# CHARACTER FOUND IN EYES

Color Shows Make-Up of Average Person, According to Close Observer of Human Nature.

According to a close observer of human nature:

Black (dark brown) eyes are a sign of passionate ardor in love. Dark blue, or violet, denote great affection and purity, but not much in-

tellectuality. Clear, light blue, with calm, steadfast glance, denote cheerfulness, good temper, constancy.

Pale blue, or steel colored, with Russet brown without yellow denote an affectionate disposition, sweet and gentle. The darker the brown the more ardent the passion.

Blue, with greenish tints, are not so strongly indicative of these traits, but a slight propensity to greenish tints in eyes of any color is a sign of wisdom and courage.

Gray, or greenish gray, with orange and blue shades and ever varying tints, are the most intellectual, and are indicative of the impulsive, impressionable temperament—the mixture of the sanguine and billious. which produces poetic and artistic na-

Light brown or yellow denote in-constancy; green, deceit or coquetry. Eyes of no particular cofor (only some feeble shades of blue or gray, dull, expressionless, dead looking) belong to the lymphatic temperament, and denote a listless, feeble disposition and a cold, selfish nature.
