

The Estacada Progress

Issued Each Thursday

ESTACADA, OREGON

BRIEF NEWS OF THE PAST WEEK

Interesting Events from Outside the State Presented in a Manner to Catch the Eye of the Busy Reader—Matters of National, Historical and Commercial Importance.

Russia appears to be planning a war of revenge on Japan.

Anarchy is rampant in London on account of the execution of Ferrer.

Official figures show a total attendance at the A.-Y.-P. exposition of 3,740,551.

The trolley lines of Vancouver, Wash., have been extended seven miles toward Orford.

The interior department refuses to recognize Washington's claims to reservation lands.

A three-cornered fight is on in New York for spoils of subway contracts as the majority.

W. I. Buchanan, an American diplomat on a special mission, died suddenly in London of apoplexy.

The government has decided that horses are better than dogs for transportation work in Alaska.

Had the mutiny in the Greek army succeeded, the Duke d'Abuzzi would have been offered the crown.

President Taft tells Texas people that he favors irrigation and a big standing army. He will rest four days on his brother's ranch in Texas.

One convict is dead, two wounded, and two deputies wounded as a result of a battle between five escaped convicts and a posse near Buena Vista, Or. Two convicts escaped uninjured.

The Alaska-Yukon-Pacific exposition closed with many ceremonies.

The total fatalities in the recent storm in Tennessee number 46.

A runaway horse leaped clear over an automobile at Bellingham, Wash.

Stuyvesant Fish, of New York, is likely to be the next minister to China.

The Oregon trunk will bridge the Columbia between Celilo and The Dalles.

Honey won the recount of votes for the Democratic nomination for district attorney.

Willie Boy, the California Indian outlaw, committed suicide with his last cartridge.

A deputy sheriff was badly wounded in a battle with escaped convicts near Salem, Or.

Taft sternly rebuked New Mexicans who questioned his good faith as to statehood.

President Taft exchanged visits with President Diaz, of Mexico, and pledged international friendship.

It is declared that Ferrer was not a revolutionist, but only a promoter of free education in Spain.

An American aeroplane was wrecked during its first trial at Doncaster, England, while an English aviator made the longest flight ever seen in England.

Taft was showered with gifts by Pueblo Indians.

A. D. Charlton declares the heavy traffic from the East will continue.

Thomas J. Lipton is anxious for another try for the American yacht cup.

Cook's discovery of the North Pole is officially recognized in New York City.

It is now reported that Minister Crane is the victim of political intrigues.

Terrible storm in South kills at least 50, and causes immense property damage.

President Moffatt says the Oregon Electric will ultimately build on to Roseburg.

Superior judge at Washington rules that it is not necessary to declare one's politics when registering in that state.

A woman drawn by mistake as a juror at Los Angeles declares she will serve, and there seems to be nothing to prevent it.

A family feud near Lacey, Wash., resulted in the blowing up of a house by dynamite, and exposed a whole household of degenerates.

Five convicts at work on roads near Salem, Or., overpowered their two guards and escaped, taking two automatic revolvers, \$29 in cash and a horse and buggy.

Japan is pressing her demand on China.

Killing frosts in the South have raised the price of cotton considerably.

An Italian warship has arrived at San Francisco to participate in the Portola festival.

A robber who had held up a Chicago bank committed suicide when cornered by police.

Taft promises to help statehood in Arizona, and sounds warning against facts of Oklahoma.

Charles R. Crane, minister to China, has been requested to resign.

Russian officials expelled an American at the expiration of his passport.

Hill says Oregon trunk line will build feeders in Oregon, but not extend them into California.

A Portland man helped his wife draw up the papers in her divorce proceedings against himself.

The recent blizzard caused many shipwrecks on the Great Lakes, and considerable loss of life.

Snow storms and intense cold prevail throughout the Middle West states.

Crows were so big at the Seattle fair that W. J. Bryan found it difficult to see the exhibits.

Ferrer, the alleged revolutionist arrested at Barcelona, Spain, was refused pardon and executed by shooting.

It is believed that the Japanese government, for personal reasons, favored the removal of Crane, minister to China.

Socialists and radicals in many European capitals have raised a storm of protest at the execution of the Spanish revolutionist Ferrer.

