# PILES

"I have suffered with piles for thirty-six years. One year ago last April I be-gan taking Cascarets for constipation. In the course of a week I noticed the piles began to disappear and at the end of six weeks they did not trouble me at all. Cascarets have done wonders for me. I am entirely cured and feel like a new man." George Kryder, Napoleon, O.

### HITS SOUTHWEST begin on such a big thing? Extreme Conservatives. It is the habit of some people to ondemn everything they are mentally Hit Wave Strikes Down Hosts and insist upon calling it "conservatism" Kills Ten.

Kansas, Misseuri and Oklahoma in Stricken District-Corn Shriveled Up and Much Vegetation Killed-Official Records Give Temperature as High as 110.

WITHERING BLAST

Kansas City, Aug. 17.—Unusually intense heat, officially recorded by the government weather bureau as high as 110 degrees, caused at least ten deaths, numerous prostrations and much damage yesterday in Missouri, Kansas and Oklahoma. Throughout the Southwest the day was the most trying since the devastating drouth of 1901. As the withering winds swept across the plains much vegetation fell.

In this city the heat continued and prostrated a score, some of whom are in a dangerous condition. The Union depot was like an oven. Babies be-came seriously ill and medical attention was needed before their mothers could resume their journeys. The distress of a party of immigrants was great.

The likelihood of an ice famine added to the gravity of the situation here. Dealers reported that the factories were running night and day, but that the demand had exceeded the supply. Most of the dealers refused to deliver more than 25 pounds to any residence, and feared they would have to cut this quota down.

At Wellington, Kan., the official temperature was 106. Corn was suf-fering greatly in that district. The

#### QUAKE FELLS MOUNTAIN.

Thousands of Buildings Destroyed and Great Property Loss.

Tokio, Aug. 17.-Reports received today concerning the earthquake in Europe.
Central Japan Saturday, show there were many fatalities and great damage was done to property. The dead at present are said to number 30, though it is feared further fatalities will be reported from the outlying districts.

The number of persons injured is 82. Thus far 362 buildings, including many temples, are reported to have been de stroyed and more than 1,000 others badly damaged.

The town of Asaku, in Gifu, suffered terribly. The banks of the Hida river broke and the country is inundated. The people of the district fled to high ground and remained in the open all night. Intermittent shocks were felt throughout Saturday night and early Sunday morning.

The mountain Ibuki, a short distance vest of Gifu, collapsed with a thunderous roar.

Slight damage was done at Nagoya, to the southward of Gifu, and neighboring villages.

# CANADA CAN FEED BRITAIN.

Grain Crop of Dominion is Reported Greatest in History.

Winnipeg, Aug. 17.-From all points in Manitoba, Alberta, Saskatchewan and British Columbia the unanimity of opinion points to the anticipatory result of this year's harvest as being the greatest in the history of the Canadian West. In some places, such as South-ern Alberta, the phenomenal growth makes it hard for the people to conceive such prospects. Farmers are now busy gathering the hay crop, which is a heavy one. The grain har-vest will be general during the latter part of the present month.

The statement is made on good authority that the completed Grand Trunk Pacific railway from Winnipeg to Edmonton is tributary to wheat lands capable of feeding the whole people of in the world. The pipe line will run Great Britain and Ireland in case of more than 100 miles before it reaches need.

Plan Red Cross Annex.

London, Aug. 17.-Based on the German and Japanese models, the war office has issued proposals for a great voluntary Red Cross scheme in connec tion with the territorial army plan. It will be worked in connection with the existing Red Cross society and St. Johns Ambulance society and would provide the entire country with complete organizations. Men and women are to be trained in establishments in every territorial area as nurses, stretcher bearers and other branches of the Red Cross service.

Spanish Turn on Moors. Madrid, Aug. 17.-Fighting between the Moors and Spaniards was resumed tcday at Melilla. After a disastrous week for the forces under General Marina, during which the Moors have kept the garrison of 38,000 men closely hugging the walls of the city while farms and meeting with the most enthey poured shot into the fortifications couraging success in agriculture. from the mountainside, Marina moved aggressively against the tribesmen today. The long expected munitions ar-

Big Sperm Whale Taken. Victoria, Aug. 17.-The steamer steamer Waratah, now missing over Tees, which arrived from the west two weeks, may be saved. On board coast of Vancouver island this after-noon, brought news that a sperm of whom were women and children. A whale, the first taken since last year, few hours before the Waratah was due people believe him. was caught by the Kuyoquot whalers to reach this harbor a terrible gale last week, and 58 barrels of oil taken swept this coast, and it is believed the vessel foundered.

