The program for the twentieth annual meeting of the Oregon Dairy man's Association, to be held in Portland December 7-8, has been issued and it contains a great deal that will be of much interest to the keeper of cows. Addresses by practical experts and exhibits showing improved methods will be seen. Nothing can be of greater value, not only to those actively engaged in the dairy industry, but to the whole state as well. A large attendance at the sessions of the convention is expected. Butter and cheese makers will meet in Portland at about the same time.

Hood River and Albany have held their apple fairs and are ready to show their prize-winners at the Oregon Apple Show in Portland November 15-18. Both fruit displays were a credit to the two apple centers and they will be heard from when the prizes are awarded at Portland. Preparations are complete for this eyent and it promises to be the best exhibit yet held by the State Horticultural Society.

A special committee of the Portland Commercial Club is boosting flax culture with the hope of buildung up an industry in this state. A meeting was held during the week and considerable progress is being made. Investigations have shown that flax of exceptionally long fiber can be grown here and all facilities are favorable for linen manufacture.

That seaweed of the Pacific Coast will produce \$12,000,000 annually in potash for fertilizer is a discovery lately made by Secy. Wilson of the Department of Agriculture. Here is a chance for Oregon's coast line to contribute an entirely new product to the wealth of the state.

Great Boys Conference

At Corvallis

On December 1st, the Friday following Thanksgiving Day there will assemble at Coryallis between a hundred and fifty and two hundred of the picked boys of Oregon for a three days conference. This will be the Sixth Annual State Boys Conference held under the auspices of the Oregon-Idaho Young Men's Christian Association and is open to any boy over fourteen representing any Boys' Bible Study Club or Sunday School Class in the State.

The theme of this conference will be "Responsibility" and the motto "Dare to Do It." The papers will be prepared and read by the boys after which open discussion will take place. Besides a number of papers by the boys on topics in line with the theme, there are to be four addresses given by prominent men in the state who are not only interested in the boy life of Oregon, state who are informed as to its conditions and needs Such men as Mr. Fred Lockley, manager of the Pacific Monthly, Mr. H. W. Stone, General Secretary of the Portland V. M. C. A. and Mr. I. B. Rhodes, the General State Secretary for Oregon and Idaho Y. M. C. A. will be in the con-

The good people of Corvallis are throwing open there homes to the boys and entertainment will be provided for all bona fide delegates. The Oregon Agricultural College Y. M. C. A. men are also planning to assist in entertaining the boys and will give them a banquet in their building Saturday evening. The college men will also serve as guides taking the boys over the campus and through the buildings.

NOISE OF THUNDER.

Theory as to the Cause of the Crackle, Roar and Rumble. usually been thought that the

soise of thunder is caused by the closing up of the vacuum created by the ssage of the lightning, the air rushig in from all sides with a chip. But the intensity of the noise is rather disproportionate, and it is now supposed hunder is due to the intense heating of gases, especially the gas of water rapor along the line of electric disbarge and the consequent conversion of suspended moisture into steam at enormous pressure.

In this way the crackle with which a peal of thunder sometimes begins might be regarded as the sound of steam explosion on a small scale caused by discharges before the main flash. The rumble would be the overlapping steam explosions, and the final lap, which sounds loudest, would be the steam explosion nearest to the auditor.

In the case of rumbling thunder the lightning is passing from cloud to cloud. When the flash passes from the earth to the clouds the clap is loudest at the beginning. Trowbridge gave substance to these suppositions by causing electric flashes to pass from point to point through terminals clothed in soaked cotton wool, and he succeeded in magnifying the crack of the electric spark to a terrifying extent.-Exchange.

THE PHALANX.

Its Formation In the Military Methods of Ancient Greece.

A phalanx in the military affairs of Creece was a square battallon or body of soldiers formed in ranks and files compact and deep, with their shields joined and pikes crossing each other so as to render it almost impossible to break it. At first the phalanx consisted of 4,000 men, but this number was aft erward doubled by Philip of Macedon, and the double phalaux is hence often called the Macedonian phalaux. Polybfus describes it thus:

"It was a square of pikemen, con-sisting of 16 in flank and 500 in front. The soldlers stood so close together should have done the people have that the pikes of the fifth rank extendnobly stood by Professor Hicks, ed three feet beyond the front. The 1912 Almanac their faithful public servant, who owing to their distance from the front, has grown old in their service, couched them upon the shoulders of to sell at the mill, having stock on locking them together in file, pressed

PLANT BEGINS

On Wednesday, November 15th the Puget Sound Bridge and Dred . -. ing Company contractors, who the P. R. L. & P. Co. Mr. Al formally turned the plant over to Drill, who will have charge of the the same amount of electric current, two plants, Cazadero and River A 40-Watt Mazda Affords Mill, received orders on Tuesday evening to accept the plant from the dam contractors, and was busy going over the details all day Wednesday. Long blasts from all the our customers, as it more than cuts whistles of engines used in the their light bills in two, making startled all Estacadians. The tele- home, however humble, and no phone exchange was kept busy for store, however small, can afford to some time informing the people be without it, fore the 4th day of December 1911, and if you fail to appear and answer for want thereof the plaintiff will that nothing was wrong and that it simply meant the contracts were For a decree of this Court dissolving the marriage done. It will require probably two hundred men for some time yet to

> On last Tuesday the one unit was started and has been sending "juice" to Portland since, Another is almost completed. It will be January 1st by the time the third is installed. Provision is made for five units but at present only three will be put in, as it is thought that will be sufficient to generate power sufficient for their present needs.

October 1st was the time set by the conditions for the work to be one involving the expenditure of quested. One long ring. more than a million dollars and by the time it is completed, as contemplated over two million. It also cost the sacrifice of life. On all big public work such as this, accidents do happen and the building of the River Mill power site was no exception. Mr. Williams, the construction foreman, was the first to meet death, and probably the entire list would reach a half dozen that signed, executor of the estate of George meet accidental death during the and started in housekeeping in W. Lockerby, deceased, to the creditors construction of the dam. There their new home. A number of of and all persons having claims against were also a number of less serious

The men employed by the construction company were, as a rule. said executors at the office of their at- all good fellows. No rowdylsm, torney, in the City of Estacada, Ore., such as is usually the case in these big enterprises where large numbers of laborers are employed, have been in evidence. Superintendent Fletcher was a strict disciplinarian and when he had an undesirable they were quickly disposed of. In this manner the River Mill as well as Estacada was kept free from the usual riotous and disorderly conduct so frequently encountered in work of this kind.

It is sincerely regretted by all of Oregon, did, on the 14th day day of June, 1910 file us as we see these workers leave our community at the completion of

Mr. Drill, who will have charge and the state of the stat from now, is well known here and needs no words of recommendation from us. He is a capable employee of the company whose work has been appreciated by his company sufficient to add these increased re-

Large Building For Evangelistic Meetings

The big auditorium built by Portland people at 18th and Taylor Team Work and Hauling by streets for the accomodation of the big crowds to hear Gypsy Smith. The auditorium will seat 1000 in WOOD delivered in any quantity the choir, 8000 in the main portion and with standing room for 2000. Gypsy Smith and his wife were welcomed on Friday night by Governor West and others. The building was filled with a great throng of people who were eager to see and hear the man, who from a Gypsy used to the outdoor tent life, has aided in the most noted pulpits of the world in evangelistic work. Portland church people have made great preparations for this evangelistic work,