ANARCHY RAMPANT.

London Mob Condemns Alfonso and Blames King Edward.

London, Oct. 18.—The red flag was raised in London this afternoon and a large mob moved upon the Spanish embassy to make a demonstration of its disapproval of the execution of Professor Francisco Ferrer at Barcelona.

Police drove off the crowds in their usual bloodless official way. But an anarchy prevailed in the neighborhood.

The trouble began at a mass meeting in Trafalgar square organized by several socialists and labor bodies. Several hundred members of these organizations marched to the square carrying red flags draped with crepe and bearing inscriptions denouncing King Alfonso. A black-bordered banner was left standing against the Nelson column with big letters, "To Hell With the Murderer Alfonso."

Several labor members of parliament spoke, Victor Grayson, of Manchester, the socialist member, capped the climax by declaring that if the head of every king of Europe were torn from his body, it could not pay half the price of Ferrer's life.

He called the Russian emperor a "dirty monster," and said King Edward, who could have prevented the execution, was responsible for what might happen in England as a result of his demand of the expulsion of the Spanish minister.

The socialist societies, carrying banners, then marched to the Spanish embassy, singing revolutionary songs and shouting King Alfonso. A rabble of about 100 men, filling the streets. It was dark when they reached the open square in front of the embassy, and they found the square filled with police.

The embassy windows were dark and there was no sign of life. The police would not let the procession enter the square, nor even stop.

The crowds turned back and kept moving up Victoria street, toward the Parliament buildings, singing, shouting and groaning. The reserves drove the mob into the side streets, dispersing it without trouble.

NEWS ITEMS OF GENERAL INTEREST FROM THE STATE OF OREGON

CLATSOP SANDS HOLD OIL.

Valuable Deposits Believed to Underlie Beach Sands.

Astoria—While work has been stopped, temporarily, at least, on sinking the oil well at the Hess place, on account of the parties who had agreed to give leases on their property having withdrawn their leases as soon as flows of oil and gas were found, the indications are that the oil properties of this section will soon be developed, as the attention of outside parties is being attracted to them.

That oil and gas in considerable quantities exist here has long been known by parties who have conducted investigations, and H. C. Harrison and W. E. DeWitt were successful in an experiment of extracting crude petroleum from rock which is found in almost endless quantities in this section. The rock used in the experiment was a specimen of hydraulic limestone, which was taken from a ledge containing hundreds of thousands of tons, and while only a small piece was used, and a crusty kind of a retort was employed, a considerable quantity of oil was obtained.

In this connection it may be stated that a few years ago the body of a cement rock that is located on the north side of the river was drilled for the purpose of ascertaining its depth, and directly under it quite a body of oil was found.

Another interesting experiment that was made by Messrs. Harrison and DeWitt was the extracting of paraffine from sand secured along the beaches, which contains the oil product that in the sands made at Nehalem and even so far north as Cannon beach has been so often described as "beeswax."

STANFIELD GETS ON MAP.

New Yamhill County Town Takes 25 Prizes at Pendleton Fair.

Stanfield—the new town of Stanfield, in northern Yamhill county, presents a unique spectacle. At present it is a city of tents, but as fast as the 150 dwellers in tents can do so, the settlement is being transformed into a city of brick, stone and cement business buildings and neat frame cottages and bungalows.

The O. R. & N. is building a brick depot, finished in antique oak. The First National bank has a beautiful stone and cement building nearly completed, and the Columbia Land company has a cement and stone structure with 100 feet frontage on Coe avenue well under way. Among other buildings, either in course of construction or soon to be built within the fire limits, are business blocks by Page & Son, of Portland; store building by Fred George, of Echo; hardware store by J. E. Fancett, of Stanfield; newspaper of E. J. hotel, etc.

This is the same town which carried off 25 first prizes for products at the recent district fair held at Pendleton. It lies in the midst of over 20,000 acres of splendid fruit lands, a large part of which has been recently leased brought under irrigation. A commercial club has just been organized, and Stanfield is fast getting "on the map."

Another interesting experiment that was made by Messrs. Harrison and DeWitt was the extracting of paraffine from sand secured along the beaches, which contains the oil product that in the sands made at Nehalem and even so far north as Cannon beach has been so often described as "beeswax."
