

Is Pe-ru-na Useful for Catarrh?

Should a list of the ingredients of Peru-na be submitted to any medical expert, of whatever school or nationality, he would be obliged to admit without reserve that the medicinal herbs composing Peru-na are of two kinds. First, standard and well-known and generally acknowledged tonic remedies. That in one or the other of these uses they have stood the test of many years' experience by physicians of different schools. There can be no dispute about this, whatever. Peru-na is composed of some of the most efficacious and universally used heral remedies for catarrhal diseases, and for such conditions of the human system as require a tonic. Each one of the principal ingredients of Peru-na has a reputation of its own in the cure of some phase of catarrh or as a tonic medicine.

The fact is, chronic catarrh is a disease which is very prevalent. Many thousand people know they have chronic catarrh. They have visited doctors over and over again, and been told that their case is one of chronic catarrh. It may be of the nose, throat, lungs, stomach or some other internal organ. There is no doubt as to the nature of the disease. The only trouble is the remedy. This doctor has tried to cure them. That doctor has tried to prescribe for them.

No other household remedy so universally advertised carries upon the label the principal active constituents, showing that Peru-na invites the full inspection of the critics.

Her Idea.
"Stocks were all down a few points today," remarked the broker.

"The idea!" exclaimed his wife. "It's a wonder they didn't advertise it as a bargain day."—Catholic Standard and Times.

Mother Will Find Mrs. Winslow's Soothing Syrup the Best Remedy to Use for their Children During the Teething Period.

Danger Ahead.
"Good-by, old man," said Wilkins at the church festival. "I guess I can see my finish."

"What's up?" queried Bilkins.
"Why, I'm to judge the prettiest baby at the show."
"Oh, that's easy. You should have my job."
"And what are you going to do?"
"Why, I am at the fortune-telling booth and have to guess girls' ages."

"Gumbolt and I have made a bet and agreed to leave it to you. He says a drowning man gets his lungs full of water, and I say he doesn't. Which of us is right?"
"The loser is to pay for a dinner for the three of us."
"I'm—I never knew Gumbolt to pay a bet. You lose."—Chicago Tribune.

Dividing Line at Cape Hatteras.
Cape Hatteras is the true dividing line between the North and the South. North of it there is not a trace of the palmetto and other forms of vegetation which, subtropical in character, cease there also. Mason and Dixon's line is an imaginary sort of a thing in the North, but Hatteras is the outer mark of the real dividing line and it affords a fine opportunity for study.—Forest and Stream.

Syrup of Figs and Elixir of Senna

SOLD BY ALL LEADING DRUGGISTS one size only, regular price 50¢ per bottle.

FEAR STRIKE RIOT.

Conditions Growing Serious in Alabama Coal District.

Birmingham, Ala., Aug. 24.—The nerve tension in the Alabama strike zone is exceedingly taut. The attempt at assassination of a nonunion miner at Pratt City last night is a theme of general discussion. Deputies attempted to make an arrest for trespass at mine No. 5 of the Tennessee company near Pratt City today and met resistance on the part of white women. Two women were arrested.

A big barbecue was held at Fulton Springs several miles north of this city today. Several thousand miners, union men, were present, and W. R. Fairley, Alabama member of the national board of mine workers, was among the principal speakers.

A number of evictions from company houses has been accomplished at the Sayre mines. Big bodies of men are meeting all trains along the north end of the mineral railroad.

Reports come that threatening letters are being dropped on the porches of homes of men remaining at work, and as a result many men are leaving.

AVERT CLASH ON BORDER.
French and German Officers Cool-headed in Emergency.

Paris, Aug. 24.—War between Germany and France was averted by the cool headedness of French and German army officers in a dramatic frontier episode which is reported from Lanesville. Two German army corps are engaged in maneuvers near the border, and yesterday morning a battalion of French rifles, marching out from Ham-burgers, approached within 50 yards of the frontier and suddenly found itself face to face with a German regiment which was drawn up at an equal distance on the other side.

