The new education must meet the needs of womanhood as well as of manhood. How strange that only within a generation have we really begun to provide natural education for girls. This is not so surprising, however, in view of woman's position of relative inferiority down even to the present hour. Many a man, though born of woman, still unconsciously holds his own mother in such contempt as to class her, in the eyes of the law, with infants, imbedies and convicts and infants, imbeciles and convicts, and therefore incompetent to participate in the government of the race she
