PORTERS OUTWIT HARRIMAN

Buy Land and Block Road Leading to Construction Camp.

Grass Valley, Ore., July 27.-Porter Bros. opened a war of strategy on Har-riman's railroad construction forces today by cutting off the base of supplies for Twohy Bros.' camps at Horse Shoe bend, in the canyon of the Deschutes. This was accomplished by Porter Bros. by the acquisition of the homestead of Fred Gurtz, across which runs the only road that leads to the brink of the canyon anywhere near the vicinity of Horse Shoe bend.

It is said that Porter Bros. paid \$30,000 for the land by which they have shut off entrance to the canyon to Twohy Bros.

At Horse Shoe bend Twohy Bros. have begun to establish the biggest camp along the construction route, but to get there with the trainload of supplies now here the Harriman constractors will have to cross Porter Bros.' land, and Porter Bros. have put up signs warning trespassers off the prop-erty. The Gurtz homestead is enclosed by a barbed wire fence and a wire gate across the road at one boundary line and a wooden gate at the other.

COLONIST RATES AGAIN.

Railroads to Give Reduced Fares to Pacific Coast This Fall.

Chicago, July 27.-Colonists' fares to the Pacific coast which have been under consideration at the rate meeting of the Transcontinental Passenger as sociation for several days, will be made this fall at the same rates as heretofore, \$33 from Chicago, \$32 from St. Louis and \$25 from the Missouri river to California and North Pacific states. Their availability will be reduced, however, from the usual 60 days to a month, from September 15 to October This was decided upon because the

heaviest movement has been found during the first and last ten days of that period. About 25,000 people are expected to take advantage of the rates, which are for single trips.

Carving Away Sloop Gioa.

San Francisco, July 27.-Fearing that relic hunters will carry away piecemeal the sloop Gjoa, in which police department has set a guard over the sloop and will try to punish some of those whose initials cover the vesbe a museum for things nautical. Relic hunters have carved away at the timbers until the worth of the vessel as a historic relic is impaired.

drawn from the jury box today was made returnable Wednesday, when it is expected the present venire will be exhausted. The examination of talesmen proceeded quietly, notwithstanding several jurors had decided opinions re-

New Island in Pacific.

San Francisco, July 27 .- A new island has sprung up in the Pacific ocean not far to the southeast of the Society and Gambier groups, according to Cap- of being the organizer of the dynatain Quatrevaux, of the French ship Th'ers, which arrived from Newcastle, III. Australia, yesterday. The island is but a few hundred yards in circumfer-ence, and appears to be of volcanic origin. The uncharted rock is described in the log of the Thiers as of and uninviting appearance.

Tornado Wipes Out Town. Winnipeg, July 27.—The village of Mecklin, located on the Saskatoon and West Askiwin branch of the Canadian Pacific railway in Saskatchewan, was wiped out by a tornado yesterday afternoon. No one was seriously hurt.

4, 30 miles east of nere tonight. The right after they are milked, then keep train fell into the Missouri river, where them off the rye until the next milk the track had been weakened by a land. Even this precaution may leave a slight taint in the milk and appear in the cream and butter.—Denver plunged nito the water and were completely submerged.

NORTHWEST APPLES BEST.

Bring Higher Price Than Those Fron

Any Other State. Consul General Robert P. Skinner writing from Hamburg, Germany, de-tails facts relating to the apple industry of this country as reflected in the prices received there, and shows that Oregon and Washington apples bring more than those from any other states the scale being in comparison with the California product as follows:

Per 1-bushel case didate for President Attend Diaz Oregon, Washington \$2.61@3.57

California 1.60@2.61

As to the possibilities of the exten sion of the apple trade with Germany, the report shows that in 1908 Germany imported 164,421 tons of apples, of which the United States supplied only 10,502 tons; in 1907 Germany importnding 9,229 tons.