The troops stood looking at each other for a moment without uttering a word or giving vent to an explanation, and then their respective commanders simultaneously ordered them to face about, and they were soon at a prudent distance from each other.

A fine illustration of military discipline was given on both sides, as a cry might have been the signal for serious trouble.

BUILD MANY SHIPS.
Japs Will Have Large Fleet of Auxiliary Cruisers.

New York, Aug. 24.—According to Kashiwa Shiba, one of the managers of the Mitsubishi dockyard at Nagasaki, Japan, the Japanese government is making earnest efforts to increase its fleet of auxiliary cruisers.

Mr. Shiba, who arrived at the Hotel Astor tonight, declared that while the Japanese navy is highly efficient, there is need of a fleet of steamships which could, in time of war, be converted into cruisers.

"Our dockyard," said he, "is working at its fullest capacity. We are at present turning out three 14,000 ton steamships, which will do 21 knots, and which will ply between San Francisco and Hongkong via Japan. The boats will use oil for fuel. In addition to these boats, we are building four large steamships, which will run from Japan to England via the Suez canal. All these vessels will be at the service of Japan in case of war. Our dockyard, of course, is not the only one that is active in producing this big order for auxiliaries. The dockyards at Kobe and other places are all running at their full capacity."

Strikers Cry Conspiracy.
Montreal, Aug. 24.—A formal statement issued today by Bell Hardy, chairman of the federated trades of the Canadian Pacific railway system, charges that the strike of the past three weeks, in which 8,000 workmen have been engaged, is due to a conspiracy on the part of some of the officials of the company to disrupt the unions and drive the union men from the company's employ.

This conspiracy, Hardy alleges, had its inception in conferences held by the railway superintendents and master mechanics early in the present year.

Defeat for Abd El Aziz.
Paris, Aug. 24.—The government's advice received tonight confirm the report from Tangier that the forces of Abd El Aziz, the recognized sultan of Morocco, has been defeated by Mulai Hafid, the usurping sultan. The advice state that Abd El Aziz, who is now in full retreat in the direction of Tadia, with the remnant of his forces, is being hotly pressed by local tribes. Several caids were killed in the engagement and others were captured. No further details have been received here.

Derelict in Mid-Pacific.
Honolulu, Aug. 24.—The steamship Asia which arrived here today from Hongkong and Yokohama, encountered a derelict schooner in latitude 33° 56' north, longitude 163° 25' east. It is thought that the dismantled vessel was the Japanese schooner Kinomoto Maru. The Asia carries a cargo of silk valued at two and one half million dollars, and is landed at San Francisco. The steamer Aorangi en route from Vancouver to Australia arrived here today.

Cloudbursts in Colorado.
Pueblo, Colo., Aug. 24.—Cloudbursts in the vicinity of Florence tonight transformed Oak, Chandler and Sand creeks into raging torrents, which are sweeping through Florence and vicinity leaving ruin in their wake. The damage is expected to aggregate \$150,000. The Florence Fuel company alone has been damaged to the extent of \$2,000. Water covered the Santa Fe tracks to a depth of several feet, and the Rio Grande's are in danger.

Meteor Falls in Kansas.
Salina, Kan., Aug. 24.—A large meteor fell three miles north of Ellsworth last night, lighting up the country for miles around, and burning brightly 20 minutes after it struck the ground. The meteor exploded when it struck the ground, and shook the town of Ellsworth.

LONE BANDIT ROBS TOURISTS

Secures Over \$2,000 in Coin from 125 Yellowstone Travelers.

Stops Eleven Coaches Inside Park Boundary—Watches and Jewelry Also Given Up by Unarmed Passengers—Drivers Not Molested—Soldiers Pursue Outlaw.

Lake Hotel, Yellowstone Park, Wyo., Aug. 25.—The greatest stage hold-up in the West in many years, at least in the number of coaches held up, occurred yesterday within the boundaries of the Yellowstone park. The work was done by a lone highwayman, and the passengers were absolutely helpless in his hands, as no guns are permitted in the park to either drivers or tourists.

