FAIR OPENS AUSPICIOUSLY

Currinsville Wins Community Prize

The second annual East Clackamas County Fair opened its gates Wednesday morning and its first day's attendance showed an increase over last year.

The new location on the school grounds with the play shed for the main exhibit hall, is ideal, being a big improvement over the former location in the park.

The exhibits are on a larger scale than formerly, largely owing to the keen competition between the four districts contesting for the community prize. The judges were taxed to the limit of their judicial capacities to decide as to which exhibit ranked first, their final decision being, Currinsville, first; Garfield, second; George, third; and Springwater, fourth. Only a few points separated the first and last awards.

A slight misunderstanding had occurred in connection with the community exhibits, owing to the eleventh hour boundary arrangements which were made between Garfield and Currinsville. This unavoidable misunderstanding with the system of scoring adopted at the last minute, greatly handicapped the George district and naturally resulted in a protest being registered by that bunch of hustlers. There is no doubt but that all misunderstandings and a final adjustment of the trouble will be amicably arranged when the committees can get together, as everyone is working for the success of the fair and the errors of this year's exhibiting system, will act as an example for the future.

In the awarding of the grand prize for the best cow, highest honors were awarded the Jersey animal of Ed Shearer of Garfield, with second honors going to Lloyd Ewalt of Springwater.

The Eugenics contest was held Wednesday morning at the C. I. C. rooms and resulted in the following scores, Victor Forman of Barton, 98%, with the following tied at 97 1/2%, Wm. Kaake, Jas E. Tenney, Henry Aue, John C. Kilgore and Winifred Stephens.

The Wednesday afternoon baseball game, owing to several delays was not as interesting as it should have been, but resulted in a victory for Springwater against Garfield by the score of 13 to 6.

A more detailed report of the fair will appear in next week's issue of the Progress.

Lodges, Clubs, Granges or other Organizations

Does your club room need a new instrument? Do you want a piano, player piano, organ or phonograph? We will make you a liberal allowance on your present instrument and will so arrange the balance of your payments, that the purchase of the new instrument will not prove an embarrassment to you.

R. M. Standish
Estacada Agent

Advise us of your wants and ask for our price list of slightly used pianos and organs.

Portland, Oregon

THE "GREATER OREGON"

With new buildings, better equipment, enlarged grounds, and many additions to its faculty, the University of Oregon will begin its fortieth year, Tuesday, September 14, 1915. Special training in Commerce, Journalism, Architecture, Law, Medicine, Teaching, Library Work, Music, Physical Training and Fine Arts. Large and strong departments of Liberal Education. Library of more than 55,000 volumes, thirteen buildings fully equipped, two splendid gymnasiums. Tuition Free. Dormitories for men and for women. Expenses Lowest. Write for free catalogs, addressing Registrar

FLOWERS IN WINTER.

Flowers, like people, require fresh air. Ideal conditions of temperature and ventilation for human beings will be found satisfactory for flowers.

It won't hurt plants to have a bath occasionally to remove the dust from the leaves and open up the pores. This is best done by placing the plant in the sink or a tub and spraying the leaves with water. A damp sponge can be used for this purpose. If necessary a little soap may be used.

If the leaves on your flowers get yellow and drop off it is quite possible that you have been overwatering the plant or possibly have been drowning it. Sometimes plants need watering every day, and, again, once in two days is enough. No exact rule can be given. If you rap your knuckles sharply against the pot and it gives forth a hollow or ringing sound the plant needs watering.

In winter the plants should not be repotted. The best time to repot is in the spring. In winter the roots of many plants lie dormant, and the roots should never be disturbed during this period.

One of the greatest enemies of plants grown indoors is coal gas. Humidified gas is nearly as bad. The slightest trace of gas will retard the growth of the new leaves. — M. F. Aborn, Kansas State Agricultural College.

WITH THE POULTRY.

For the first few months of their lives, or until they are well feathered out, dampness is very fatal to young turks.

Wheat bran has been found a wholesome food for growing chicks and can be kept before them at all times in hoppers, with good results.

Turkey hens often begin to lay in March, but May is early enough for the first poult to hatch out.

Before placing the chicks in the brooder the floor should be strewn with sand and alfalfa leaves or chaff. If a little granulated charcoal is mixed with the sand it will be all the better.

Too much insistence cannot be placed on the importance of keeping the brooder clean.