Germany enforces rigidly inspection for the San Jose scale, and this pest has been found on a number of ship up a mass meeting in Delgado theater ments from the Pacific coast. Mr. Skinner says, however, that as a rule President Diaz. The orators were American apples reach Germany in stoned in streetcars, carriages and augood condition. He urges that care be exercised by all apple shippers to free Mobs paraded the streets crying: their orchards from scale and all other "Down with Diaz!" "We want pests, and then exercise constant supertheir orchards from scale and all other Reyes!" A barricade was erected and vision of their employes to insure that many shots were exchanged. Eight the fruit shall be packed so as to make it pleasing to the eye as well as protect it against bruising while being trans-

volleys were fired in the air without ing port. There, writes the consul, effect. Considerable American property was observed and the seller always receives destroyed and two Americans were what is his due, the market regulations by the mob, was leased by an Ameri- crooked work or unjust rejection of

German fruit buyers have for years The riot is the most serious that has been sending their representatives to occurred in Mexico in years, and is America to look over orchards and looked upon as significant by those who have been closely following the political situation. The officials say it was planned and carried out by the Demo- quantities of fruit are produced. These cratic party, known as the Reyesta agents often go without making known party, from the name of the candidate their identity, and thus obtain inforfor vice president, General Bernardo mation which might otherwise be harder to secure.

The report of Consul General Skinner agrees with previous reports which have been sent to the government from abroad—that Pacific coast apples now lead this country in all European marts. It likewise emphasizes the necessity of maintaining the present high standard, in order that the high prices now obtained may be maintained and the apple industry reap the large profit which has been made in the past years.

CROP A RECORD BREAKER.

Prospects in Pacific Northwest Never Better Than Now.

during the past week the Pacific Northwest will produce almost four times as many cars of potatoes as a

year ago. increase is startling, even This though the comparison with the production of a year ago is not exactly a correct showing, for the 1908 crop was just about half of what was produced

the previous season. During the present season the acreage of potatoes in the Pacific Northwest, but more especially in Oregon, shows the greatest increase for one year ever noted here. While a large per cent of this increase was in the Willamette valley, most of the additional acreage was planted in Eastern

Eastern Washington and Idaho like wise have a very heavy potato acreage increase and the production there will be much greater than during any previous year. Western Washington had a greater acreage of potatoes than a year ago, but the difference in favor of this season is not great so far as the and fasten a short board between the additional planting is concerned.

Potato crop prospects could scarcely be improved over what they are in Oregon, Washington and Idaho this season, and the same is stated to be the case in California. In Eastern Oregon, where some of the poorest showings were made in grain produc tion this season, the crop of potatoe ever looked better.

In the Willamette valley, potatoe will show better quality this year than ever before and the sizes will be just that which gained for this section the reputation of growing the very best potatoes in the entire United States. In seasons previous to the presen

one, the potato acreage and production Raoul Amundsen sailed through the Northwest passage, the San Francisco Idaho had little, if anything, to do with prices at Portland or San Francisco, but this season each of these sections will be a strong factor in the sel's sides. The ship is beached at Golden Gate park and was intended to will reach a lower figure than for some like micro-organism of bitter torula is seasons.

Potato prices have been so high along the Pacific coast in recent years that the trade can scarcely come to think that lower prices will again be in effect. With such a heavy increase San Francisco, July 27.-The sixth in acreage and a production so much veire of talesmen for the second trial greater per acre than normal, the sup-of Patrick Calhoudn was ordered today plies will be fully as great as any deby Judge Lawlor, which brings the total number of talesmen called up to 610 names. If this be case for June, there will be no neces- done there will be but little danger of the best results the salt should be very finely ground.

Have Scales at Home.

The weights and measures law has gone into effect. After this, if nuch, you are entitled to get it or the manufacturer or producer can be fined for the short weights. If the weight is below what the package says, the only way it can be legally sold is for the dealer to tell you the weight This will hit all short-weight packages and "commercial weights" of every nature.