In all, it is estimated from the statement of passengers, that something like \$2,000 in cash was obtained, drafts worth \$10,000, other papers and transportation, besides a rich haul in watches and jewelry.

In all, 21 coaches left the Upper Geysers basin in the morning. The highwayman was encountered about five miles further on at a lonely spot along the banks of Spring creek, a tributary of the Fire Hole river. The creek is lined with bushes. The first lot of coaches, numbering seven, and following each other closely, passed by the place unharmed. There was a gap between them, and the next lot of eight following.

After the first of the eight came along the highwayman stepped from the bushes and ordered the driver to halt. He did not molest the driver, nor any of the drivers following.

These eight coaches had barely gone on when three more came along, and these were robbed in a like manner. In all about 125 people were held up, though not all of these suffered loss. When the robber ordered the drivers to move on, he stood a few minutes with his gun pointed toward them, and then walked down the road.

As quickly as possible after a telephone was reached at Thumb Station word was sent to the soldiers and a detail started in pursuit of the man who is described as about 5 feet 8 inches tall, with bluish-grey eyes, and bristly grey whiskers. He acted like a man short of breath or a consumptive.

GUN SILENCER IS TESTED.
Maxim's Latest Invention Gives Astonishing Results in Practice.

Springfield, Mass., Aug. 25.—The official test of Hiram P. Maxim's gun silencer was made by officers stationed at the United States armory here today. The test, it is said, proved the truth of the claims of the inventor. The device was attached to a regulation army rifle. The test was made at regular intervals, relays of signals being stationed at intervals. It was found that while the discharge of the unquipped rifle is audible 7,700 yards, with the silencer this distance was cut down to 1,500 yards. Further tests were made to determine whether the silencer interfered with the velocity of the bullet and it was found that this interference was slight, reducing the velocity not more than 5 or 6 per cent.

INDIGNANT AT CASTRO'S ORDER
Citizens of Parian Ports Resent Embargo on Travel.

Port of Spain, Aug. 25.—News has been received here that President Castro has instructed the collectors of customs in Venezuelan ports not to clear any passengers for the West Indian islands. The Venezuelan consul here has been instructed to withhold passports from persons desirous of taking passage on the steamers to Venezuela. This action on the part of the Venezuelan government has caused great indignation and is a serious blow to the inhabitants of the Parian ports and Ciudad Bolivar, and will add considerably to the misery already existing there.

Bandits Burn Two Towns.
Aberdeen, S. D., Aug. 25.—It is reported here today that the towns of Lowry and Ataska, on the Minneapolis & St. Louis railroad's river extension, were burned in a raid by a mysterious company of mounted men last night. The mounted company completely surrounded the two towns and fired every building. The reason for the raids is not known here. Colonel Holmes, president of the Dakota National bank, who is president of the Lowry bank, confirms the report that his bank was burned.

Preparations for T.-M. Congress.
San Francisco, Aug. 25.—Arthur F. Francis, of Cripple Creek, Colo., permanent secretary of the Trans-Mississippi congress, which is to convene here from October 6 to October 10, established headquarters in the board of trade rooms in the Ferry building today. Secretary Francis has come to make arrangements for the great congress, which will be attended by delegates from every state and territory west of the Mississippi river. It is expected that at least 1,000 delegates will attend from outside states.

Million for Balloon Plans.
Geneva, Switzerland, Aug. 25.—It was learned today that Count Zeppelin was again visited two days ago by agents of the mysterious American syndicate which offered \$4,000,000 for the airship recently lost at Echterdingen. The Americans are now trying to secure possession of the new balloon under construction by Zeppelin, to be known as No. 5. It is said that they have even gone so far as to offer \$1,000,000 for the plan.

Old Virginia Is Shaken.
Richmond, Va., Aug. 25.—There were several severe earth tremors felt in Powhatan, Amelia and Chesterfield counties last night and this morning. No one was hurt and no property damaged.

FRUITS AND VEGETABLES.

New Canning Process Preserves Natural Color and Flavor.

Prepared by James Dryden, Oregon Agricultural College, Corvallis.

