*E C S Bulk Coffee at 30c a pound*

## EAST CLACKAMAS SUPPLY CO.

"YOUR SATISFACTION IS OUR SUCCESS"

### Costly Apparatus Ordered

In keeping with the latest methods in up-to-date dentistry, Dr. L. A. Wells of Estacada has ordered from an eastern firm, a complete Heidbrink Gas machine.

This instrument is for use in painless extraction of the teeth and of great value in all dental operations, which would otherwise be especially painful.

### Day of Miracles Not Passed

The office of the Estacada Telephone & Telegraph Company in Estacada is being repainted, L. G. Reiland doing the work.

### Dorcas Party

The ladies of the Dorcas Society of Garfield will give a Halloween party at the Garfield Grange Hall, the evening of October 30th. An entertaining program has been arranged to be followed by refreshments.

### Peppermint Talk

What promises to be a spicy, hot and well flavored talk will be given at the next regular meeting of the Garfield Grange, Saturday afternoon at 2 o'clock when C. F. Turnedge of Crabtree, Or. will speak on the subject of peppermint culture, from the growing of the plants to the market for the extract. All are invited to be present.

### Supplement Discontinued

Beginning with the next issue of the Progress, the Oregon Agricultural College's supplement will be discontinued.

The Progress is sorry to have to make this announcement, especially as it was instrumental in obtaining this valuable innovation, which is now used by many of the state newspapers. But owing to the expense incident to this added service, along with a doubt on the editor's part as to the value of the supplement to the subscriber, this action was taken.

The Progress had tried to obtain the sentiment of its readers as to the value of this feature, but in less than a dozen cases could this be obtained, which naturally argued against it.

While the Progress will aim to reprint articles taken from the supplement, it will be unable to cover the field in this line, as the O. A. C. supplement has done.

In the supplement herewith appears a very instructive article on alfalfa culture, which should be saved for reference by all farmers who contemplate experimenting with this crop. This article points out the amount of seed for the planting per acre, and especially warns the grower not to become discouraged at the second year's showing, etc.

### Mystery Social

Next Friday evening, October 29th in the C. I. C. Rooms will be given a "Mystery Social" under the auspices of the Epworth League of the M. E. Church. A program consisting of mysterious music and stunts will be rendered, followed by refreshments and games. Admission 5 and 10c—everyone invited.

Wm. Palmateer of Morgan, Oregon is spending a few days among relatives in Garfield and incidentally contemplates improving his holdings there before returning home.

The Misses Mercedeth and Vivian James, daughters of Mr. and Mrs. H. M. James of Silverton are visiting at the J. W. Reed home in Estacada.

C. W. Kinney and wife of Biggs, Oregon, where Mr. Kinney is engaged in wheat ranching, returned to their old home in Estacada for a few days visit this week. Incidentally he renewed his Progress subscription, for it seems like a letter from home when the paper arrives on Saturdays.

Mr. and Mrs. S. D. Dunlop of Garfield returned home last Sunday, after an extended trip of about six weeks, during which time they visited relatives and friends in Chicago and New York.
