **PSORIASIS**, a scaly disease, comes in patches on different parts of the body. One of the worst forms of skin disease is **SALT RHEUM**. It discharges a watery fluid, forming sores and producing intense itching. The head and face are the parts usually affected, and sometimes the hair falls out and a mass of sores forms on the scalp.

These and all skin diseases are due to the same cause—burning acids and humors in the blood, and until this vital fluid is cleansed and made pure they will continue. The best treatment for all skin diseases is S. S. S., a remedy that is purely vegetable, being made entirely from roots, herbs and barks, and acts directly on the blood with a cleansing, healing effect. It neutralizes the acids and purifies the blood so that the skin, instead of being blistered and burned by the fiery fluids, is nourished by a supply of cooling, healthy blood. It goes down into the circulation and forces out every particle of waste or foreign matter, builds up the blood and cures all skin diseases promptly and permanently. S. S. S. does not leave the least particle of the poison for future outbreaks, but entirely rids the blood of the cause for all skin diseases.

S. S. S. tones up the system and regulates the Liver, Kidneys and Bowels so that they will carry off the natural waste and refuse matter through the proper channels, instead of leaving it to be absorbed by the blood. Nothing equals S. S. S. in the treatment of these troubles and for building up the general health. Write for our treatise on skin diseases and any medical advice you wish. We make no charge for either.
