How do you do "Governor Dimick, would sound all right in Eastern Clackama?

The Estacada School District No. 108 has made application to the Made of best sulphur and lime District Boundary Board for a new North-line boundary. "If the distaict traveled and accessibility to sel ool privileges are reasons for changing the lines we can see no reason why the change should be questioned. It seems an arbitrary matter to compel children on the Zibrist, Bullard, Wade and Harkevider ranches to go to Currius ville to school when the Estacada thool is so much nearer and convenient and one of the reasonable p epositions is the fact that the II rkenrider family on the Wade ranch has attended the Estacada

If it is a question with the Boundar Board to equalize strong and weak districts a question might arise, would not a county high reapol tax obviate these questions batter and more equitable? Where distance and convenience is the question then, as we have before said, we do not see how the claims of the petitioners can be controverted. In order that a line already established might better serve the gener I good of the districts in question and save dividing certain p operties and making them parts o' two districts, the North line of the W. D. L. Claim has been selected. This arrangement places a s na'l part of the Shankland ranch about one hundred and fifty yards nearer Currinsville school house than the Estacada, but the valoation of that particular portion would be small if an exact distance were established and would result in greater complications from other sources. It is said the lines asked for at this time should have been the lines at the time the district differences existing between the old our ancestors for all our faults state my reasons for not accepting and on seeing the plight of the new ton, wash, who have been visitand new district at that time these concessions were made.
