Bird Music?. Bah!

Lving on the soft grass before his tent, a camper sipped a tin cup of coffee and listened to the birds.

"You'd think from all this pure melody," he said, "that birds were musical-that, like the New York critics, they loved the best and only the best. But, as a matter of fact, they have a degraded taste. The thrush and the lark are as wrong in their musical ideas as Puccini and Leoncavalla are

"I have tested the thrush. I have set him to learning the notes of the nightingale. But he doesn't care for the nightingale's divine music. He will have none of it. The sparrow's ugly twitter, on the other hand, he masters with delight.

"The finch and the mockingbird are the same. They won't learn fine mu-sic, the music of Beethoven or Chopin or Wagner, but they take to rag-time and jigs like a pig to hog-wash.

"Hark to that burst of melody from the pine copse! You'd think the singers .nspired. But if thrush or lark or mockingbird went to New York, the critics would say their music was as rotten as that of Thats of Tosca.

TROOPS LINE BORDER

Americans Resting on Arms Ready to Cross Line.

Patrol Being Rapidly Re-inforced-Vasquistas Approach Juarez and Residents Flee.

El Paso—Four troops of United States cavalry patrol the Rio Grande with orders to cross into Ciudad Juarez, if necessary, to protect American

life and property.

With the 22d Infantry and three companies of artillery entrained at San Antonio for this city, and at least 1,000 Vasquistas at Bauche, 14 miles STONE THAT BURNS ITSELF south of Juarez, the situation generally is considered the most critical since the recent outbreak in Chihuahua.

The troops at Bauche are commanded by Colonel Inez Salszar, who, it is understood, will soon demand the for-mal surrender of Juarez. It is hardly believed any show of resistance will attention was attracted to a curious be made, as Juarez is garrisoned only by about 100 men.

That General Pasqual Orozco will remain loyal to Madero is the statement contained in a message from Governor Gonzales to Mexican Consul Enrique C. Lorente in El Paso. Lorente also declared he had received advices that Antonio Rojas and Barulio Hernandez, rebel leaders, had been captured, but further confirmation was unobtainable.

Anticipating unexpected developnents, Juarez residents moved their portable effects to the American side. United States and Mexican secret ervice operatives and Texas Rangers seized a manifesto issued by Gonzalo Enrile, former Mexican consul at Brussels. The manifesto makes an attack on the president of the United States, accusing him of "being re-

sponsible for the troubles of Mexico and Latin America." Officers are searching for Gonzalo Enrile. The manifesto says in part: "There have been so many bad acts in Mexico caused by your great efforts

at expansion and domination, that it would be a crime of lese patria to suffer them in silence longer. You have created, fomented and consummated the revolution which placed in power the traitor who is giving you our country. Your troops have inthe Monroe doctrine you put at halfmast the flags of your sister republics. ARMY THOROUGHLY PREPARED

No Americans Shall Suffer, Is Order From Washington.

Washington, D. Secretary of State Huntington Wilson In addition to sending another regi-ment of infantry and three batteries of field artillery to the Mexican line orders were issued to division commanders throughout the country to hold their companies in readiness move at a moment's notice. The acute situation in Mexico has had the effect of putting the army establish-ment in a high state of preparation, and mobilization on the Rio Grande ould be effected quickly if occasio should arise.

Rebels Raid Americans.

Phoenix, Ariz. - A telegraphic request that one or two troops of cavalry be sent to the border to protect United States citizens against the ravages of Mexican bandits was received here by Governor Hunt from Harry Wheeler, sheriff of Cochise county and ex-captain of the Arizona National Guard. Mexican bandits, according to the telegram, have raided a ranch and killed a man named Elias on the United States side of the international border. The request was referred to the War department.

East of the Jordan Lime is Made From Rock That Contains Its Own Fuel.

While making a trip through the Hauran district recently the writer's stone which might be described as a "self-burning limestone." Our party came upon some natives burning it and was enabled to see the operation.

This district is south of Damascus, east of the upper Jordan. At this place the rock lay in a stratum between or dinary limestone; it was of grayish black color, and when freshly broken had an odor of petroleum. Near by were outcrops of what looked like the same material many rods long and 20 to 30 feet thick.

Quarrying is easily done with primitive picks and other tools, as the rock is quite soft and full of seams. The stone is broken into small pieces with hammers and piled up against the bank of rock.

A wall of the same material about two feet high is roughly laid up around the pile on three sides, making a pile of small stone eight to ten feet long and nearly as wide, and two feet at the front, rising to nearly three times that height at the back, where it lies against the bank.

In building the wall around the pile small holes are left for draft and in which to start the fire. When the kiln s ready to burn a few small bunches of straw are placed in the holes menfloned, lit with a flint and steel and in a short time the whole pile has ignited. The man then begin working on a new kiln while the other burns and cools.

After about two hours of burning the cone has all become converted into ime, except the stones in the wall and the very top layer, which are only about half burned. When cool the lime is air-slacked and sifted to remove any pieces not thoroughly burned, which are thrown into a new pile to be fired again

The workmen told us that it made a very black smoke with a bad odor like kerosene burning. The lime is white and said to make a very strong plaster, superior to the ordinary lime burned with brush. This stone is so located that, should it prove to be of commercial value, it could be easily transported.-Consular Reports.

FOR COMPENSATION LAWS.

President Asks That Congress Fir Scale for Accidental Injuries.

Washington, D. C. - In a special message to congress the president urges the passage of laws providing for the compensation of railroad employes for accidental injuries, to be fixed in accordance with the positive scale recommended by the employers' iability and workmen's compensation ommission. The message declares hat the theory of the commission is hat each employe be insured against njury sustained in work, without reference to contributory negligence and without common law limitation on the iability of the employer. The mes-

sage says:
"The details of the measure are admirably worked out. They provide medical and hospital service for the injured man, notice of injury to employer where such notice is not obviously given by the accident itself, and the fixing of compensation by agreement. The amount of recovery is regulated in proportion to the mount of wages received, the compensation to be made in the form of annual payment for a fixed number of years or for life. The fees paid to attorneys are to be specifically remedied, and the remedies offered are exusive of any others."

President Taft declared that the greatest evil the law would destroy is the multitude of suits under the common law, which are now clogging the courts, postponing final adjustment through the law's delay.

DECLARE FOR PARCELS POST.

Objection to New Appropriation Bill May Be Made.

Washington, D. C. - Democratic nembers of the house committee on postoffices and postroads have agreed to incorporate in the appropriation bill provisions for a general parcels post. They also have agreed upon a general domestic rate of 12 cents and a maximum of 11 pounds. This is the present international parcel post rate. They would also provide for a rural parcels post, the rate to be 5 cents for one pound and 2 cents for each additional pound.

It was reported that some Republican nembers of the committee would approve the recommendation and that

the bill would pass the house. Members of the committee, however, expect to encounter some objection, on the ground that new legislation is proposed in an appropriation bill. They are discussing now how to get around these objections under the

Nixon Opposes Ship Bill.

Wasihington, D.