Certain fruits and vegetables may be preserved in such a way that they will retain indefinitely their original flavor, color and structure. This is in the nature of a discovery, made by Prof. F. F. Pernot, of the Oregon Agricultural college. A report of Prof. Pernot's investigations is given in Bulletin No. 87 of the Experiment station, Corvallis, and for the benefit of the housekeeper who is wrestling with the canning problem we give the salient points of the bulletin.

Successful canning is a question of sterilizing. If a can of fruit spoils it means that it was not properly sterilized to start with, or there was a leakage in the can. Spoiling of the fruit is due to germs which were in the fruit when it was canned or entered the can later. Sterilization kills the germs, and the fruit may be sterilized by cooking or heating. We quote the following paragraph from the bulletin:

"Micro-organisms, not unlike all other plants, possess the power of self-preservation and of perpetuating their kind; one is by means of producing spores, or seeds, which are very resistant; while the other do not produce spores, but have a resisting power nearly equal to that of spores."

Heating the fruit to 160 degrees for ten minutes will kill the germs without injuring the good qualities of the fruit, but the spores, which are "unincubated" germs will not be injured at that temperature and will become "germs" in another day, when the heat should again be applied. A few spores may escape the second heating, making a third steaming necessary.

How It Should Be Done.
First—Clean the fruit jars or cans by means of a brush, using hot water to which washing powder has been added. After washing thoroughly steam the jars to remove any dirt that may remain.

Second—After washing the vegetables or fruit place them in jars, completely filling them. Then add water to fill the interstices, and put on lid. Don't screw it on tight or the jar will burst when heat is applied.

Third—Procure a wooden steaming chest, the wash boiler will do, and put some water in the bottom of it. Put slats in the bottom on which to set the jars.

Fourth—To get the proper temperature, put a thermometer in the center of an extra jar of fruit or water and steam the fruit at a temperature of 160 degrees for ten minutes. Do not let temperature get above 165. Then remove jars and screw lids on tight immediately. Repeat the steaming a second and a third time at intervals of 24 to 48 hours. The jars are then sterilized. Cans may be used instead of jars. If the latter are used the vent in the top of the can will have to be soldered after the first steaming.

When using water should be used for filling the jars, or a syrup may be used instead of water. Unsterilized water or syrup may contain ten million germs in a quart jar, and it is just as well to "nip them in the bud" by sterilizing the water. It is important that the fruit or vegetables be neither under-ripe nor over-ripe. The same good judgment should be used in selecting material for the table should be exercised in the matter of canning.

It was found in the tests made at the experiment station that a temperature of 165 degrees was sufficient to sterilize the fruit when treated as above, and this temperature did not impair the flavor or structure of the fruit. Where only one heating is given, as is the case at the canneries, it is necessary to heat the fruit as high as 240 degrees in order to kill both spores and germs.

It should be stated that this method of canning was not successful with sweet peas and corn, as they have a germ normally that is not killed at a temperature of 165. This method would probably not be practicable at canneries, where fruit is sold at low prices, owing to the additional expense of treating the cans three times; but for first class high priced goods the additional expense would be warranted. In the case of home canning, however, it is a more desirable method of putting up fruit and vegetables than the methods usually in vogue.

A farmer residing near Almira, Washington, inquires concerning the milk weed pest which is infesting that locality. Professor R. Kent Beattie, of the department of botany, answered as follows:

"The perennial milk weed, which I believe you have, is very difficult to destroy. The only principal upon which you can work is to keep the top of it closely cut down, so that the plant cannot make food, until you have starved out the roots. This, of course, is a difficult task, especially if they cover a large field. I would put the patches into clean cultivation, either as garden, or potato plots; then it would pay you to work very hard to exterminate these weeds, for they are difficult to kill once they take possession of the land."—From the Washington State College, Pullman.

Machine for Shuffling Cards.
A machine which automatically shuffles a pack of cards in an instant with the cards concealed from sight and which changes the position of nine out of every ten cards is the latest mechanical device for cardplayers. It not only protects the cards from injury but gives an absolute square deal shuffle. The machine weighs four pounds and attaches in a moment to any table. It is about twelve inches high.