CANKER ATTACKS TREES.

Orchardists Find It Most Trouble some Pest in Northwest.

Black spot canker is one of the most troublesome fruit pests of the Northwest and one which fruit growers must understand and be able to recognize if they expect to make headway against it.

During the fall the spores or "seeds" are lodged on the apples, being distrib-uted by the wind or other agencies. Later, when the apples are stored in cellars where there is an abundance of moisture "sweating" occurs, a condition very favorable for the germination St. 1906, Sections 8965, 8992]). We

Black spot canker is responsible for the great part of fruit rotting that pany, a domestic corporation. A judg-occurs. The most effective treatment ment of ouster was rendered against s a thorough spraying with bordeaux mixture in November, when the spores pended on proof that the company had or seeds are floating in the orchard.

Because the fungus gives such slight corporations in maintaining a trust to evidence of its presence in the bark in the fall, and because so apparent in the spring, many orchardists make the mistake of attempting to combat it in the factory evidence of its compliance with spring after it has already gotten in the judgment, and its intention in the bark. Such treatment is ineffectual, however. The spore must be the other condemned corporations, and killed before it has germinated.

DEPOSIT TO BE MINED.

Nehalem "Beeswax" Has Been Found to Be Ozocerite.

That the product found in the sand at the mouth of the Nehalem river, pop-ularly believed to be beeswax from a wrecked Spanish galleon, is valuable substance known to chemistry as ozo-cerite, was the statement made by J. J. Walter, president of the Necarney City Hyrdocarbon Oil company, a cor-poration organized to exploit the product. For years visitors to that coast have picked up the wax-like lumps that have strewn the beach there. The general opinion has prevailed that it was beeswax brought from Manila for one of the Spanish settlements in California and that the ship was wrecked there. The discovery was made as early as 1813 by the Indians. there.

Kit Carson, the famous scout, now employed as an assayer by the government, visited the place and announced that the supposed beeswax was none other than ozcerite, a product of hydrocarbon oil, found only in South America and in small quantities in Northern

#### ALL NATIONS INVITED.

Official Call Is Issued for Fourth Dry

Farming Congress. Billings, Mont.-Secretary John T. Burns has issued the official call for the fourth annual session of the Dry Farming congress, to be held at Billings, Mont., October 26-27-28, 1909. The call is addressed to the president of the United States, the diplomatic reprecountries, governors of states, presidents of agricultural colleges, state boards of agriculture, national, state and county agricultural associations, or grange lodges, livestock associations, horticultural societies, county commissioners, mayors of cities, presi-dents of towns, all commercial bodies, railroad and immigration companies and members of the Dry Farming con-In addition to these the call is sent to about 30,000 individual farmers and others interested in agriculture in the West.

# Big Washington Project.

Kennewick-That preliminary plans have been made for a big irrigation corpus. project, which will water thousands of acres of sagebrush land in Grant county are under way, is the informa tion given out by J. M. Spencer of Plains, Mont. Mr. Spencer, who has large land interests in the Crab creek country, says that the farmers in that section have begun active preparations to place 550,000 acres under irrigation by means of a pipe line to be from the Columbia river to the Crab

creek valley in Grant county. It will cost \$5,000,000 to complete this gigantic undertaking, which will be one of the longest gravity systems the nearest land to be watered and the farthest point will be the Columbia river, on the northern boundary of Benton county.

Central Oregon Settling Up. Burns-Notwithstanding heavy im-migration and settlement the past few years, there are yet in Harney county over 3,000,000 acres of government land subject to entry, including timber, grazing, mineral and agricultural land, a greater area than the entire state of New Jersey, and two-thirds the area of the whole of Massachusetts. Up to a short time ago, this vast domain was devoted entirely to stock raising, immense herds of cattle, sheep and horses feeding over the illimitable ranges during the greater part of the

year, while large quantities of hay have been cut for their winter use. This has been changed. The past few seasons have brought hundreds of industrious settlers who are opening up

Rebel Documents Taken. San Antonio, Tex., Aug. 11.-Jose rived several days ago and in spite of the attempts of the Moors a number of French field guns have reached Marina.

