## A Fine Residence For Sale

Mr. Ed. Scott finds that he has a larger house than is necessary for the accommodation of his small family and has determined to place the same on the market.

The house is a two story building containing seven rooms. All are nicely papered and painted throughout. Water in the building. This property makes a very desirable home, as it is substantially built and painted, and was originally built as a home by Mr. Surface. Mr. Scott purchasing it later and making additional improvements. The choice of either two or four lots is given the purchaser.

## Prosperous Farmers

It was while on an errand last week in the vicinity of the Stubbe ranch that we stopped at the house to make inquiry and was greeted by Mrs. Stubbe, who invited us to have some apples to eat, which we sampled and found to be very appetizing. The Stubbe family are pioneers in this section. Coming as they did in an early day and by close application to their work as ranchers, show what can be done in time by that energy necessary to success in any undertaking. Here you find a good, thrifty orchard and the fruit being well taken care of and marketed. Mrs. Stubbe had several boxes of apples ready for delivery. Garden truck of all kinds is also raised by them and sold to a good advantage. Good crops are raised on the place. Two large barns are erected on the ranch. They have also just recently asked builders and contractors to give plans and cost of a new house which they expect to erect at once. In other words they have been successful as any one can readily see if they will take the trouble to look over their ranch.

## The Store of Quality

Quality and Price

Are the two factors a buyer should consider. Almost any kind of a price can be made on goods if Quality isn't taken into account. We want to emphasize the fact. We do not at any time buy poor goods in order to make an apparently low price on them. All our goods are the regular standard grades which bring satisfactory results to the consumer.