Everyone should have scales at The man who handles much grain or stock should have five-ton scales. He is quite apt to secure better weights from some stock buyers if they know he has scales at home. To know what the stock that is being full fed is doing is also one of the great advantages of having scales on the farm. Small scales in the house will also help to enforce the law of weights and measures. Flour, meal, sugar, in fact, everything, must "weigh out" or the one responsible for the short weight is liable to a fine. See that the law is enforced, now we have it.-Farmers' Breeze.

Buttermilk for Sheen Ticks. It is claimed that by pouring butternilk freely along the backs of sheep it will prove a remedy for ticks. If a gill of kerosene is added to a gallon of buttermilk the remedy will be improved, as the kerosene forms an emulsion with buttermilk and does no have no difficulty in using this, but trial by way of experiment. It is also horse it will serve better than any other remedy for bots. These remedies were suggested by parties who have tested them

Sore Shoulders on Horses. The hide and flesh of a young horse work horse. provement.

UNCLE SAM'S BUSINESS.

ts Management Would Mean Bank-

ruptcy to Private Concern.

The government of the United tates has been conducted for more than a hundred years on financial principles which would have bank rupted a private corporation in a few nonths, says a writer in Leslie's Weekly. There has been no public of ficial directly responsible for adjustng expenditures to receipts or having any control over the estimates of diferent departments.

There is probably no other civilized government on earth-certainly no government which is truly representative-where there has been such a complete lack of supervision over the budget as in the United States. In Great Britain the function is imposed upon the chancellor of the exchequer of cutting his pattern to his cloth by comparing necessary expenditures with estimated receipts and finding means to meet a deficit if one appears. In the countries of continental Europe, even under such an absolute govern ment as that of Russia, the duty has devolved upon the minister of finance of supervising and regulating expenditures. It is high testimony to the character of the men who have had control of federal affairs in this country that this lack of co-ordination and esponsibility has not led to montrous abuses

Putting the government financial operations on the basis of corporation finance, it might be said that our treasury was conducted upon the priniple that when income did not equal outgo there should be an assessment upon the shareholders. Practically, of ourse, nearly all the business of the government is conducted upon this principle. In this country only the ostoffice, with some fag-ends of public-land sales and other minor matters, is conducted with the expectation of income. Even the postoffice runs up a deficit of nearly \$13,000,000 a year without causing comment. Whatever our views may be as to

any of these projects, it will be adnitted that we should put our financial house in order. The importance of this, it would seem, should be recognized by the most enthusiastic advocate of state socialism as keenly as by his more conservative brother. There is a certain force in the suggestions of Mr. Harriman on this point-that the government needs regulation in these matters as well as the corporation. A system which in a big railway left every head of a department to get what allowances he could, without reference to what his associates were doing or to the net minate in a receivership. Yet this is practically the method upon which the government of the United States has been operated up to within a few months

These unusual conditions, accompanied as they have been, by a steady growth in expenditures, were first rought prominently before the public by George B. Cortelyou when he was secretary of the treasury.

ANGLO-SAXON BLUNTNESS.

How the Tourist Abroad Often Makes Himself Objectionable. All of us who travel, whether we nean to or not, will furnish forth impressions of Americans for foreigners, and the opinions of Frenchmen and Germans and Italians and Britons concerning us as a nation will be markedly modified because of our go-

ng hither and thither in Europe, says Charles Battell Loomis in Smith's. "Some of us, with perfectly good intentions, will go abroad with that old-fashioned spirit of spread-eagleism that dies so hard-in our breasts. We shall feel more and more patriotic the farther away from home we find ourselves, and with a laudable desire to let benighted foreigners-to some of us all foreigners are benighted-see what a glorious country we hail from; we shall wave American flags in their faces, and let them know at all times and in all places how very superior an American is to every other speci

men of humanity. "We shall not be the only country to send forth patriotic zealots. There will be Germans bent on proving that if it were not for Germany there would be no such thing as civilization upon the earth, and there will be Englishmen making themselves just as obnoxharm to the animal. The remedy will lous to the natives as we can possibly in Fig. 2. Women and children will cost but little and should be given a make ourselves. The French do not travel as much, and they do not feel might find it inconvenient to get over claimed that if buttermilk is given a it necessary to blazon forth a patent fact. French courtesy, also, prevents a Frenchman from telling you that you are inferior to him, however much he may think so; but the Anglo-Saxon race glories in its bluntness and its love of truth, and that is why Germany and England and America furare more tender than those of an old nish some of the most objectionable travelers known to Cook."