## Legal Information

The Missouri Supreme Court in State ex inf. Hadley vs. Standard Oil Co., 116 Southwestern Reporter, 902-1062, convicts the Standard Oil Company, the Waters-Pierce Oil Company, and the Republic Oil Company of New York of violating the anti-trust laws of Missouri (Rev. St. 1899, c. 143 [Ann. can only refer to a single interesting point as to the Waters-Pierce Oil Comit, but the judgment was ordered suswould refrain from all such combinations, and that it would furnish satisgood faith to cease all connection with carry on its business in obedience to its charter and the law. In attempted compliance with the judgment, the diectors of the company adopted a resolution protesting that it had never knowingly violated any State law, but that it accepted the conditions of the decree, and expressed by such resolution its willingness to abide by the same. The court holds that this resolution was not only a failure to comply with the conditions offered, but ended to show that the company was not able or was not inclined to sever the trust relations and in fact comoly with the conditions of the decree The judgment of ouster, therefore, be came absolute and unconditional.

A group of Navajo Indians under he leadership of Bi-a-lil-le threatened erious trouble on the Navajo reservaion. On the representations of the Interior Department, the Secretary of War sent troops into the vicinity to serve as a repressing influence on em. The officer in command arrest d Bi-a-lil-le and some of his followers When the arrest was made, the troops were fired on by other Indians and the fire was returned. The Indians arrest- at 6 per cent." ed were confined at hard labor for an indefinite period, on condition that they could be released whenever it might be deemed wise to do so. In

x parte Bi-a-lil-le, 100 Pacific Reporter, 450, the Supreme Court of Arizona reviews the judgment of the lower court refusing their discharge on haeas corpus. As to the contention that hey were prisoners of war and lawfully held in military custody, the court maintains that confinement at hard abor is a characteristic of the punishment of criminals, and not under the sentatives of foreign nations, ministers code of modern civilized warfare an and secretaries of agriculture of all incident of the detention of prisoners of war. Such a sentence was clearly inconsistent with the theory that they land boards, state engineers, state were regarded as prisoners of war. It was further urged that the Indians were wards of the government, subject o administrative correction of their to administrative correction of their conduct, and that the disposition made of them was pursuant to a long-settled inflammation. A little rubbing with policy. As to this, the court say that, Hamlins Wizard Oil will stop it imnowever salutary in its results and desirable such a method of dealing with recalcitrant Indians may be, it cannot be sanctioned unless Congress has conferred the authority. No legthorizing such summary methods, and there'd be money in bidding for the islation was referred to expressly auit was concluded that the court was

NIAGARA 39,000 YEARS OLD. look 350 Centuries to Hollow Out First Three Miles of the Gorge. According to Mr. Spencer of the Canadian Geological Survey, the great pectacle of Niagara Falls as we see it to-day has been about 39,000 years in the making.

Mr. Spencer, in common with other geologists who have studied Niagara. believes that originally the cataract or platforms, the first being thirtyfive feet high and the third being at or near the edge of the lake proper, instead of seven miles back up the iver as at present, says the Cleveland

Plain Dealer. It took the stream 35,000 years to nollow out the first three miles of the gorge, but only 4,000 years for the other four miles. The difference f time in these two stages of the rosion and of the cataract's recession of seven miles in all, is explained on the theory of a sudden and enormous increase in the volume of water, caused by seismic disturbance.

Formerly the Niagara River served as outlet to Lake Erie only. After the upheaval the waters of Lakes Huron. Michigan and Superior, which previously had debouched directly into Lake Ontario were diverted by way of Lake Erie into the Niagara River, swelling that stream to six times its former

Mr. Spencer's figures, of course, can e taken only approximately, as even ontemporary authorities are at variance as to how far the falls of Niagara have receded during the last fifty vears-some estimates making it 1.28 neters per annum, others 1.52.

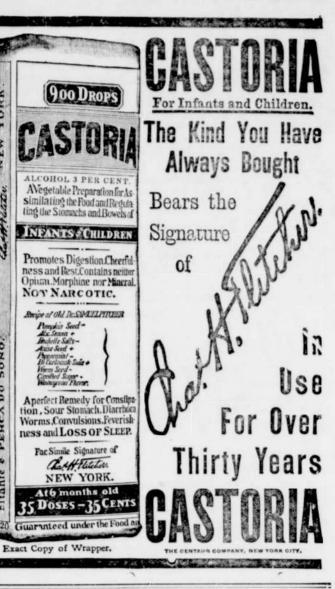

Moreover, while the United States Geological Survey declares that the ate of recession of the falls has inreased during the last fifteen years, he corresponding Canadian official report shows that the rate has decreased ome sixty-six centimeters per annum.

In Arkansas.

The way of the tippler is certainly etting harder and dryer in many arts of the country. The Senate of Arkansas has taken a step toward adding to his difficulties by passing a bill o make it a misdemeanor for a person to take a drink of intoxicating liquor on any passenger train in Arsearch along the east African coast with kansas or to leave the train and take then get back on the train.
