Dodge Bros Automobiles

have the best of materials, workmanship, and comfort. You start everything—the engine, lights and car—from the seat. A starter that starts, lights that light and only a slight finger press does it. They climb any hill and go up to 60 miles. The DODGE BROS. have millions back of them and are the oldest automobile part mfgs. in the U. S. The DODGE has been tried out under all severe tests for two years before being put on the market. REMEMBER that TIMKEN BEARINGS are on the best cars made and the Dodge has them throughout.

A demonstration anytime gladly given.

Men Who Harm A Town

Those who oppose improvements.

Those who "knock" strangers and who "knock" the town to strangers.

Those who show hospitality to no one.

Those who hate to see others succeed.

Those who distrust public-spirited men.

Those who oppose every movement which does not originate with themselves.

Those who oppose every enterprise that does not appear to benefit themselves.

Those who enjoy the benefits that come from the work of public-spirited, broad-minded men, but who give nothing but criticisms in return.

Do you b'long? Why not reform?

It is a splendid thing to be a part of a wide-awake city. It is a splendid thing to know that your own strength is infinitely multiplied by the strength of other men who love their town as you do. It is a splendid thing to feel that the wholesome blood of a community can be united in common purposes, and that by frankly looking one another in the face and taking counsel with one another, prejudices will drop away, handsome undertakings will arise, a universal spirit of service will be engendered, and that with this increased sense of community of purpose will come a vastly enhanced individual power of achievement; for we will be lifted by the whole mass of which we constitute a part.

Drying Seed Corn.

Drive nails into a barrel or short log about every three inches, and on to each one push the cob end of an ear of corn. Many bushels of corn may be put in a big barrel in this manner.

Hang the barrel or log, as the case may be, from a rafter or other strong support in a well ventilated room. Corn dried in this manner is in excellent condition in the spring.—Farm and Fireside.
