#### Terrible Suffering

Eczema All Over Baby's Body. "When my baby was four months old his face broke out with eczema, and at sixteen months of age, his face, hands and arms were in a dreadful state. The eczema spread all over his body. We had to put a mask or cloth over his face and tie up his hands. Finally we gave him Hood's Sarsaparilla and in a few months he was entirely cured. Today he is a healthy boy." Mrs. Inez Lewis, Baring, Maine. Hood's Sarsaparilla cures blood diseases and builds up the system. Get it today in usual liquid form or chocolated tablets called Sarsatabs.

High Heels and Wit.

If anything could be higher than the Parisienne's hat it is her heels. The low English heel has once or twice enjoyed a brief season's favor in Paris, but at heart the Parisienne dearly loves to add a cubit or so to her stature and she achieves it of course with her beloved Louis XV. heel. Perched thus on stilts with the foot at an impossible angle, "le footing" becomes impossible and madame seats herself in a cab every time she starts out for a walk. That is why her boots and shoes are always new.

Some one has discovered that there is a close relation between the heels and the wit. The conversation of the walker in low heels is trite and flatbromidic, so to speak-but she who trips in high ones will soar to unexpected altitudes of epigram and paradox. We know that great wit and Insanity are near neighbors and the Germans putting the principle in practice are treating madness with a barefoot regime. The contact of the bare flat foot with Mother Earth is expected to bring back wandering minds to an every-day plane and the experiment

A Backsliding Santa Claus. Mrs. Peavish says that before they were married Mr. Peavish used to say that if she would let him be her Santa Claus he would devote his life to sliding up and down the chimney for her. And now it makes him mad to have to take up ashes from the grate

Thousands of Carloads of Wheat Are Tied Up in Canada.

Duluth, Minn.—The congestion of traffic on the Canadian railroads, which resulted in sweeping reduction of freight rates to permit Canadian grain to come to the American head of the lake for elevating and storage, is foreign monarch. Second—The emperor shall receive an annual grant of its inception, according to news received here from Port Arthur, Ont. The news tells of 3,500 cars already billed to Port William over the Canadian Northern which cannot be moved. There is no place to store grain when it arrives at Port William. Thirty

million bushels are frozen on the ground or in Western elevators. In addition, there are 1,000 cars of grain on tracks between Winnipeg and Port Arthur, making 4,500 cars on the Canadian Northern alone.

The Canadian Pacific has reduced the number of empty cars that are delivered daily to elevators at the Canadian head of the lakes, on the theory that it is useless to load cars when they cannot be hauled to destinations.

Some May Survive, However, and Epidemics of Fever Have Been Traced to Use of Polluted Ice.

It may be of interest to those who are in the habit of putting up their own ice for summer use from a nearby pond, or stream, to know that the use of ice is not so dangerous as the use of the water from which it is formed, so far as typhoid fever is concerned. Although the typhoid fever germ, and the germ of diphtheria, as vell, can withstand a temperature o 310 degrees F. below zero, for several days, experiments with ice made from polluted water have shown that when the water freezes, the majority of the typhoid organisms are soon destroyed. However, the few that do survive, die off slowly, and it is these few that outlive their fellows that have been the cause of serious epidemics in a few cases. According to Parke, not one in a thousand lives in ice longer An ideal room temperature for the than one month, and all are dead at sedentary is that between 66 and 70 the end of six months.
