## FOR HIS JOURNEY

Executive Office of Nation to Be On Wheels Until November 12, When Washington Will Again Be Seat-Official Trip Starts From Boston -Chicago First Stop.

Beverly, Mass., Sept. 14.—President Taft gave up his golf game and all official business yesterday and devoted himself to preparing for the long Western trip, which will really have its beginning when he motors into Boston this afternoon to attend a chamber of commerce banquet. The president will pass the night in Boston, leaving there for Chicago at 10 a. m. Wednesday. Mrs. Taft expects to remain in Beverly until November 12, when the president plans to arrive here to take her back to Washington. The execu-tive offices will close after the presi-

dent leaves Beverly.

With the assistance of two servants have been lost, and thousands are homethe president packed his numerous

grips and trunks. The president also was busy yester "And that young man kissed you on the lips? Why didn't you offer him your hand?" said the father.

"O, I didn't have to, papa," said the "O, I didn't have to, papa," said the collected most of these and it was the collected most of these and it was the president's task to revise the list. The president had no official engagements.
Oscar Lawlor, assistant attorney

general of the Interior department, was at Beverly and his presence led to a renewal of the report that the president may have something to say on the Ballinger-Pinchot controversy before he leaves for Boston.

LOVETT IS HEAD.

Elected Chairman Union Pacific Ex ecutive Committee.

New York, Sept. 14.-Ex-Judge Rob ert S. Lovett, chief counsel for the Union Pacific railroad, was yesterday elected chairman of the executive committee of the company, thereby be-coming the successor of Edward H. Harriman in the control of the vast railroad and steamship systems which the fiancier built up. The Union Paific still remains without a president, as Mr. Harriman occupied this position also. It is understood, however, that an operating man, probably L. F. Loree, president of the Delaware & Hudson, will be elected to the place at the annual meeting of the stockholders October 12.

At the same meeting where Mr. Lovett was elected to the chief executive position of the keystone road of the Harriman system, William Rockefeller and Jacob H. Schiff were elected members of the board of directors of the Union Pacific and were also appointed members of the executive com-mittee. Messrs. Schiff and Rockefeller succeed Mr. Harriman and the late Henry H. Rogers as members of the board.

AID IS NEEDED.

Appeal Made to America for Suffer ers in Mexico.

Washington, Sept. 14. — Tales of great suffering in the flooded districts of Mexico as told in telegrams received at the State department today from Consul General Philip C. Hanna, brought forth another appeal tonight from the American Red Cross society for funds with which to "supply our infortunate neighbors of Mexico with the necessities of life."

The loss of life and destruction of property is even greater than was at first supposed, and it is predicted that great physical suffering will prevail winter.

country and small towns between Mon-terey and Matamoras. Mr. Hanna says ed so that one could keep a cow the American consul at Matamoras rethe railroads between Matamoras and or bulky part of the ration, and the

railroad as fast as it is opened," says handling of the herd on the farm. Mr Hanna.

"It is believed by many," Mr. Hanna said, "that more than 10,0000 lives

OLD SETTLEMENT IN RUINS.

Storm Plays Havoc With Century-Oli "Place of Peace."

La Paz, Baja California, Sept. 8. via Guaymas, Sept. 14.-La Paz, the oldest settlement of the Californias, is in ruins. The most terrific storm ever known has wrought havoe in and about the old pueblo. Seven lives are already known to be lost and the shore is s'rewn with wreckage from ships and boats in the roadstead. In many places the water is four feet deep in the streets and some of the thoroughfares are channels for raging torrents.

Communication with the outside world, except by a steamer, which has just stopped at the port, is cut off and the greatest misery exists, especially among the poor townspeople, the ma-jority of whom have lost everything they had in the world.

From the country districts comes the news that the devastation there has been great. Without warning the cy-clone burst on this "Place of Peace," accompanid by torrents of rain. The boats along shore and anchored in the bay were torn from their moorings and most of them were battered in collision or thrown upon the beach. The sky was overcast and many believed the end of the world at hand, and crowded the old mission church in a delirium of fear.

BOMB CASES ON TRIAL.

Sensational Disclosures Are Promised at Chicago.

