

# Coughs of Children

Especially night coughs. Nature needs a little help to quiet the irritation, control the inflammation, check the progress of the disease. Our advice is—give the children Ayer's Cherry Pectoral. Ask your doctor if this is his advice also. He knows best. Do as he says.

**A Hard Proposition.**  
A young man visited his doctor and described a common illness that had befallen him.

"The thing for you to do," the physician said, "is to drink hot water an hour before breakfast every morning."

"Well, how are you feeling?" the doctor asked a week later. "Did you follow my advice and drink hot water an hour before breakfast?"

"I did my best, sir, but I couldn't keep it up more than ten minutes at a stretch."—Tit-Bits.

**At the Summer Resort.**  
Clara—What an interesting man Mr. Robinson is. He always holds one's attention.

Charlie—When I saw you both on the porch last evening I thought he was holding something much more substantial than your attention.—Judge.

**Uncle Eben on Brains.**  
"I dunno," said Uncle Eben, "whether it's better to have mo' money dan brains or mo' brains dan money, but heaven help de man dat ain't got any of either."

## ITO MURDERED BY COREAN

Consternation and Grief Reign Over Japanese Empire.

**Diplomat on Mission From Emperor to Confer With Russian Minister of Finance—Prince Regarded as Foremost Statesman of Modern Japan.**

Tokio, Oct. 26.—News has been received here that Prince Ito, the famous Japanese statesman, has been assassinated by a Korean at Harbin.

The news was received at Tokio at 3 o'clock yesterday afternoon. The dispatch contained only the brief announcement that Prince Ito had been assassinated.

It has caused great grief and consternation. Prince Hirobumi Ito was perhaps the greatest statesman of new Japan. The achievement with which his name has been chiefly associated in the minds of Occidentals was the framing of the imperial constitution, by virtue of which Japan took her place for the first time in the rank of modern civilized states.

As the emperor's trusted adviser and the medium through which the state was placed on a constitutional basis, he must be regarded as one of the positive factors which have helped to win for Japan her present standing among the nations.

**MANY WANT PLACE.**

**President Likely to Appoint Democrat Supreme Justice.**

Washington, Oct. 26.—President Taft in selecting a successor to the late Justice Peckham, is expected to choose a Democrat. Senator Root and Secretary Knox, however, are considered among the possibilities. The New York senator has accumulated enough of this world's goods to be able to devote the remainder of his activities to government service, but it is rather doubtful whether Mr. Knox could be persuaded to accept.

So far as administration officials are advised, the president has not made his selection. A number of important cases are soon to be argued before the Supreme court, and in a large measure the school of the new justice will decide the issues. Therefore exceptional importance attaches to the selection.

Solicitor General Bowers, of the Department of Justice, who is a Chicagoan, is known to stand high in the esteem of the president, and it has been understood that Mr. Taft would like to see him upon the Supreme bench. If a Democrat is to be chosen, Secretary of War Dickinson, ex-Secretary of War Wright and Judson Harmon loom up prominently, with Mr. Dickinson running as favorite.

**EVIL TRADE GROWS.**

**White Slava Traffic Is Declared to Be Spreading.**

Omaha, Neb., Oct. 26.—"The traffic in girls has become an evil more widespread than the public imagines," said Dr. O. Edward Janney, of Baltimore before the National W. C. T. U. convention today.

"The main line of its operation," he continued, "is from Montreal, Boston and New York, westward through Buffalo, Pittsburg, Chicago, Omaha and Denver to San Francisco and Seattle. It even reaches across the ocean for victims."

"The Federal government is doing all it can to suppress the traffic, but it is hampered by a Supreme court decision that this is a matter which the police power of the states should regulate. I urge the members of the W. C. T. U. to influence their state legislatures to pass more drastic laws on this subject."

Dr. Janney is chairman of the national vigilance committee for the suppression of the "white slave" trade.

One of the notable speakers tonight was Miss Ellen M. Stone, the missionary whose abduction and ransom in Southern Europe a few years ago made her internationally known.

**Socialists Arouse Doubts.**

St. Petersburg, Oct. 26.—Discussion of the bill for the consolidation of rural holdings was begun in the douma today. The measure authorizes the consolidation of such peasant holdings as are at present scattered in small areas over the lands belonging to private owners or the state. A scene of great disorder was caused today by the Socialist interpellation in the douma, declaring unconstitutional the ukase issued with reference to military legislation. Secretary Zamyovski refused to read the interpellation.

