The Dieting Nuisance.

The dieting fad prevails to such an extent in England that numbers of extent in England that numbers of well known hostesses have put their heads together and drawn up a declar-ation of independence. This sent out with all invitations to country houses reads thus: "I am sorry to appear in-hospitable, but my housekeeper and cook cannot arrange to cater for any guest who is obliged to diet." The food faddist, it seems, has become no end of a nuisance in other people's houses and though the bostesses might houses, and though the hostesses might be willing to endure it, the servants have risen in revolt. SKIN DISEASES **HUMORS IN THE BLOOD**

When the blood is pure, fresh and healthy, the skin will be soft, smooth and free from blemishes, but when some acid humor takes root in the circulation its presence is manifested by a skin eruption or disease. These humors get into the blood, generally because of an inactive or sluggish condition of the members of the body whose duty it is to collect and carry off the waste and refuse matter of the system. This unhealthy matter is left to sour and ferment and soon the circulation becomes charged with the acid poison. The blood begins to throw off the humors and acids through the pores and glands of the skin, producing Eczema, Acne, Tetter, Psoriasis, Salt Rheum and skin eruptions of various kinds. Eczema appears, usually with a slight redness of the skin followed by pustules from which there flows a sticky fluid that dries and forms a crust, and the itching is intense. It is generally on the back, breast, face, arms and legs, though other parts of the body may be affected. In Tetter the skin dries, cracks and bleeds: the acid in the blood dries up the natural oils of the skin, which are intended
