News Notes

From All Sections

R. H. Currin of Currinsville is building a garage, to house his new Ford automobile.

Jim Linn of Currinsville is this week's purchaser of a Ford automobile, and J. W. Reed was salesman, of course.

The C. I. C. arc still figuring on having the public tie sheds built and when the ladies once decide to do a thing, it is as good as done.

The Eagle Creek Sunday School will give a temperance entertainment at the Eagle Creek Church, Saturday evening, Sept. 5th all are invited to come.

Ken Bartlett, Bob Morton and Milton Evans are contemplating entering college the coming fall, although none of them has definitely decided as to what school he will attend.

Mrs. Lou Palmateer and children of Garfield, recently returned from a weeks vacation, spent at the home of her brother at Vancouver, Wash. and her sister at Fairview, Or.

The residence of Mrs. Emily Lady of Estacada has been thoroughly repainted and is now one of the finest looking homes in this part of the county. The work was done by L. G. Reiland.

Mrs. M. Vallen and sister, Mrs. Crall are visiting their brother, Wm. Cross and family at Vancouver, Wash. Mr. Cross was recently seriously injured by a breaking scaffold, but is well on the road to recovery now.

The ladies of the C. I. C. spent Friday and Wednesday afternoons, helping with the preparation of the grain for the county's exhibit at the State Fair. The ladies will work one more afternoon, Friday Sept. 4th and all members are asked to come and help.

The Eagle Creek friends of Miss Edith Chapman tendered her a "fruit shower" last Saturday evening. A party of about nineteen of the older and younger folks surprised her. Games were played outside, by the illumination of a big bon fire, and refreshments wound up the pleasant evening.

Cecil Hampton and bride of Heppner, Oregon, during their recent visit at the home of his mother, Mrs. Henry Epperson of Garfield, were agreeably surprised by a serenade from the Garfield band. About 75 people were present at the affair and all enjoyed ice cream and cake, at the invitation of the bride-groom.

The George Social & Commercial Club met at the home of H. Joyner on Saturday evening, August 29th. The report of the House Committee on rules, was adopted. The report of the Club Building Committee was adopted. Further arrangements were made for their coming Community Fair, Sept. 25, and anyone wishing to make entries, shall notify Mrs. Robert Miller by Sept. 10th.

A. W. Botkin of Garfield, after five years steady work on his ranch, last week decided to take a vacation, and left last week for an extended rest at the home of his brother in law, C. W. Wanzler of Portland. Mr. Botkin has been a sufferer from sciatic rheumatism recently and needed a change, but the tennis racket, strapped to the side of his suit case, would not indicate that perfect quite was contemplated.

Mr. and Mrs. J. W. Reed of Estacada and Mr. and Mrs. R. H. Currin of Currinsville, left early Sunday morning for an automobile trip to the coast, via Tillamook. The party made the trip in Currin's new Ford machine and are expected back, the latter part of this week. This makes the fourth one of these pleasant vacation trips for J. W. Reed, this summer, but that is probably one of the penalties of selling automobiles in dozen lots.

SEPTEMBER 5TH

Union High School Vote

An erroneous idea is current that the various districts contemplating adopting the Union High School measure will be held responsible for their share of the present bondedness of the Estacada Schools. This idea is a mistake, for whether the Union High School measure passes or not, Estacada school district, have to pay that bond alone. This bondedness has nothing whatever to do with the outside districts, as Estacada will pay \$5,000 one year from December, when due, and the balance when due five years from then.

In order to win the Union High School vote, it is necessary for everyone in favor of the consolidation to be present at their respective school election, and vote for the measure.

The law reads that no lobbying or attempting to influence votes, can be done on the day of the election, so all electioneering will have to be done before election day.

It is to be hoped this Union High School measure will pass with a big majority, for it means the adoption of the best, up to date system of schooling, and means the most complete instruction for the students.

East Clackamas Fair

The Eugenic contest will be one of the most interesting features of the East Clackamas Fair. It will be held under the direction of three doctors and they in turn will have capable assistants. The classification, which will be according to ages, is as follows:

3 months to 8 months,	6 "	" 12 "	12 "	" 18 "	18 "	" 24 "	24 "	" 36 "	36 "	" 48 "	48 "	" 60 "
-----------------------	-----	--------	------	--------	------	--------	------	--------	------	--------	------	--------

Those who are contemplating entering children in this contest, will greatly facilitate the work of the committee if they will send in the names and ages to Mrs. A. W. Botkin, Estacada, Oregon. Kindly have them in by Saturday night, Sept. 5th. Either phone or send a card. No child will be refused if the parents neglect to send in the names but it will be a case of "first entered, first served".

