

Family Reunion

In 1865 Philip Linn and family crossed the plains from Illinois to Oregon and located in what is now known as Currinsville. In 1886 Philip Linn died and his survivors in this vicinity are a daughter and two sons, Mrs. Nancy Shankland and Granville Linn of Currinsville and their children and Ed Linn of Garfield.

As a surprise to Mrs. Nancy Shankland, who recently returned from an extended stay in Portland, a family reunion with a sumptuous dinner was held at her home on New Years' day.

After dinner a family picture was taken, which included four generations, namely Mrs. Nancy Shankland, her son Elmer, his daughter, Mrs. Clarence O'Neil, and her daughter Roberta.

There were in all about forty descendants present, made up largely of local people and W. E. Linn of Clayton, Ill. There were many other descendants living in Clackamas county, who were unable to be present.

Card of Thanks.

We wish to thank our many friends and neighbors for their kindness during the illness and death of our wife and mother.

R. H. Monckton and Family.

Notice Correspondents

If you are out of stationery and postage, don't be backward about notifying the Progress office, for the furnishing of these supplies is the least we can do to repay you.

Neighbors Not Suspected

After several days and nights of secret detective work, L. V. Congdon of Currinsville has gained sufficient evidence to warrant the conclusion that the "Missing Six Loaves of Bread" is the result of a prowling dog and wishes to have the Progress state that no neighbors are or ever were suspected.

New County Officers Begin

The newly elected county officers who began their duties last Monday morning are, Miss Iva Harrington, County Clerk; H. H. Johnson, Surveyor; E. P. Dedman, Recorder; Adam Knight, Commissioner; and W. J. Wilson, Sheriff.

Notice

Persons knowing themselves to be indebted to Dr. Haviland will please make settlement with the Doctor's widow at Estacada Hotel at the earliest possible moment, thus conferring a favor and kindness upon Mrs. Haviland. Creditors will please send itemized statements.

High School

Election of Student Body officers tomorrow afternoon. Great interest is being taken and several offices are being hotly contested.

The Freshmen pennant can now be seen hanging proudly with those of the other classes, in the assembly room.

Be sure and plan nothing for the night of January 29th, as that is the date the High School play will be given.

The Basket Ball team goes to Canby next Saturday to play the High School team of that place. Following will be the line-up: Dale C., Gard and Wagner F., Denny and Bartlemy G. With this new line-up E. H. S. ought to win.

Remember that our affirmative team in debate, meets the Dayton negative team in the High School Assembly Hall one week from tomorrow night at 7:15. We have a good chance for the district championship, and if a large crowd is present, we will surely win. Come and hear both sides of the Government ownership of railroads expounded.

Mrs. N. L. Kirchem of Oregon City, spent Christmas with her parents, Mr. and Mrs. J. C. Duus of Lower Garfield and the following Saturday the entire family were entertained at a dinner given by Herman Duus and wife.

Mr. and Mrs. Lawrence Crudinsky entertained a number of the young people of Springwater at their home on New Year's Eve, with dancing and music. Amid a thundering volley from the family artillery, the guests sat down at midnight to a delicious luncheon.

S. R. Wooster and family and Harold Wooster and wife have moved back to their residences on Broadway, in Estacada. Tom Watson and family, who have been living in the Bates house on Main Street, have moved into the house recently occupied by the Woosters in South Estacada.

HORSES AND SWINE.

Shoes should be reset every four or six weeks, according to the condition of the feet.

Don't forget to provide dry, warm and well ventilated hog houses.

Do not buy a horse that is too light for your work. You will gain nothing by overburdening him. He will soon become unsound and wear out.

Don't feed the brood sow too much corn.

If your horse falls don't shout at him or beat him; help him to get up.

Raise horses for big money, cattle for sure money and dogs for quick money is an old saying and a good one.

FOODS THAT MAKE HARD SHELLED EGGS

The feeding of hens for the production of hard shelled eggs not easily breakable in handling is possible and demands attention. Shells vary greatly in strength. A strong, heavy shell is not nearly so likely to be broken by the jars, jolts and rough handling incident to ordinary shipment as a weak one.

Chemical analyses show that the shell of the egg is largely carbonate of lime, but that it also contains carbonate of magnesia, mineral phosphate and some organic matter. If strong shells are to be produced the mineral elements must not be lacking. Grains that are ordinarily fed do not contain these mineral elements in sufficient proportions, and an additional and separate supply is necessary. Fortunately these mineral elements are available in much cheaper forms than in grains.

It pays to dry pick poultry. The fowl looks, keeps and tastes better. Hang birds as shown in the picture. With head in one hand grasp large wing feathers firmly with the other and withdraw next the tail feathers, then tender portions of the body, such as abdomen, breast, back and thighs. Grasp a small handful at a time and pull in direction of least resistance.

Lime is the principal ingredient of oyster shells, which may be procured for \$10 to \$12 a ton. Iron, magnesia and often phosphorus in many kinds of artificial grit may be procured for about the same price, while these elements in grain would cost at least double these figures.

Bone meal contains phosphorus in appreciable amounts besides lime, magnesia, etc., and, while expensive, it is effective in giving the shell an evenness and fineness of texture which adds much to its strength. It is therefore often used as an ingredient for dry mashes for laying flocks, usually in amount varying from 3 to 5 per cent.

Hint For Hog Raisers.

It is a common mistake with many to try to keep too many sows or more than they can give proper attention to during the periods of pregnancy, birth and suckling. During all three periods they must be cared for correctly if good results are expected with the litters.
