Spreads Through the East Like Prairie Fire.

eared That Epidem'c May Surpass That of 1889 90 -Street Car Service is Crip; led.

Chicago, Dec. 31.—Deadly grippe, which has already fastened itself upon nearly every city east of the Mississippi river, is spreading westward with ap-palling rapidity. Not since the terri-tle epidemic of 1889-90 have there been such ravages by the fearful malady as at the present time, according to special dispatches gathered from many sourcer. Mild, open weather, highly unseasona-ble, is held responsible by health au-

thorities.
Pittsburg is the chief complainant So many people there are ill that the streetcar service is crippled and office buildings are practically empty. Besides Pitteburg, New York, Baltimore, Cincinnati, Philadelphia, Cleveland, Boston, Milwaukee and other Eastern and Western cities were reported to be wrestling with the disease, a number of

"La grippe, as the French call it," said Dr. Herman Spalding, of the Chi-cago Health department, "travels with the speed of a prairie fire. It travels along the lines of transportation, as it is carried by travelers from one city to another. It is decidedly contagious and there is no effective way of check-ing its spread. If other cities become badly affected, Chiago is sure to be hit, because of the thousands of travelers who arrive daily in Chicago from every

point of the compass."
From New York word comes that the grippe has begun a devastating crusade in that city and that among its victims have been opera singers and many actors and actresses. There were 63 deaths in the metropolis last week. Besides this there were many deaths from pneumonia, influenced by the grippe bacillus. Physicians in Boston say there are at

least 60,000 cases now in that city. Cincinnati has 2,000 cases and physicians say that new cases are developing by the score every hour.

ON SECOND STAGE.

Port of Spain, Dec. 31.—The American battleship fleet weighed anchor at 4 o'clock Sunday afternoon and steamed for Rio Janeiro. Accompanying the fleet were the supply ships Culgoa and Glacier. Early in the morning the signal went ups from Rear Admiral Evans' flagship Connecticut to prepare for dearture at 8 a. m., but owing to a delay in the coaling of the battleship Maine from the collier Fortuna, it was necessary to change the time of sailing. Port of Spain, Dec. 31 .- The Ameri

necessary to change the time of sailing. Long before the hour set a myriad of small craft, chi-fly launches and steam yachts, moved up and down along the lines of anchored battleships, the mer-ry parties aboard shouting farewells to the departing visitors. Thousands of residents climbed the surrounding hills to view the great ships as they moved outward on their journey of 3,000 miles

distance of 400 yards separating one division from another. With the Connecticut in the lead the battleships neaded for the Booas and steamed maestically through the grand Booa and hence along the northern coast of Trindad. An average of from 10 to 11 nots an hour will carry the fleet to the end of the second lap of the 14,000-mile journey in about 12 days, and it was announced by Admiral Evans before his departure that he expects to reach Rio Janeiro on Friday evening January 10.

Natives Facing a Famine.

Hillsdale, Mich., Dec.31 .- Secretary H. S. Myers, of the general conference of Free Baptists, said today: "Ac-cording to advices just received by me from our missions in Bengal and Orissa, India, four months of rain is the usual allowance in Lucknow, India, in year, but during the year 1907 it has rained only four days. The result is famine everywhere. Thousands of the population are suffering and before re-lief comes next August hundreds of ief comes next August hundreds of housands must die unless relief comes rom Christian lands."

New York, Dec. 31 .- Ex-President Grover Cleveland, under the title of 'Our People and Their Ex-Presihas contributed an interesting article to the Youths' Companion for as a preve January 5. Referring to the poverty of Georgia. lefferson after he left the presi blow to national pride, Mr. Cleveland declares definite and generous provision should be made for the maintenance of chief magistrates. He deals with the subject at length, and explains that he feels he can do so without his sincerity being questioned.

STUDY FORESTRY.

Students at Oregon Agricultural College Gathering Tree Seeds,

By E. A. Lake, Oragon Agricultural College. The students in forestry at the Agri-cultural college are m king their first collection of seeds of native trees and shrubs for use in the establishment of The purpose in view is not only that the work shall be instructive to the student in the study of seeds and seedage, silviculture and dendrology, but that the plant shall be a source of data to the whole state upon the growth, habit, resistance and general character of the trees and shrubs of Oregon, so far as is possible to grow them upon the same site and similar conditions.

Not only are local seeds being col-lected but seeds from the home dis-tricts are coming in from friends of students and the institution. This cindness on the part of those residing in the more distant and mountainous parts of the state is highly appreciated, as it enables the class to obtain a much greater variety than otherwise would be possible with the time and means at the command of either students or in

Owing to the fact that the course is out one year old, only the general and preliminary phases of the subject have been considered by the students in the work. The O. A. C. Forest club, an organization of those interested in the forests of the state, is now discussing forest fire laws, their enforcement, effi

ciency and improvement. Each stu-dent is assigned a phase of the topic in hand and in due time reports his findings to the club. Prominent timber, mill and lumbermen upon invitation discuss various topics before the club, as transportation, timber preservation, forest conservation, re-forestation, im-proved methods of lumbering, U. S. orest service work and similar topics Later the advanced students will take p work looking to the solution of some

of the very practical problems new be-fore the wood users of the country.

