Bishop Potter's illness first became publicly known early in the spring, when announcement was made that he was unable to take part in the Easter services. A diagnosis showed that the bishop was suffering from a stomach and liver malady and after it was given out that he would not be able to attend the Pan-Anglican conference June 21, plans were immediately made to bring the bishop here when his condition would permit the journey. Early in the present month he was near death, but rallied and for a time he was thought to be on the road to recovery.