**Takes No Risk of Feuds.**

St. Louis, Oct. 26.—Mayor Roy C. Woods, of Wellston, St. Louis county, today received notice from an insurance company that it had cancelled his \$5,000 policy. No explanation is given, but Woods believes the action was caused by two recent political feud shootings in Wellston. His life is insured for \$40,000, and his will provides that if he dies at hand of an assassin, Joseph W. Folk, former governor of Missouri, shall receive \$1,000 and five other lawyers \$500 each to prosecute his slayers.

**Women Start Strike Riot.**

New Brunswick, N. J., Oct. 26.—Several hundred women took part in rioting today outside the cigar factory of Hirschorn & Co., where a strike is in progress. Three women were knocked down and roughly handled. Nearly 500 young women left their work Saturday when their demand for an increase in the piece work rate was refused. A number of American girls who refused to strike were attacked when they attempted to enter.

**Peace Promised in Balkans.**

Paris, Oct. 26.—The Temps prints an interview with M. Iskowski today, in which the Russian minister of foreign affairs describes the Russian-Italian rapprochement as destined towards the maintenance of peace in the Balkan states.

## NEW CURE FOR CONSUMPTION

Clinic for Treatment to Be Opened in New York City.

New York, Oct. 25.—A clinic for the cure of tuberculosis by electric currents of high potentiality and high frequency is to be opened within a few days at the Throat and Lung hospital in East Twenty-seventh street. It is the first clinic of the kind and according to Dr. Frederick de Kraft, of 148 Seventh street, who will be in charge of it, may result in revolutionizing treatment for tuberculosis, if not establish a positive cure for it.

It is largely to Dr. De Kraft's success in the treatment of consumption with what is known as the Oudin electric current that the establishment of the clinic is due.

"I have not invented a cure for consumption," said Dr. De Kraft, "but I have improved the methods of application of the electric currents of high potentiality and frequency and with others have established that consumptives, even when in the advanced stages of the disease, can be cured by electricity."

"There are possibilities in the use of the Oudin, D'Arsonval and Tesla currents that may stir the world. Just what these possibilities are, I do not care to say at present."

**MALARIA RAGES IN INDIA.**

**Death Rate Mounts High—Conference to Be Held in Simla.**

Calcutta, Oct. 25.—An important official conference will assemble at Simla this month, charged with the duty of examining the whole question of malaria and drawing up a plan of campaign for the consideration of the government of India and the local governments. This special inquiry has been instituted by the governor general in council as the result of a report put forward by the sanitary commissioner that a permanent organization should be formed to investigate systematically the problem connected with the disease. The official communique on the subject points out that the number of deaths ascribed to fever throughout India approximates 4,500,000, representing a mortality of nearly 20 per 1,000, and though this total is greatly in excess of the actual figure, owing to the general practice of ascribing to "fever" deaths which are in reality due to other causes, yet it has been estimated, from indications afforded by certain special inquiries and by the disparity returns, that the actual death rate from malarial fever is about 5 per 1,000. This represents about 1,130,000 deaths, and as the mortality in malarial fever is ordinarily low such a death rate indicates a terrible amount of sickness, much of it preventable.

**CONVICT CAMPS PROBED.**

**Some Good, Some Bad, Found by Investigating Committee.**

Houston, Tex., Oct. 25.—According to the testimony of a committee before the senatorial committee on investigation at the penitentiary farms and camps in Texas, deplorable conditions prevail in several camps, while in others the opposite is true. In one of the farms, according to the evidence of those questioned, not only is sanitation poor, but those imprisoned are cruelly treated.

At the Light House at Calvert, the committee found most astounding conditions, it is stated. According to the testimony conditions on the farms have been found poor for the greater part, with ill-kept bunkhouses and no segregation of those ill. Food has been complained of. But many of the farms have their redeeming features. Where one poor condition obtains it is met by an improvement, so that in the main, the week's investigation found much to commend.

**Delaware Shows Speed.**

Rockland, Me., Oct. 25.—The battleship Delaware, the first American fighting ship of the Dreadnaught type, made a splendid showing on her screw standardization runs over the measured mile course in Penobscot bay today, exceeding her record by nearly a knot. While her contract calls for a speed of 21 knots an hour, the Delaware today attained a maximum speed of 21.98 knots and a mean of 21.44. Three runs were made in 19 knots, three at 20.55 and five at the maximum of 21.98 knots.

**Electricity Hardens Ore.**

Berlin, Oct. 25.—German iron and steel makers are excited over the successful solution of the problem of making steel directly from iron ores by electricity. This has occurred at Dornmelingen, where an electrical furnace has been producing steel for a short time. Although the ores used are low grade, and contain a considerable percentage of phosphorus, the furnace yielded a steel fully equal to the best grade made from Swedish iron. The success of this invention is expected to have a very far-reaching result.