The great problem of what to do with the waste, including the standing timber that is injured by insect and fungus foce, will be one of the first to be investigated as soon as the equip ment of the department will permit. The statement is made upon good authority that fifteen per cent of the authority that fifteen per cent of the mature timber on the western slope of the central region of the Cascade is wholly lost through fungous diseases, and that another fifteen per cent is graded as cull. Beetles, borers and minor foes do considerable further damage, and it is safe to say that the

sum total of these losses must amount to millions of dollars. It is reasonable to suppose, in the face of recent results in agricultural practices in our own country, to say nothing of the modern forestry practices of Europe, that the major part of this loss could be turned to gain through the intelligent investi-gation of the troubles and the application of modern measures for combatting these foes of the forest.

Other great problems are those relating to taxation, re-forestation, utiliz ing mill waste, improved methods o harvesting the crops, disposing of the debris and weed trees, timber technology and the preservation of lumber.

These problems together with many more it is the purpose of the college to help solve through the department of forestry, as well as train men to take hold of the practical work and prob-lems of our forests and thus insure the best possible use of the tree crop.

Publications for Farmers.

Physicians Recommend Castoria

CASTORIA has met with pronounced favor on the part of physicians, pharmaceutical societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably the result of three facts: First-The indisputable evidence that it is harmless: Second-That it not only allays stomach pains and quiets the nerves, but assimilates the food: Third-It is an agreeable and perfect substitute for Castor Oil. It is absolutely safe. It does not contain any Opium, Morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrups, Bateman's Drops, Godfrey's Cordial, etc. This is a good deal for a Medical Journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system-not by stupefying it-and our readers are entitled to the information. - Hall's Journal of Bealth.

Letters from Prominent Physicians addressed to Chas. H. Fletcher. Dr. B. Halstead Scott, of Chicago, Ills., says: "I have prescribed your Castoria often for infants during my practice, and find it very satisfactory." Dr. William Belmont, calcleveland, Ohio, says: "Your Castoria stands

first in its class. In my thirty years of practice I can say I never have found anything that so filled the place." Dr. J. H. Taft, of Brooklyn, N. Y., says: "I have used your Castoria and

ound it an excellent remedy in my household and private practice for

many years. The formula is excellent." Dr. R. J. Hamlen, of Detroit, Mich., says: "I prescribe your Castoria extensively, as I have never found anything to equal it for children's troubles. I am aware that there are imitations in the field, but I always

see that my patients get Fletcher's." Dr. Wm. J. McCrann, of Omaha, Neb., says: "As the father of thirteen children I certainly know something about your great medicine, and aside from my own family experience I have in my years of practice found Castoria a popular and efficient remedy in almost every home."

Dr. J. R. Clausen, of Philadelphia, Pa., says: "The name that your Castoria has made for itself in the tens of thousands of homes blessed by the presence of children, scarcely needs to be supplemented by the endorsement of the medical profession, but I, for one, most heartly endorse it and believe it an excellent remedy."

Dr. R. M. Ward, of Kansas City, Mo., says: "Physicians generally do not prescribe proprietary preparations, but in the case of Castoria my experience, like that of many other physicians, has taught me to make an exception. I prescribe your Castoria in my practice because I have found it to be a thoroughly reliable remedy for children's complaints. Any physician who has raised a family, as I have, will join me in heartlest recom

SKIN DISEASES

HUMORS IN THE BLOOD When the blood is pure, fresh and healthy, the skin will be soft, smooth and free from blemishes, but when some acid humor takes root in the circuand free from blemishes, but when some acid humor takes root in the circulation its presence is manifested by a skin eruption or disease. These humors get into the blood, generally because of an inactive or sluggish condition of the members of the body whose duty it is to collect and carry off the waste and refuse matter of the system. This unhealthy matter is left to sour and ferment and soon the circulation becomes charged with the acid poison. The blood begins to throw off the humors and acids through the pores and glands of the skin, producing Eczema, Acne, Tetter, Psoriasis, Salt Rheum and skin eruptions of various kinds. Eczema appears, usually with a slight redness of the skin followed by pustules from which there flows a sticky fluid that dries and forms a crust, and the itching is intense. It is generally on the back, breast, face, arms and legs, though other parts of the body may be affected. In Tetter the skin dries, cracks and bleeds; the acid in the blood dries up the natural oils of the skin, which are intended

the acid in the blood dries up the natural oils of the skin, which are intended to keep it soft and pliant, causing a dry, feverish condition and giving it a hard, leathery appearance. Acue makes its appearance on the face in the form of pimples and black heads, while years and could find nothing to cure me until I tried B. S. S. I suffered intensely with the itehing and burning; pustules would form from which there flowed a sticky fluid; crusts would come on the skin and when scratched off the skin was left as raw as a piece of beef. I suffered agony in the long years I was afflicted, but when I used S. S. S. I found a perfect cure. There has never been any return of the trouble.

Btockman, Neb.
