WRIGHT'S
INDIAN VEGETABLE
PILLS

are not only Purgative. They combine remedial properties whose special function it is to restore to healthy activity all the digestive and diuretic processes.

Dangerous.
Warden—What did that woman give the prisoner?
Turkey—Only a pie she baked for him herself.
Warden—Good heavens! Get it away from him, quick before he makes a sav of the crust and escapes.

To Remove a Glass Stopper.
When the stopper of a bottle has become fixed and will not move, if it is soaked in vinegar for a few hours and then worked gently, it will come away quite easily, and there is no danger of breaking it.

Blood Bath
Knocks Rheumatism

Remarkable Effects of a Remedy That Actually Irrigates the Entire Blood Supply.

It sounds queer to take a blood bath but that is precisely the effect of a most remarkable remedy known as S. S. S. It has a peculiar action of soaking through the intestines directly into the blood. In a few minutes its influence is at work in every artery, vein and tiny capillary. Every membrane, every organ of the body, every emunctory becomes in effect a filter to strain the blood of impurities. The stimulating properties of S. S. S. compel the skin, liver, bowels, kidneys, bladder to all work to the one end of casting out every irritating, every pain-inflicting atom of poison. It dissolves the uric acid accumulations in the joints, causes acid secretions to dissolve, renders them neutral and exerts those peculiar formations in the nerve centers that cause such mystifying and often baffling rheumatic pains.

And best of all, this remarkable remedy is welcome to the weakest stomach. If you have dragged yourself until your stomach is nearly paralyzed, you will be astonished to find that S. S. S. gives no sensation but goes right to work. This is because it is a pure botanical infusion. It is taken naturally into your blood just as pure air is inhaled naturally into your lungs.

The great Swift Laboratory has spent millions of dollars in perfecting, producing and placing in the hands of the public this wonderful remedy. So give your blood a good bath with S. S. S., for it knocks the worst forms of rheumatism and gives you freedom to enjoy life.

You can get it at any drug store at \$1.00 a bottle. It is a standard remedy, recognized everywhere as the greatest blood antiseptic ever discovered. If you are in a peculiar case and you desire expert advice, write to The Swift Specific Co., 169 Swift Bldg., Atlanta, Ga.

NEW PAPER CURRENCY SOON
Smaller Size and Uniform Design Waits Action of Congress.

Very shortly the people of the United States will witness a great revolution in the size and appearance of their currency, says Bank Notes.

Each one of the two billion notes of that kind now in circulation will be supplemented by uniform pieces of currency about three-quarters of the size of that in present use.

The change in size is not the only one. Any note with Washington's portrait on it will be a dollar; with Jefferson's, two dollars; with Lincoln's, five dollars; with Alexander Hamilton's, twenty dollars, and so on.

This plan will render the raising of bills by crooks an impossibility, and we will have the safest and simplest system of national currency in the world.

The new currency will contribute largely to the convenience of the public, and will also effect a large saving in the cost of its production.

Work has been halted on this new size money, Secretary McAdoo being very favorably inclined to the change, but thinks it best to let congress dispose of currency legislation before changing the issue, as new legislation might make new issues necessary to conform to new laws. The new issues, when they have replaced the two billion odd notes now in circulation, will sound the doom of the counterfeit, for a standard design can be photographed mentally and counterfeits easily detected.

Timber work is no secure. It is a hard life, but it is out in the open, and it develops strong men. The city man who thinks the forest a playground has never rolled out with the "jobber's sun" in winter, broken a "jam" in the spring, or driven rioting rivers in summer. The "jobber's sun" is the moon. Advantage must be taken of seasonable weather in the woods. This was especially so in the old days, when there was less logging by railroad. Then a good snow for hauling meant that every bit of daylight must be utilized. The men were rolled out early. Often it was broken at 4 or 5 o'clock and labor until the darkness of night made work impossible. The men often walked to their work in the woods by moonlight in the morning. Hence came the appellation for the moon of "jobber's sun."

When Your Eyes Need Care
Try Murine Eye Remedy. No Smarting—Feels Pleasant. Try it for Eye Weakness, Watery Eyes and Granulated Eyelids. Murine Eye Remedy is a "Natural" Medicine. It is composed of pure Oculin—no "Patent" Medicines. It is the only "Natural" Eye Remedy for many years. Now dedicated to the Public and sold only by the Murine Eye Remedy Co., 210 Broadway, New York City. Murine Eye Remedy Co., Chicago.