**Red Apples Close School.**

Grand Junction, Colo., Oct. 25.—To harvest a crop of fruit, estimated to be worth \$1,500,000, it was announced today that all public schools were dismissed for two weeks. The pupils in the Indian school and public schools in the Grand Valley also will be given vacation that they may help in gathering the crop and relieve the shortage of pickers and packers. It is estimated that more than 10,000 men and women will help to harvest the crop.

**They'll Want the Wood.**

The forest famine is not to be immediate, said Mr. Pinchot at Denver. "We have forests in plenty for the present generation, and perhaps for the next, but in the years to come there will be famine a plenty if we don't at this time take the stitch in time."

**The Ohio Experiment Station**

recommends as a treatment for killing peach and plum tree borers, 3 pounds of naphtha soap emulsified by boiling in three gallons of water, while hot add one gallon of carbolineum emulsion, which can be obtained through dealers in market gardeners' and fruit growers' supplies. This can best be mixed by the use of a force pump. When the soap solution and carbolineum are thoroughly mixed add four gallons of water and apply with a spray pump, being careful to protect hands and face when using.

## NEED AND GARDEN

**Fattening Hogs.**

The hog is an omnivorous animal, and needs "roughage" and green feed for his best health and growth. A considerable amount of grain feed is needed to grow hogs with the greatest profit, and still more is necessary to fatten and fit them for market. When young animals have an abundance of range with a good supply of nitrogenous foods, like alfalfa, clover, vetches and cow peas, corn makes a valuable addition to the ration, but should not be given in excess, and will usually be found more profitable if mixed with shorts, bran or other feed combining a large proportion of protein. For young pigs bran is not so good as shorts and ground cow peas may be used in the place of the latter when the price exceeds \$20 per ton.

Feeding for the finish should not begin more than ten or twelve weeks before the hogs are to be sold. For the last six or eight weeks corn is undoubtedly the best grain, as the feed consumed during this time greatly influences the quality of the meat. Hogs take on flesh rapidly during the first weeks of heavy feeding, but longer feeding means slower gains. Quick work pays in fattening as well as in growing hogs, and when the animals are on good feed and fall to make a gain of at least one pound daily they should be sold or butchered.

Market your hogs at 6 or 8 months of age, at which time they should weigh 200 to 250 pounds. A greater percent of profit is secured than if you keep them until 10 or 12 months old, because you avoid 60 to 120 days of daily animal waste. However, a hog which is made to weigh 300 pounds at 1 year is quite profitable.

**Danger of Barbed Wire.**

Barbed wire is all right, for stock cattle and makes a cheap fence, but it is hard to construct such a fence to turn hogs, and, owing to its dangerous characteristics, it is out of the question for horses, and even for milk cows.

With the woven wire fence the post expense is not so great as that of the other kinds, as they need not be so heavy, and may be set a good distance apart. Heavy end posts are an absolute necessity, and they should be set in the ground not less than 3½ to 4 feet deep. If the line posts are 20 to 25 feet apart it is a very good idea to have every fourth post of good size, longer than the others, to allow extra setting. In setting end posts dig a big hole, put the post in, and begin to tamp and ram from the very bottom, not filling it too fast, so as to get the earth about the post packed from the bottom to the top. The "dead man" plan of bracing a post is perhaps better than any other. The "dead man" is a short post or heavy stone buried about 3 feet deep, 4 feet from the end posts, and with a cable made of plain galvanized wire to the post top and around the dead man the post can be held for years as firmly as when set. Be sure to use galvanized wire, as black wire will not last more than six or seven years.

A 20-inch high woven wire fence, two smooth No. 10 and one barbed wire at the very top, makes a good fence for any kind of stock, and can be put up for less than 40 cents per rod, exclusive of posts.—Lexington Herald.

**ONE MAN CAN HANDLE BIG RACK.**

It is possible to lift the rack a little at a time by means of the poles, as illustrated by the dotted lines. There is no need of a complicated block and tackle when such a simple device is so effective.—Frank Monroe in Farm and Home.

**Best Type of Milch Cows.**

A cow with her second or third calf is the most desirable of all, and this is undoubtedly the most profitable age to buy them. As milkers and breeders, they have all their best days in front of them, and with sufficient time to pay handsomely. Young and old cows are very distinct in appearance. The former have an unimpeachable appearance of fullness of flesh and coat, while the old ones are more or less shrunken. The teeth give an indication of age, and the horns are often looked to as a guide, the young having smooth horns, while those of the aged are wrinkled. If cross-breeds are bought, get them with the greatest tendency toward the best bred the cross has secured from Cows with a male or bull type of head are rarely good milkers. The head should be refined, neck thin, forequarters wide, square and robust, with deep, broad thighs.

