DRINK HABIT EXPORTS FOR YEAR 1913 TO BREAK ALL RECORDS **CONQUERED**

Washington, D. C .- American manufacturers are entitled to wear smug and satisfied countenances, according to the experts at the department of commerce, which announces that exports for the year ending with next month will break all records.

"Why shouldn't the manufacturers and mill workers smile?" demanded the experts, in announcing that exports for nine months have increased \$37,000,000 over the corresponding nine months of last year; manufactures for further use in manufacturing \$26,000,000, and foodstuffs, partly or wholly manufactured, \$17,000,000. Coal Peddler Gets Riches.

Minneapolis - After scouring the country for eight years to give Walter Lilly, of Philadelphia, a fortune of \$340,000, William Rohrer, an attorney, discovered the object of his search here. The money was left by Lilly's father, said by Rohrer to have been a wealthy soap manufacturer of Philadelphia. Lilly, who was 50 years old, was found living in a ramshackle cabin. He has lived here 11 years and has supported himself by selling coal from a push cart. He was ignorant that his father had died.

Property to Be Respected.

Washington, D. uary 1, 1915; for if water were not admitted this fall, but were deferred until May 1, 1914, the full height could not be reached until October, 1914, leaving little time for the determination of these questions.

"The present plans, therefore, are based on the blowing up of Gamboa dike on October 10, its removal by dredges immediately thereafter, the transfer of two suction dredges and a ladder dredge to the Cucaracha slide, the small dipper dredges to work on the other slides until the full width of the channel is attained, and the passage of vessels through canal as soon as channels of full depth and of sufficient width have been secured.

'Before boats can be passed it will be necessary to remove the Gamboa dike by dredges and to remove the slides as already outlined. The passage of commercial vessels is dependent, therefore, on the time when prop er channels can be dredged through the slides; should additional ones occur, they will necessarily advance the date when this can be accomplished."