First Submarine Boat.
The first submarine boat ever built was made of staves like a barrel, but cigar-shaped in outline, fitted with feathering oars and driven by man power. It was constructed by David Bushnell and used with effect in the revolutionary war. Its success led to further constructions at later dates, one of which was the man driven "Intelligent Whale," which now stands as a relic in the grounds of the New York navy yard.

This machine is also cigar-shaped and was driven by a series of hand cranks working the propeller at the rear. It was built in 1864, is 29 feet in length, 9 feet deep, and made of one-half inch boiler iron.

She Knew.
There is an old lady living in a small town in Southern Pennsylvania who makes great efforts to keep abreast of the times. Her opportunities, however, are circumscribed, and she is sometimes compelled to resort to her imagination. She went to a church social lately, and as she entered the room one of the attendants said:

"Good evening, Auntie. I am glad you came. We are going to have tableaux this evening."
"Yes, I know," replied the old lady; "I smelt 'em when I first came in."

Narrowing It Down.
"Mabel thinks of becoming an author, and this morning she asked me which school of literature I would recommend."
"What did you tell her?"
"I told her I only knew of two kinds. The kind that uses 'thru' and the kind that doesn't."

Truth Teller.
Marion—Did you ever receive a love letter?
Adeline—Oh, yes.
Marion—From whom did you receive it?
Adeline—The postman.

Packing Hint for China.
It should be remembered when packing china or glassware that damp straw is better than dry, and newspaper more advisable than tissue paper.

A storage battery electric lantern modeled after oil lantern switches on the current when the handle is raised and shuts it off as it is dropped.

A Monarch's Mistake.
Richard was offering his kingdom for a horse.
"An auto would get you beyond extradition," he suggested.

Molten zinc instead of cement was used to bind together the stones in a bridge recently built in France.

Blooms Are for Jessie Wilson.
Washington, D. C.—A chrysanthemum wedding appears to be the plan for the White House nuptials of Miss Jessie Woodrow Wilson and Francis B. Sayre on November 25. Thousands of the beautiful "mums" are being grown in the White House conservatory for the event. Mrs. Thomas R. Marshall, wife of the vice president, has bought many yards of exquisite hand-made lace for the bride-elect's wedding finery.

BIG STEAMER BURNS

135 Perish During Gale On Atlantic Ocean—521 Saved.

Many Ships Answer Wireless Distress Signals, But Storm Prevents Rescue Work.

London—Not since the Titanic sank has Europe been so thrilled as by a wireless message Monday telling of the burning of the steamship Volturo in mid-Atlantic with a loss, so far as known, of 135 lives and the rescue of 521. The Volturo sailed from Rotterdam on the 20th for New York. According to the official statement she carried 22 first cabin passengers, 538 in the steerage and a crew numbering 96.

The steamer Carmania, bound from New York for Liverpool, was 78 miles away when the call for help sounded. Captain Barr, ordering full steam, in spite of the gale drove through the sea at 20 knots an hour and was the first to reach the burning vessel. She was followed by La Touraine, Minneapolis, Rappahannock, Czar, Narragansett, Devonian, Kronland, Grosser Kurfurst and Zylidit at various hours throughout the day. Try as they might, the rescuing vessels could not get either line or lifeboat to the Volturo, the forward part of which was almost hidden by a dense cloud of smoke when the Carmania arrived.

The burning steamer lay in the trough of the sea, pounding helplessly, with her propellers fouled by the boats' tackle. The terrified passengers were huddled together as far as it was possible to get from the flames, while throughout the day the officers and crew fought desperately with whatever appliances were at hand to hold the fire in check.

The rescue ships reached the scene of the disaster in plenty of time to save all, but for hours were obliged to stand helplessly by the blazing vessel, impotent because of the storm to reach the agonized men, women and children crowding the after part of the ship and within a stone's throw. All night the lifeboats made a desperate effort to get alongside the Volturo, but the waves beat them back again and again, and not until the storm abated at daylight did the rescuers succeed in removing the survivors from the doomed ship.