THE HUMAN HAND.

Its Relation to the True Education of the Young. No animal or bird can endure the ex-

remes of climate like man or is at home in so many different parts of food and shelter are provided. Nor can any other creature subsist on such a variety of food as man can digest. He flourishes on roots, herbs, grubs, insects, fruits or fish, on which flesh-eating animals would starve, or he is equally pleased with animal and bird roots of a plant which has in the flesh on which herbivorous animals would starve. He can pick nuts with the monkey, catch fish with the otter. dig roots with the wild pig, eat ants' eggs with the ant eater and grasshoppers with the snake.

And all this is due to man's hand. Before going down into a well test Because his hand could grasp a stone

tions that the brain, which the hand

builds, will ask, and you have true education-education at its best. Give children every kind of hand work that their play instincts call for-and their play instincts are the deepest and most useful in their nature-and then brain ievelopment will follow as naturally as the night follows day.—San Francisco Chronicle.

JAPS CHANGED CONDITIONS.

Coreans Were Taxed and Squeeze

Unmercifully by Nobility. The people of Corea are among the queerest and most interesting of the Asiatic races, and have great possibilities, writes Frank G. Carpenter. As to their number, a census was taken some time ago and the count made 10,000,000. They have been so squeezed and ground down by taxation, how ever, that they will not give out the full number of souls in each house, and the probability is that there are many more than were counted. A fair estimate, I am told, would be 14,000. Most of these people live in villages.

The farmhouses are squalld huts of mud and stone with roofs of straw thatch tied on with strings, and are collected together in little villages. There are no trees or gardens about them. Every home is surrounded by a mud wall high enough to keep the men on the streets from looking in at the girls. The streets are winding where the garbage of the alleys, houses is thrown out to rot in the sur Sometimes ditches run along the sides entery are of frequent appearance and smallpox is almost universal. Nearly every other face one sees is more or less pock-marked, and parents do not count their children as permanent possibilities until after they have had that disease.

There are no very large cities. Seou has now perhaps a quarter of a million, although the census gave it only about 200,000. Pingyang has 60,000, Taiku 50,000, and after that come Chemulpo, Fusan, Gensan and Songdo, The people are divided into classes, and, formerly, the Emperor and the nobility owned most of the lands and held all the offices. They have been the curse of the country and have squeezed the others unmercifully. The nobility until now have gone about dressed in silks and fine grass cloths. They have had coolies with them to hold up their arms as they walked, and if they rode, a servant would go along on each side of the horse to see that they did not fall from the saddle

These people did absolutely no work, and considered it a disgrace to carry a bundle. The boys who went to the modern school, established by the Emperor, took servants along with them to carry their pencils and paper, and some tramped to the school building through the rain, because they would not endure the disgrace of carrying an umbrella. This sentiment prevails somewhat to-day, although it is fast disappearing. By the coming in of the Japanese the most of the nobility have lost their fat incomes and the farmers and common people are now

to have a better show.

According to the Chinese method o criminal prosecution, a man is responsible for the crime he may have com mitted personally, but if he chooses to escape justice by running away from the place where the deed was committed, then the remaining members of his immediate family are held and punished in lieu of the real culprit. This may seem a strange way of at tracting the real criminal back to th scene of his crime, but it appeals to the religious side of the man's super stitious nature. According to their religion, the man who forsakes his parents when in peril will find his soul sailing around through hades without chart or compass for all eternity. In view of this, prompt compliance with the law is very prompt, for John Chinaman does not care to take the desperate chance.

He Got None. "What's a pun, father?"

"A pun, my son, is a play upor words. There are three kinds of puns -good ones, which you laugh at; in different ones, which you take no no tice of, and bad ones, which make you throw something at the punster."