A Gray-haired Child.
To have all his hair turn gray at the early age of 6 years, with no apparent cause, has been the lot of the young son of John Ertwine of 11th street, Bloomsburg.

About a year ago the parents noticed that the boy's hair, which was dark, was beginning to turn gray in several places. At first they pulled out the gray hairs, but these increased so rapidly that at present it would be necessary to keep the boy's head shaved to keep the gray hair from showing. Philadelphia Record.

FACTS IN TABLOID FORM.

The Simpson tunnel still holds the record for length.

The Salvation Army is operating in fifty-four countries and colonies.

No fewer than fifty-two memorial stones were laid at the foundation of a new primitive Methodist church at Southborpe, England.

At the last Chamoux meeting a Norwegian on skis made a jump of twenty-six meters. It was magnificently done, and he alighted upon his skis without injury. This is a distance of nearly eighty-six feet.

Miss Elizabeth M. Kilbourne, of Winston, Conn., claims to be the first woman who ever took a stitch on the sewing machine. She was formerly a teacher in Hartford, where she visited Elias Howe's shop and got a chance to try his new invention.

The Belgians have a breed of fowls the feet of which they have shortened in order to lessen their powers of doing damage by scratching in gardens. They have another variety which have been denuded of tail feathers, that they may have a better chance of escaping from foxes.

Waycross, Ga., with a population of 9,000, has no poorhouse, nine out of ten of the white population own their homes and 93 per cent of the children attend school. Incidentally it may be stated that the saloon license has annually for the last sixteen years been fixed at \$30,000—and no one has offered to pay the amount for the saloon privilege.

When was the first operation for appendicitis performed? Appendix abscesses have been opened many centuries ago. Hancock in 1818 incised an appendix abscess before fluctuation could be felt; Kronlein in 1884 removed a perforated appendix, but the patient died; Morton in 1887 had the first successful case of appendectomy.—American Medicine.

"The American Hebrew" has this to say about one Samuel Findowitz, who brought his eighty-year-old father from Europe in the steerage, while he came as a second cabin passenger on the same steamer: "It is hardly to be supposed that so despicable a person can be sensitive to public ridicule, yet, both for his own deserts and a horrible example, he should be held up to the contempt of the community."

While workmen were sawing through a block of Bath stone at Exeter they cut into a cavity in which was found a cluster of two or three dozen live bees. The incident occurred at the works of Messrs. Collard & Sons, monumental sculptors. There was not much sign of life in the bees at first, but when air was admitted they gradually revived and after a few hours several of them were able to fly.—Exeter (Eng.) Express.

The salt deposits of Chile are the greatest in the world. The Salar Grande mine in the province of Tarapaca, about sixty miles south and east of Iquique, covers an area of 80,000 acres to the depth of twenty-five feet. This body of salt is nearly pure and contains more than 14,000,000 tons, or enough to supply the world's demand for many decades. There are several other deposits in the interior that cover two or three times the area of the above.

The honey guide belongs to Africa. When it desires to feed upon some comb which it has discovered it makes its way to a human being, flutters about restlessly, and hops from bush to bush and from one anthill to another until it succeeds in attracting the man's attention. During this time it utters a shrill cry of "Cherr, cherr!" The native who understands its habits follows it. The honey guide now goes ahead, always watching to see that the man is following. At length the honey nest is reached. While the native attacks the nest with the comb the bird still flutters about, chirping. When the man departs the honey guide descends from its perch and helps itself.

Land leeches are plentiful in Ceylon. These bloodsuckers hang on bushes and trees and lurk in the grass. They work their way through the thread of stockings and underwear. The average size before feeding is only about half an inch long and no thicker than a hair—almost invisible. After feeding they are as fat as a finger. The only way to get them off one's body without breaking them and leaving their heads inside is to squeeze a few drops of lemon on them. Then they fall to the ground. The Ceylonese will stop every two or three minutes, take out a lemon and anoint carefully the half dozen leeches stuck in a black mass to the calf of his leg. Some Ceylon leeches are three inches long.