The Volturo was equipped with thousands of life jackets, agents say, for a thousand people, but the boisterous sea or lack of boat drill, or panic among the passengers, prevented the successful employment of them. The rescue ships were able to lower lifeboats, but apparently most of the boats launched from the Volturo were smashed or upset and the occupants drowned.

Two of the boats, crowded with passengers, are reported to have got away from the ship, but a search for them has proved fruitless, and they have practically been given up as lost. The occupants of these boats are included in the death roll.

The hopelessness of the situation was manifested at 9 o'clock at night, when a great explosion tore away part of the upper works, and flames burst from the engine room. It then became a matter of how long the Volturo would stay above water.

Meanwhile several of the terrified passengers, wrapped in life bouys, dropped over into the sea. One of them was taken aboard the Carmania. It may be that others found a haven with other vessels of the fleet, but some undoubtedly were swept away.

When day broke the Volturo was still afloat. The gale had moderated and the seas had calmed down. From almost everywhere encircling steamers lifeboats were sent out and into these the women and children were lowered first. Several trips were necessary before the survivors were removed to a place of safety.

It is pointed out as a remarkable coincidence that the Volturo about four years ago made a noteworthy rescue in a great storm in mid-Atlantic of the crew of a French vessel. Captain Harrison, who then commanded the Volturo, was decorated by the French government for his daring act.

Liquid Mud Delays Work.
Panama—The Cucaracha slide is giving the engineers no end of trouble to work a cutting through it to let the water from the filled section of Culbra cut into the unwatred section south to the Pedro Miguel locks. After 48 hours of unremitting effort to excavate a trench through the barrier, no appreciable headway has been made, as liquid mud flows into the ditch about as fast as it is removed. A change of plan has been decided on whereby pumps will be installed to excavate a channel by hydraulic pressure.

Society Woman Accused.
New York—A woman who for several years has been welcome at the homes of society leaders in New York, Newport and Narragansett Pier will be arrested soon as the leader of the band of sneak thieves who last July robbed Mrs. Carey Rumsey and Mrs. John H. Hanan of jewels valued at \$175,000. According to Samuel Samwick, general manager of the Merchants' Secret Service bureau, the woman in now residing at an exclusive hotel in Atlantic City. He expects to recover the gems without any trouble.

RUSSIANS FIND NEW LANDS

Arctic Explorers Report Extensive Continent North of Siberia.

St. Michael, Alaska—The Russian flag ship Taimyr and its consort, the Waygatch, which constitute a Russian polar expedition under Commander Wilkitzky, which left Vladivostok June 10 of this year, reached St. Michael storm-bort October 9, and brought to that port news of the discovery north of Siberia in latitude 81 N., longitude 104 E., of a new uninhabited mountainous land, possibly a continent. The expedition landed with difficulty on the new land, raised the Russian flag on it and took possession in the name of the Czar.

Wilkitzky christened the new land "Nicholas Second Land."

The expedition sailed from Vladivostok by way of Petropovok and East Cape and thence westward along the Siberian coast to longitude 96 E.

Commander Wilkitzky says that the shore of the new country where the expedition landed and along which the vessels traveled is rocky, with high, abrupt cliffs, formed evidently from volcanic activity. Volcanoes of the district possibly may have been active recently, he said. Many high peaks, he stated, were discernible inland from the vessels and what seemed to be vapor could be seen arising from one of these.

The temperature taken on the water near the shore line was 61.8 degrees Fahrenheit, while that taken on shore was 62.6 degrees Fahrenheit. The land was covered with snow almost to the sea level.

In July and August the expedition saw much evidence of the presence on the land of reindeer. Many walrus were seen and bird life was plentiful. A number of polar bears also were seen. The vegetation on the new land, Commander Wilkitzky stated, was scant. Twenty fathoms from shore depth of water of 95 fathoms was sounded.

No evidence of mineral was seen on any of the newly discovered land.

SLEEP PRODUCED BY PALM

Golden Gate Park Has Great Floral Curiosity.

San Francisco—A specimen of the rare "sleeping" palm has been found in Golden Gate park, probably the only one in the United States. Curator Barron, of the park museum, discovered it as he was walking in the park with his young son. The tree, which was brought to this country 40 years ago by a famous Australian botanist, William Robinson, gives out a peculiar aromatic odor. Barron smelled the exotic fragrance and discovered the tree, whose upper branches were laden with a beautiful rainbow-hued flower, giving forth a heavy perfume.

