IRRIGATION IN CANADA.

Alberta Country Fast Coming to the Front.

The Canadian Pacific Railway company is now engaged in a great irrigation work, just east of Calgary, that will eventually bring under water 1,500,000 acres of as fine land as there told me he had two half-sisters, but 1 is in all of Canada. They have just guess I know enough fractions for thrown open to settlement the first that!" block of 110,000 acres, which they are selling at from \$15.00 to \$25.00 per acre. In connection with this irri- Take LAXATIVE BROMO QUININE Tablets gated land they are selling non-irigable lands at from \$12.00 to \$15.00 per acre, which cannot be surpassed for grazing purposes, and affords a range where stock may graze throughout the entire

year without shelter.

The future of Western Canada, and particularly the southern portion of Alberta province, is assured. Calgary, bors its metropolis, a city of 20,000 inhab- He itants, comosed largely of Americans, is a live, up-to-date city. Its retail business is in the hands of bright, pro-gressive business men, who handle enormous stocks. There are a number of jobbing houses located there, and a home market for stock is afforded by a large packing house. Along the line of the Canadian Pacific railway in Southern Alberta, there have been twenty elevators established the past year, to be followed by thirty more next year, so that there will be no shortage for the immense crops produced in this

Impending.
Reporter—Colonel, you have read what Senator Gotleft says about the country facing an industrial crisis. Do you think his fears are justified?

Eminent Statesman-So far as he is concerned, young man, they are. He is face to face with the dreadful alternative of going to work at something or starving to death.

Imitations have been placed upon the market so closely resemblina Allc ck's Platers in general appearance as to be well calculated to deceive. It is however, in general appearance only that they compare with Allcock's, for they are not only lacking in the best elements which have made Allcock's so efficient, but are often harmful in their effects. Remember that Allcock's are the original and only genuin-porous plasters—the best external remedy known—and when purchasing plasters the only sefe way is to always insist upon having Allcock's.

An Expert investigates it and Makes Flattering Report.

There has been much adverse criticism of the Spencer Seedless Apple, notably in the Rural New Yorker and some of its satellites. The opinion of a recognized horticulturist, who has made a thorough examination of the apple, being allowed free range in the orchard where they are grown, should be valuable to those who are thinking

the iceman gets just about what's comice for 10 cents.

"On the contrary, softly rings an perienced horticulturist of reputation of apologetic bell, and outside stands a their own selection. This was readily meek-faced man imploring patronage; assented to, and as a result the Hon. not only imploring patronage, but gen. John Dryden, who for more than twenerously handing out 5 cent pieces of ty years was minister of agriculture for ice for 10 cents."

THE SOURCE OF ALL DISEASE

Every part of the body is dependent on the blood for nourishment and strength. When this life stream is flowing through the system in a state of purity and richness we are assured of perfect and uninterrupted health; Lecause pure blood is nature's safe-guard against disease. When, however, the body is fed on weak, impure or polluted blood, the system is deprived of its strength, disease germs collect, and the trouble is manifested in various ways. Pustular eruptions, pimples, rashes and the different skin affections show that the blood is in a feverish and diseased concucion as a result of too much acid or the presence of some irritating humor. Sores and Ulcers are the result of morbid, unhealthy matter in the blood, and Rheumatism, Catarrh, Scrofula, Contagious Blood Poison, etc., are all deep-seated blood disorders that will continue to grow worse as long as the poison remains. These impurities and poisons find their way into the blood in various ways. Often a sluggish, inactive condition of the system, and torpid state of the avenues of bodily waste, leaves the refuse and waste matters to sour and form uric and other acids, which are taken up by the blood and distributed throughout the circulation. Coming in contact with contagious diseases is or company operates freight steamers have freight steamers from Japan to Vladivostok, Corea, shapphai, Formosa and Hongkong, and is desirous of extending its line to this coast. Manager Strakenouchi will look into the facilities here and will also disorders that will continue to grow worse as long as the poison remains.

Second Judge for Oregon.

Washington, Feb. 5. — Senator Fulwashington, Feb. 5. — Twice during the location of the system, and torpid state of the provided in the company operates freight to Vladivostok, Corea, shapphai, Formosa and Hongkong, and is desirous of extending its line to this coast. Manager Strakenouchi will look into the facilities here and will also disorders that will continue to grow worse as long as the poison remains.

These impurities and poisons find their way into the blood in various ways.

Often a sluggish, inactive condition of the system, and torpid state of the worse and thought of the scale of the ships are less than a quarter of a mile of the shapphair. Shangkai, Formosa and Hongkong, and sidesirous of extendin Often a sluggish, inactive condition of the system, and torpid state of the avenues of bodily waste, leaves the refuse and waste matters to sour and form uric and other acids, which are taken up by the blood and distributed throughout the circulation. Coming in contact with contagious diseases is another cause for the poisoning of the blood; we also breathe the germs and microbes of Malaria into our lungs, and when these get into the blood in microbes of Malaria into our lungs, and when these get into the blood in sufficient quantity it becomes a carrier of disease instead of health. Some are so unfortunate as to inherit bad blood, perhaps the dregs of some old constitutional disease of ancestors is handed down to them and they are constantly annoyed and troubled with it. Bad blood is the source of all discass, and until this vital fluid is cleansed and purified the body is sure to suffer in some way. For blood troubles of any character S. S. S. is the best semely ever discovered. It goes down into the circulation and removes any and all poisons, supplies the healthful properties it needs, and completely and permanently cures blood diseases of the congestion, but not another full of the congestion, but not not present the full of the congestion of the suprement of court officials.
