This grand old man of Oregon, who did so much for the early settlers of this state and made personal sacrifices to assist others, is at least to have public honor paid him for his work. September 3rd is the date of his death and on the following Sunday a memorial service in his honor will be held, and the old dwelling, where he lived for many years, dedicated as a memorial of his kindly life. The services promise to be largely attended.

PUTTING MONEY IN THE BANK

Would you take five twenty dollar bills from your trunk, roll them in a wad and drop it through the keyhole of a bank?

Would that be the way to deposit \$100.00?

No; as a sensible man you would enter during banking hours, make out a deposit slip, hand it with the money through the Cashier's window, and receive a proper credit in your pass book.

So, in paying out good money for real estate, the same business wisdom dictates that you require the simple formality of an abstract of title. It is the only safe way.

Don't poke your money in a rathole.

Has Stroke of Paralysis

S. R. Childs, who has been working as a carpenter in Portland, received a slight stroke of paralysis on Friday last.

He had finished his days work and with others had started to his boarding house when he discovered that he had forgotten something and returned alone to where he had been working. He had just prepared to leave again when he was suddenly seized with a dizziness, from which he fell in the street.

Men nearby who saw him fall supposed he was intoxicated. He could hear their remarks but was unable to speak or move, finally a passerby stopped and asked him what was the matter but he could not reply or move, although consciousness of what was going on.

Search was made for papers to identify him and a postal card addressed to himself at Estacada was secured and his wife here at once notified, who immediately had him removed to the Good Samaritan Hospital, and went to Portland where she remained with him until Monday when he was able to be brought home. Except for a dizziness in his head he feels all right and has recovered his speech and the use of his body.