**Value of Skim Milk for Hens.**

Systematic tests made by the West Virginia Experiment Station prove that skim milk is a valuable food for laying hens.

The first test covered 122 days. The twenty-two hens fed the skim milk laid 1,244 eggs, as compared with 996 laid by twenty-two hens fed a mesh wet with water.

In another test sixty hens fed skim milk laid 862 eggs in thirty-seven days, as compared with 632 eggs laid by a similar lot fed no milk.

Other tests gave about the same comparative results.

The conductors of these experiments estimate under prevailing conditions, with eggs selling at 20 to 25 cents a dozen, that the skim milk had a feeding value of 1½ to 2 cents a quart.

**They'll Want the Wood.**

The forest famine is not to be immediate, said Mr. Pinchot at Denver. "We have forests in plenty for the present generation, and perhaps for the next, but in the years to come there will be famine a plenty if we don't at this time take the stitch in time."

**The Ohio Experiment Station**

recommends as a treatment for killing peach and plum tree borers, 3 pounds of naphtha soap emulsified by boiling in three gallons of water, while hot add one gallon of carbolineum emulsion, which can be obtained through dealers in market gardeners' and fruit growers' supplies. This can best be mixed by the use of a force pump. When the soap solution and carbolineum are thoroughly mixed add four gallons of water and apply with a spray pump, being careful to protect hands and face when using.

## Why He Got His.

The vendor of umbrellas, who had just been thrown out of a large office building, wept bitterly as he looked at his torn clothes and broken wares.

"Who did this?" inquired the friendly cop. "I'll pinch 'em if you say the word."

"No; it was my fault," said the victim, gathering up the remains of a plaster image. "I insisted on trying to sell a bust of Noah Webster to a meeting of simplified spellers."—Denver Republican.

**Shake Into Your Shoes**

Allen's Foot-Powder, a powder for the feet. It cures painful, swollen, scurrying, sweating feet. Makes new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitute. Stamp Price Free. Address A. S. Ometzel, Le Roy, N. Y.

**Money to Burn.**

The big touring car had just whizzed by with a roar like a gigantic rocket, and Pat and Mike turned to watch it disappear in a cloud of dust.

"Them chug wagons must cost a hape av cash," said Mike. "The rich is fairly burnin' money."

"An' be the smell av it," sniffed Pat. "It must be that tainted money we do be hearin' so much about."—Success Magazine.

**Great Home Eye Remedy**

for all diseases of the eye, quick relief from using PETTIT'S EYE SALVE. All druggists or Howard Bros., Buffalo, N. Y.

**Safest Location.**

In those days the proprietor of the Babeltower flats was asking and getting fabulous prices for apartments between the twentieth and thirtieth floors.

"You see," he said, "they're most desirable because they're the safest. Aeroplanes never fly that low and automobiles seldom blow up that high."—Catholic Standard and Times.

**Pneumonia and Consumption are always preceded by an ordinary cold.**

Hamlins Wizard Oil rubbed into the chest draws out the inflammation, breaks up the cold and prevents all serious trouble.

**Two Sides to Everything.**

A little boy was given too much underdone pie for his supper and was soon roaring lustily.

His mother's visitor was visibly disturbed.

"If he was my child," she said, "he'd get a good sound spanking."

"He deserves it," the mother admitted, "but I don't believe in spanking him on a full stomach."

"Neither do I," said the visitor, "but I'd turn him over."—Success Magazine.

**Faulty Example.**

"You must think you ought to run around barefooted, Johnny," said Mrs. Lappling, chidingly, "just because Bobby Stangleford does. He's no centurion to go by."

**Offended Dignity.**

Teacher—What do we know concerning the canals on Mars?  
Ira Grett—Polly, dear, let me slope with you the first dark night!

Shaggy Hairied Puppi—Gee! We don't know any more about 'em than we do about our own north pole.

Polly Grett—Elope with me! The idea! I supposed you wanted me to elope with you!

## Constipation

"For over nine years I suffered with chronic constipation and during this time I had to take an injection of warm water once every six hours before I could have any action on my bowels. Happily I used Cascara, and today I am a well man. During the nine years before I used Cascara I suffered untold misery with internal piles. Thanks to you I am free from all that this morning. You can use this in behalf of suffering humanity." H. P. Fisher, Knoxville, Ill.

Pleasant, Palatable, Pure, Taste Good. Do Not Cause Nausea, Sickening or Gripes. Do Not Kill. Never Add to the Pain. The Genuine Cascara Tablets, U. S. A. Guaranteed to cure or your money back.

## TOWER'S FISH BRAND WATERPROOF OILED CLOTHING

will give you full value for every dollar spent and keep you dry in the wettest weather.