Around the base of the tree were the dead bodies of small animals and birds.

Barron soon felt drowsiness stealing over him, his son complaining of the same feeling.

It was found that the tree, which had originally been brought from one of the South Sea islands, belonged to the species "Coccoloba somnambula," or sleeping palm, which blooms only once in 50 years, and the flowers of which were formerly used as a drug by the islanders.

France Would Take Credit.

Paris—The Temps devotes a leading editorial to the opening of the Panama canal. It says:

"Everyone in the United States understands the mingled sentiments of sympathy and regret with which the French people see the completion of a work originally due to French initiative. The justice, which our trans-Atlantic friends will render us on this occasion, will be but another bond between them and us.

"Jurists have condemned American methods in Panama, but America's soldiers and sailors, historically and logically unassailable. Any other world would have been precarious. It is vital to America's political interests to assure to herself control of an arm which, in other hands, would have been deadly to her."

Typoid Is on Increase.

Chicago—Drastic action in the city garbage disposal problem was taken Monday. Taxpayers of the Twenty-sixth ward applied for an injunction to prevent refuse from being dumped into the big clay hole in that ward, and Mayor Harrison, responding to the protests of a delegation from that ward promised that he would ask the city council to authorize him to begin condemnation proceedings against the Chicago Reduction company, whose plant recently terminated its garbage reduction contract with the city.

Friar Land Policy New.

Manila—Colonel H. C. McCoy, deputy collector of customs at Manila, and Charles H. Slesper, director of the bureau of lands in the Philippines, resigned Tuesday, and Manuel Tinio was appointed to the bureau of lands. This appointment is regarded as implying the adoption of a new attitude toward the friar land question. Governor General Harrison says that he does not intend to make any further changes at present. The reductions to be made in the salaries of officials are to be confined to higher positions.

"Cave Man" Grows Strong.

Cambridge, Mass.—Joseph Knowles, the Boston artist, who has just returned after living for two months in the Maine woods as a cave man, submitted to a thorough examination at the hands of Dr. Dudley A. Sargent, Harvard's physical director. "Knowles' achievement is remarkable," Dr. Sargent said. "On July 30 his strength test was 876.3; now it is 954. His weight decreased from 185 pounds to 180."

ARRESTS CONGRESS

Huerta Has 110 Lawmakers Taken Into Custody By Troops.

Threat to Leave Capital Met With Reprisal—Apology of Senators Withdrawn.

Mexico City—One hundred and ten members of the chamber of deputies who had signed resolutions of warning to President Huerta as the result of the disappearance of Dr. Belisario Dominguez, senator for Chiapas, were arrested Saturday and lodged in the penitentiary. Five other deputies who signed the resolution were absent when a cordon of troops was thrown about the legislative building and several hundred soldiers invaded the chamber.

The arrests followed a demand by President Huerta that the chamber withdraw the resolution which carried the threat that the deputies would abandon the capital, owing to an alleged lack of guarantees for their personal safety.

Senator Dominguez early in the month made a speech in the senate violently attacking Huerta, saying that not only had nothing been done during Huerta's regime toward the pacification of the country, but that the present situation in the republic was infinitely worse than before. He said the currency of Mexico had depreciated, fields had been neglected, and towns razed, and that famine threatened. He added that the situation was due first and foremost to the fact that the Mexican people could not resign themselves to be governed by Huerta.

Before the regular opening of the session of the chamber at 4 o'clock the basement and roof of the building had been packed with troops. Scores of police were scattered through the gallery.

When the deputies were in their places Minister of the Interior Aldeape entered the chamber. Simultaneously several hundred federal troops lined up in front of the chamber.

Senator Aldeape ascended the platform and read the reply of President Huerta to the resolution warning him of the deputies' intention to dissolve the parliament and hold their sessions elsewhere and demanding an investigation of the disappearance of Senator Dominguez. The reply said President Huerta could do no less than consider the resolution an act of unjustified aggression and transgression of the rights of the other two powers—the executive and the courts.

When the arrests were made a few of the leaders were placed in automobiles and taken to the penitentiary in streetcars.