It will also be a help if persons, who are to enter exhibits in any of the other departments, would notify the committeeman in charge.

Horses; Division A, Mr. Ely. Cattle; Division B, Mr. Harkenrider.

Sheep and Swine; Division C and D, Mr. Shibley.

Agricultural Department; Divisions E, F and G, Mr. Guthrie.

Woman's Department; Division H, Mrs. Botkin.

Poultry; Division I, Mr. Shearer.

Juvenile; Division J, Mr. Ford.

All exhibits must be in place by 6 P. M., Sept. 7th with the exception of livestock, which must be entered on the book that day but may be brought to the grounds not later than 8 A. M., Sept. 8th. Cows entered in the dairy testing contest, however, must be on the grounds by 6 P. M., Sept. 7th and they will then be milked dry in the presence of a judge. Several thousand persons will probably view the exhibits and it is to be hoped everyone will do his or her share in exploiting our community.

The Tents Are Up

Remember the big show starts Sept. 8th early and lasts till the night of the 9th and the committee of the East Clackamas Fair already have the tents up and ready for exhibits.

The Estacada Park looks like a big circus grounds and when the animals arrive and the doors open to the public, it will be a fine show.

The committee deserve the thanks of the community for the work they are doing and still have to do. They have arranged for such speakers as Dr. Withcombe, F. M. Gill, W. S. U'Ren, all candidates for the governorship and probably Mr. Franklin Griffith, president of the P. R. L. & P. Co.

Why Not Pave Broadway?

The Portland Railway Light & Power Co. will furnish gravel from the Barton pit, at 50 cents per cubic yard, in cars, delivered at Estacada. This gravel can be had in three sizes, suitable for rough grading and top dressing.

The Broadway pavement of boards is "rotten" in the truest sense of the word, and will be in a horrible condition this coming winter, after the rain gets a chance to soak up the now splintered and sun-burned boards.

To have to describe Estacada's main business street, in this way, will act as no advertisement, to outsiders, but it is necessary to try to get something done at once to remedy it. The Progress is read by about 600 local people and few outsiders, and no harm can be done by describing it to people already conversant with the street's condition.

The plan of hard surfacing Broadway, by using provisions of the Bancroft Bonding Act, seems to have met with little support, owing to an expense of \$87.50 per 25 foot lot. Some of the owners are perfectly willing to have it done, but most of them do not favor it sufficiently to get out and help.

The two blocks of Broadway, from the station to Third St., which needs immediate attention, would take 1,280 cubic yards of gravel, to pave it, twelve inches deep.

Anyone can figure out at 50 cents per cubic yard how much the gravel would cost.

At a later date the street could be hard surfaced over this gravel, but, in the mean time, the gravel, if well laid and rolled, would make a handsome and serviceable highway, at small expense.

Cement curbing should be built, too, and with one foot gutter, would cost about 45 cents per running foot, and without gutter, 35 cents per foot. It would cost about 50 cents per yard to unload, haul and spread the gravel.

Why does not some energetic contractor figure out a fair estimate for building this piece of road and submit it to the city council for their approbation, or bring it to this office and the Progress will help push the good work along?

The cry is, "hardtimes" etcetera, but that has been cried before, and the street must be repaired. "Hardtimes" may be here yet, but about 40 new automobiles have put in their appearance in this community in the past season and more coming.

"Water, Water Everywhere But Never a Drop to Drink"

Dr. R. Morse, Estacada's city health official, recently sent to the Oregon State Board of Health, three samples of water, for analysis. These samples were obtained during the recent pilgrimage of the water committee of the city council, in search of pure water.

All of the samples were taken from pools or riffles along the North Fork of the Clackamas, amid virgin woods, singing birds, blossoming flowers, drooping ferns, with other poetical environments and far, far, from contamination.

The State Board of Health's report, just received, states that our old friend, "colon bacilli," is present in these samples, in greater numbers than in Estacada's present supply, from Sewer Creek.

Dr. Morse believes there has been some mistake made in the analysis of this water, for the report is unbelievable.

No blame can be attached to the city council, for they "done their best" and covered many miles, to obtain "agua-pura" of the real pure type and if the North Fork water is polluted, Estacada will have to tackle one of Mt. Hood's glaciers and high up at that.

As another suggestion, why not get a good supply of drinking water from an artesian well? Such a well is now being sunk at the Salem State Fair grounds at a cost of \$5.00 per foot, with nine inch pipe, which at 82 feet depth, will yield 320 gallons per minute, when the centrifugal pump is attached. Estacada's water fund has sufficient money in it, to install an artesian well.
