That Hard-Worked Dollar

One of the main results of the present quiet business conditions in and about Estacada is the delayed collections.

Every merchant in Estacada is experiencing this same embarrassment. His bills are usually due the 10th day of the month succeeding purchase and the big Portland and other foreign firms, extend little leniency. In the case of the local customer, there is a personal friendship element that does not appear in the transaction between the merchant and the firm that he buys from. Consequently the local merchant is averse to pressing his collections for fear he will hurt a customer's feelings and with the delayed payment of accounts by his trade, he is hard pressed by his creditors.

There is not much actual money in circulation in this part of the state at this time and little outside money is coming in, consequently trade has to be handled by the steady passing around of such currency as is in circulation.

A dollar in Estacada pays a lot of bills in the course of a month, and usually merchant number 2 cannot pay his bill until number 1 has passed on that dollar, etc. an infinitum.

If you are one of the fortunate ones, who has money on hand these days, make it a point to pay your bills just as early in the month as possible and within a week the chances are that the money has satisfied many accounts and eliminated a lot of hours of worry on the part of the various people, who are trying to make their collections by the 10th.

The 28th session of the Oregon Legislature began last Monday and from now on the news columns will be full of nays, yeas and brays.

As ever, all promises are for a session confining its energies to economies and the passing of fewer and better bills, but the outcome will probably be a repetition of former years with bills galore on the program and every new legislator striving to reach the lime light, by way of a new bill aimed at that old familiar mark, the corporations. The Progress will not have a special correspondent at Salem during this session, but it will try to keep the local people well informed as to the doings of the Clackamas County representatives and it hopes to be able to chronicle only wise and sane actions on their part.

The Southern Pacific has announced the rates which will apply to tourist travel between Portland and San Francisco during the period of the great exposition, tickets to be on sale daily between February 15 and November 30. On 90-day limit tickets the rate will be \$35; on 30 day tickets, \$30; on special occasions, such as important conventions, & a round trip rate will be made of \$26.75 with a 15-day limit and stop-over privilege on the return trip. To the exposition at San Diego, the road will make a round-trip rate of \$52.25 with a limit of 40 days and stop-over privileges both ways.

Oregon School Children to Raise Hogs

A conference of far reaching importance to the livestock industry of the Pacific Northwest was held at the Portland Union Stockyards a few days ago. As a result of this conference, arrangements have been made whereby it will be possible to send out 1,000 or more brood sows to the boys and girls of Oregon, these animals being treated for, and guaranteed against cholera. The sows are not to be given away, but are to be sold at prices ranging from \$18 to \$25 each, and in payment the Stock people will accept a note running from 8 to 10 months at 6 per cent interest, the note to be indorsed by the father of guardian of the boy or girl and approved by the county school superintendent. The family of infant porkers will appear in four or five weeks after shipment of the sow, and the boy or girl will have plenty of time before their note matures to bring

the pigs to a marketable age and dispose of them to the best advantage, paying off the note with the proceeds of the sale. In the work done by the hog clubs of the Northwest last year, an eleven year old girl at Washougal, Wash. made a clear profit of \$79 on one brood sow. In this instance two litters, 24 pigs in all, were produced. Local educators have expressed the opinion that this is the most important step ever taken in this line of work and, as far as known, the first movement of the kind ever started in the United States.
