Rands Elected To Water Board

H. A. Rands, chief engineer of the South Fork pipe line, was elected by the Oregon City council last week, to fill the vacancy on the water board, caused by the resignation of Commissioner Caufield.

The selection of Mr. Rands is a wise one, for he has not only been the engineer in charge of the work, but has been one of the prime movers for pure water since the days of Oregon City's typhoid epidemic.

Wood By Cord Only

According to the latest rulings of Thos. B. Kay, state sealer of weights and measures, hereafter all coal and ice must be sold by weight, and wood by the cord.

The former system of selling wood by the load will not be permissible and District Sealer Ball is now notifying all Clackamas county dealers of this legal provision.

O. A. C. Bulletin

A preliminary bulletin calling attention to the advantages of the Oregon Agricultural College has been received at this office. This bulletin should be of interest to all boys or girls contemplating pursuing a higher educational course. It offers a complete course of studies, besides the other attractions of university life. Last year's enrollment numbered 4175 as against 680 ten years previous, which gives a partial idea of the growth and value of this Oregon institution. Write to the Register at Corvallis for copies of this bulletin and other catalog information.

It will also be noted elsewhere in this issue the advertising of the University of Oregon, calling attention to the advantages of that famous institution.
