As a result of the interest which has been aroused in the raising of corn in Oregon, it is stated that over 2000 acres of the cereal has been planted in the vicinity of Ontario. Most of the planting was done with carefully selected, acclimated seed, and as the growers are using the most modern methods in its cultivation, it is expected the yield will be the best ever turned out in the state. Over 400 corn cultivators were sold by Ontario merchants in one week.