After sixty years of doing without a complete Young Men's Christian Association building, London, the birthplace of the movement, is to have what it needs in this particular. The new headquarters in Tottenham Court road will be a stately pile of buildings designed by Rowland Plumbe. Hundreds of buses pass the site every hour, and it is also connected with London's vast network of trams and tubes. The British Museum is only a few minutes' walk away and the building will be almost in the heart of the Bloomsbury district, familiar to all visitors to the metropolis. The building will cost \$750,000. Only a little over half the amount is now available, but a widespread appeal is being made for the remainder.

Willie's Wisdom.
Teacher—Willie, why don't you keep your hair combed? Willie—Cause I ain't got no comb. Teacher—Why don't you ask your mamma to buy you one? Willie—Cause then I'd have ter keep my hair combed.—Judge.

Better Left Unsaved.
Parke—Tell me, old chap, honest, now, do you permit your wife to control you? Lane—To be honest with you, that's a question I have never faced myself.—Syracuse Post-Standard.

Good Enough for Him.

City Niece—Why, uncle, I'm surprised to see you wearing such a ratty looking hat when you come to town.

Uncle Reuben—It's th' hat I alters wear tew home.

City Niece—Yes, but that's different. Everybody 's wears you there.

Uncle Reuben—Wall, nobody don't know me here, so I ain't worryin', by grass!

Turning a Tight Screw.
Any one who has attempted to remove a very tight screw knows what a very difficult business it is. After straining and twisting for a considerable time the operator frequently ends by losing his temper and destroying the bite of the screw, which remains fixed as tightly as ever.

With the aid of a pair of pliers, however, the affair is quite a simple one. Place the screwdriver in position and then catch hold of the blade with the pliers just above the head of the screw. Press the screwdriver firmly and at the same time twist round the blade with the pliers. The tightest screw will yield immediately to this sort of persuasion.

What a Poultry Man Says About 20-Mule Team Borax.
As I am in the poultry business, I had ten white chicks to wash and prepare for a show. I used "20-Mule Team" Soap for washing the birds, and I can say from years of experience washing white birds, never before have I found a soap or Borax that cleaned my birds so fine and easy. I had a great deal of comment on my birds being so white. J. A. Dinwiddie, Newmarket, Tenn.

Kind Deed.
At a meeting of a Band of Mercy class in a small town near Denver each child relates the kind deed he or she has recently done. One day the teacher asked little Emily to relate the kind deed she had done. She quickly rose and said:

"I took off a tin can tied to a little dog's tail."
The teacher asked, "Did you know who tied it on?"

"Yes," replied Emily, with hesitation. "I didn't know any kind deed to report, so I tied it on so that I could take it off."—Philadelphia Ledger.

State Lights on Poesy.
Scott was writing the "Lady of the Lake."

"If you were to tell the truth about her," he said, "I should say that she is awfully seasick, but expects to feel better when the boat gets to St. Joe."
Thus it is, in all ages, that the poet has to sink the Real in the Ideal.—Chicago Tribune.

A Retort Discourteous.
A young lady full of good deeds noticed the tongue of a horse bleeding and with a use of technical terms too little appreciated said to the cabby, "Cabby, your horse has hemorrhage."

"It's his tongue's too large for his mouth," said the cabby and added sentimentally, "Like some young ladies."—London Globe.

Howard E. Burton—Assayer at Chamberlain's Cough Remedy. Chamberlain's Cough Remedy is the best remedy for all kinds of coughs, colds, croup, whooping cough, and all other lung troubles. It is sold by all druggists.

CHERRY PECTORAL.

Know Him.
"William," said the head of the firm, looking at his watch, "I have business out of town this afternoon, and may be detained several hours. If anybody should call—"

"They ain't no ball game to-day, Mr. Spotsnash," interrupted the office boy.

"I said nothing about ball games, William," rejoined his employer, eying him sternly. "However, my business is such that it can wait until some other day. That will be all just now, William."

Still Had Them.
The woman of the house eyed him suspiciously.

"You've been here before