Meanwhile similar demands to recent had been made on members of the senate who had concurred in the chamber's resolution. A committee of senators called on President Huerta and signed their willingness to comply with his demands. The deputies formally withdrew this action.

In anticipation of possible troubles, heavy patrols of troops were placed on the streets. The rapid-fire guns which were posted in the interior courts of the palace in February were again put in place and quantities of ammunition issued.

HOUSE ACTION IS RESCINDED

Decides Not to Remove Officers From Civil Service.

Washington, D. C.—By the closest vote of the session, 111 to 106, the house voted to rescind from its conference agreement to concur in the senate amendment to the urgent deficiency appropriation bill, which provides for the removal of deputy internal revenue collectors and deputy marshals from civil service regulations.

The vote came after a protracted debate in which many Democrats assailed the proposal as a direct blow at civil service and characterized it as step backward toward the spoils system. The Democratic revolt was led by Representative Fitzgerald, of New York, and 54 Democrats voted against the conference.

Representative Underwood, the majority leader, who did not take part in the debate, was loudly cheered when he voted aye.

Alimony Income Problem.

St. Louis—The effect of alimony on the collection of income tax is a question that is puzzling Edward F. Daly, deputy internal revenue collector here. A man who is divorced told the deputy collector that his income is more than \$3000 a year, but that he must pay \$1200 alimony, thereby reducing his net income below the \$3000 exemption for single men.

"Must I pay the tax?" the man asked the deputy collector.

"Search me," said the deputy. He will refer the question to Washington.

Brave Girls Rewarded.

Oregon City, Or.—Franklin T. Griffith, president of the Portland Railway, Light & Power company, has thanked the Misses Mary Green, Hilda Ford and Orena May for their heroism in extinguishing a fire that broke out on the railroad's trestle near Canemah last July. The president expressed his appreciation for the work that the girls had done and sent each of them a check for a substantial amount. The girls discovered the fire and used a wet newspaper to put out the blaze.

Snow Is Four Feet Deep.

Walla Walla, Wash.—Snow storms that have been raging for nearly a week have banked up four feet of snow at Toll Gate, 20 miles from here, and thousands of head of sheep are caught in the storm, herders being unable to drive them through the drifts. It is feared that thousands of sheep will perish. The snow breaks the record for the early season in this district.

WINCHESTER

BIG GAME CARTRIDGES

The time of all others when reliable cartridges are invaluable is in big-game hunting. A miss-fire, an inaccurate cartridge, or one having poor penetration may mean the loss of a coveted trophy or even injury to the hunter. Winchester, the W brand of cartridges, smokeless or black powder, can always be relied on to be sure fire, accurate, and to have speed and penetration. You can help **MAKE YOUR HUNT A SUCCESS BY USING THEM.**

The vacuum principle has been adapted to a fly trap invented by Colorado man, the insects being drawn to their doom through funnels placed at windows, tables, and other places where they congregate.

In a new resuscitation apparatus which weighs but seven pounds pure oxygen is obtained at any desired pressure by the admission of water to a compartment containing a patented chemical compound.

"A Perfect Woman Nobly Planned To Warn, to Comfort and Command"

Nature never intended woman to be delicate, ailing, or a sufferer from "nerves." Women in middle age complain of "hot flashes." Many women suffer needlessly from girlhood to womanhood, and from motherhood to middle life, with backache, or headache, dizziness, faintness, or bearing down sensations. For a permanent relief from these distressing symptoms nothing is so good as

DR. PIERCE'S FAVORITE PRESCRIPTION

as a soothing and strengthening nerve—alays and subdues nervous excitability, irritability, nervous exhaustion, and other distressing symptoms commonly attendant upon functional and organic diseases of the feminine organs. It induces refreshing sleep and relieves mental anxiety and despondency.

DR. PIERCE'S Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules.

WONDERFUL DRUG THAT STIMULATES GROWTH OF HAIR

And Revives Pigment-forming Cells That Give Hair Its Natural Color.

Hardly any of us are entirely free from dandruff or other scalp affections. Millions of us, so long as the trouble is slight, do little or nothing to cure the affection. Other millions are trying to do something, but getting no results, by applying all sorts of fancy colored and fancy named hair "tonics." You are not likely to get much benefit, if any, by using any preparation that does not contain the one known drug that positively stimulates the growth of hair. The safe and sure
