The herd is never dangerous except when a canoe passes into the midst of it when all are asleep, and some of them may

Gas Found in Trees.
Professor J. A. Ferguson of the
Pennsylvania state college, reports a curious phenomena connected with the cutting of hardwood trees in the Ozark mountains. Cavities near the base of the trees are often found to contain gas. When these cavities are cut into by the oak tie cutters of the region the gas escapes with a whistling sound, showing it to be under pressong of the university of Kansas, and it was found to be substantially the same as natural gas with the addition of some free hydrogen. Professor Ferguson believes, however, that this gas is the product of decomposition of the heartwood of the trees.—Pitts-

The most atrocious murder was that at San Francisco in 1915. on May 8 last, of General Roberto Pulido and 26 men and boys at San Fernando. Mr. Gilleran tells a thrilling story of this butchery.

"General Pulido was appointed gov-ernor by President Gomez a few weeks before," he said. "The traders waited on him and tried to make terms, but he told them he would accept no bribery, that the export taxes would have to be paid and that lawlessness must cease. From that minute he was a marked man, as was General Antonio Varella, whom President Gomez had sent to the colony in charge of customs.

"The traders gathered about 60 men into a house in San Fernando and filled them with rum and at 7 o'clock in the evening armed them with rifles, revolvers and knives and turned them loose. The house in which General Pulido had taken quarters was attacked and the governor and 26 others were murdered in the butchery that
