### News Notes From All Sections

A team belonging to Eb. Lacey of Springwater, while in charge of his son, Ivan, joined in a runaway one day last week. They started near Horner Bros.' mill and ended up off a bridge near the old Conette place. Aside from a skinned horse and broken wagon, no harm was done.

Supervisor Millard has placed an order for \$500. worth of planks to be used on the roads in the vicinity of Dodge.

W. F. Cary of Estacada returned home last Tuesday night, after a few days trip on the upper waters of the Clackamas, where he visited the Cary Hot Springs, Camp Kilkare and other points.

A Mr. Brash of New York, who owns a large farm in the Viola district, visited there this week, to consult with the engineers regarding the crossing of his land by the South Fork pipe line.

Fishermen should evercise due precautions when fishing in the Clackamas near the construction work on the South Fork pipe line, as much blasting is going on.

Joe Youngstrodorf of eastern Oregon has rented the Ward house in Viola.

### More Fords Afforded

Messrs. Frank Ewing of the Upper Dam, J. P. Steinman of Currinsville and Wm. Held of George, purchased Ford autos in the past week, through the local agent, J. W. Reed of Estacada.

Ewing temporarily is keeping his machine at the Estacada garage, but will soon have the wheels equipped with flanges, so that it can be operated on the railroad track between Cazadero and the Upper Dam, and with the completion of the road from Cazadero to Estacada, can use the machine from his home direct to Estacada, with a slight delay for removal of flanges.

Bert Moore of Faraday has purchased a Saxon car and other residents there are considering buying machines, as soon as the Estacada-Cazadero road is completed this summer.

A number of the 8th grade pupils from nearby schools were Estacada visitors last Monday, where they enjoyed the Websterian-Adelphic program, given at the Estacada school.

### Ration For Cows.

A very acceptable ration can be made by letting each animal have daily thirty pounds of corn silage and all the clover hay she will consume. says Hoard's Dairyman. A mixture consisting of 300 pounds of corn chop, 300 pounds of ground barley, 300 pounds of bran and fifty pounds of oilmeal will go very nicely with this roughage. Feed about one pound of this mixture for each three and one-half pounds of milk produced.

### When Hay is Cured.

One of the methods of determining whether hay is fit to stack is to take a handful and twist it as hard as it can be twisted with the hands, and if no juices are forced out of the stems it is considered ready for the mow. as a rule. Where it is cured in the cock it should be spread out to the air and the sun from one to two hours before hauling to the barn.