Chicago, Sept. 14.—Sensational dislosures are promised in the trial of Vincent A. and Joseph Altman, charged with malicious mischief and arson. A score of witnesses will be brought by the state in an attempt to prove that both were guilty of causing the explosion and fire which wrecked the Standard Sash & Door company's plant, May 28, 1908, and their testimony, it is claimed, will throw considerable light on the entire series of bomb out-Los Angeles, Sept. 14 .- The South rages which have taken place in Chi-

Churning should not take place could keep two cows on an acre, but within five or six hours after the last practically the man who keeps one cow on two acres is doing very good business if he gets fair prices for the product. It is a fact that the demand for milk, butter and cheese is increasing faster than cows and the prices are continually advancing. There is no better business than dairying .-Agricultural Enitomist

Water a Necessity for Crops. This reservoir is 100 feet high and 74 feet in diameter and will hold 3,400 tons of water, an equivalent to 30 acre-inches of rain fall. An average rainfall of 1314 inches during the

growing season would fill to the point indicated. A rainfall of 9 inches, if completely utilized, would produce a yield of 30 bushels of wheat or 157 bushels of oats.

Silo Building. In all silos the greatest waste oceurs around the sides, particularly in the corners, because the air has greater access to these parts. The fodder is not packed tightly in the corners, the air fills the interstices and decay results. With the cylindrical silo the friction is equally distributed over the entire inside wall surface, so that the silage settles evenly.

The place a silo is to occupy may determine the form to build. There are several kinds. Chief among these are the round the stave, the square rectangular, and the octagonal form A square or rectangular silo can usually be constructed within a barn with better economy of space than a round silo. For these reasons square silos are most frequently employed within the barn, and the circular type when a separate building is constructed.

Mottled Butter.

Streaky or mottled butter may be aused by the salt, or it may be due o the working of the butter. The salt is so evenly diffused in the finest kind of butter that, as is shown by a microscope, every grain is surrounded by a film of clear and transparent brine, which points out the necessity of avoiding the overworking of the butter before the salt is added. In the first working every particle of enough clear water should be left to danger of streakiness in the butter, but to get the best results the salt should be very finely ground.

It is estimated that a fence post which, under ordinary circumstances, will last for perhaps two years, will, The service of other timbers, such as railroad ties and telephone poles, can pensive preservative treatment.

I had about one acre of washed clay land on one side of a good field It was absolutely devoid of vegeta tion, had been left out for a numbe of years after wasting fertilizer upon it, and was an eyesore. Early in the spring I crossed it with furrows about feet apart. In these furrows I dropped wild blackberry roots, one about every 4 feet. I dropped a forkful of stable manure next to each root, partially covering it, and covered the whole with one furrow made with the turn plow. In the next furrow dropped small pine tops and partially covered them with the riow. I went over all the land in the same way. The work required three days for two men and a team. The following spring I plowed out the middles. This was five years ago, and I have not touched the land since. I have gathered two good crops of blackberries and the land is now covered with heavy berry bushes and a good wild grass sod, with no wash to speak of .- G. M. Humphreys, in Agricultural Epito-

Beet Culture Wanes. Comment has arisen over the appar ent decadence of sugar-beet culture in the farming section about Toledo, Ohio. Where a few years ago a dozen fields could be seen without traveling more than a mile or two, now scarcely one exists. A farmer reported he saw but one field between Toledo and Monroe, though only a few years ago this section produced heavily. Several factors have arisen to work against beet raising. In the first place, labor and care considered, the present highpriced cereals are considerably more profitable; again, farmers have begun to learn that beets tax soil vitality about as heavily as any crop, and, unless fertilizing elements are constant

For a Sucking Cow. The following description is given or a device to prevent a cow from suck-

The accompanying illustration shows the result. This device prevents the cow from reaching her flanks.

Slinge for Feeding

The chief difficulty in growing silage corn in some of the Northern States is in getting a suitable variety, and farm ers are strongly urged to take advan tage of such new varieties of silage corn as may be offered for trial by the experimental stations of their re spective States or by the United States Department of Agriculture, and also to select their own seed in order to milk should be gotten rid of, but fill it. In sections where potatoes fill the place of corn in a ration, silage fighting four forest fires that are en, it was semi-officially announced to-threatening the San Gabriel watershed.

The worst fire is devastating the north

British house of commons as to the this is done there will be but little be thus provided. Clover and Italian rye grasses are successfully used for silage in the State of Washington and the combination is worthy of trial in northern Maine.
