## OPEN SEASON WITH VICTORY

### Estacada Wallops

#### Portland Team 15 To 0

The crack Portland nine, wearing the pretty uniforms of the "Royal Bakery" last Sunday afternoon returned to their bake-ovens and dough-boards, a badly beaten bunch of bread makers, after appearing against the Estacada baseball team, in the opening game of the local season.

The bakery boys entered the field with plenty of confidence, but after the fourth inning, their yeast either soured or their bread raised too much, for after the blow-up, they looked like a batch of fallen loaves, with only the Royal Bakery trade-mark left.

Owing to the cold wind and threatened rain, it looked as though Estacada would have a hard time to win, especially as the three Douglass boys of Eagle Creek did not show up and the local team was forced to use substitutes, but these same substitutes covered themselves with glory.

Up to the end of the fourth inning, it was anybody's game, with the score 0 to 0 and the Bakers having the best of the hitting. The visitors employed two short armed pitchers, whose wings may have been all right for bread-kneading but were easy marks for the local batters, all but one of whom got one or more safe hits, with Mac Dale of the high school connecting with the first one, and later in the game getting a two bagger. Simmons, Lee Bronson, George Smith and Walter Smith each were credited with one hit; while Goberg, Neil Bronson and Dale took two apiece and Art Smith rang the bell three times, with one three bagger, that would have been good for two home-runs, had the old fence been around the grounds.

Estacada played good ball, with few errors and then not costly ones. Three times the local boys tightened up and supported Art Smith sufficiently to retire the Bakers, when they had from one to three men on bases; in one instance, Walter Smith, a younger brother of George and Art, who was substituting in his best clothes, caught a long fly, whipped it through to second base and retired the visitors with bases full.

That non-breakable, non-tiring throwing arm, which seems to be

## Eagle Creek Grange Picnic

Advertising posters are already in circulation announcing the ninth annual May Picnic of the Eagle Creek Grange, which as in former years, will take place in the cedar grove adjoining the grange hall, on Saturday, May 20.

This May Picnic is one of the gala events of this community and if the weather permits, a big crowd will join the picnickers for that day.

The names of the principal speakers have not been announced yet, but such special features as a May Pole Dance and Scottish Dances have been arranged for.

As usual, a big dance at Cogswell's Hall will wind up the affair, with the Bronson-Erickson orchestra furnishing the music.

Everyone is invited to attend this picnic, to come early, stay late and bring their lunches and children.

an inheritance of the Smith family of Eagle Creek, was in evidence again this year, with George still throwing the ball across the diamond on a level and Art putting it over the plate at shoulder height and with plenty of steam behind.

The fans were all pleased to see the umpiring again in the hands of Ben Anderson of Eagle Creek, who not only knows the game with all of its technical points, but is absolutely fair and able to enforce his authority.

The chances of Estacada having a non-beatable team this year, are better than in years past and with two or three of the Douglass boys in the line-up hereafter, the fans will have plenty of chances to root on the winning side.

Sunday's attendance was good, allowing for the inclement weather and if next Sunday afternoon is pleasant, a big crowd will and should be on hand, to see Estacada play the fast "Brick Layers" of Portland.

Game will be called promptly at 2 o'clock and all players are asked to be at the grounds by 1:30.

Estacada's line-up for last Sunday was

L. Bronson—C.  
Art Smith—P.  
Geo. Smith—1st  
Goberg—2nd  
Simmons—ss  
N. Bronson—3rd  
Dale—LF  
W. Smith—CF  
Wagner—RF

## VALUABLE SILO INFORMATION

### How To Construct

#### Home Made Silos

The current Oregon Agricultural College Bulletin is this week given up entirely to the subject of "How To Construct Home-Made Silos" by W. A. Barr, Dairy Husbandman, O. A. C. and U. S.

This is a subject which is of interest to many farmers in this community now, several of whom have ordered and had installed the DeLaval, Green Feed Silo, through C. C. Saling of Currinsville, the local agent.

While the question remains, as to whether it is more economical in the long run to install a patented made-to-order silo, or a home-made one, this O. A. C. bulletin is of value in any event.

With the Horner Brothers' Mill in Dodge making a specialty of cutting silo staves, probably a combination of the practices advocated in this bulletin, with their manufactured stave, could be economically used.

This bulletin, which may be had on application, thoroughly covers the subject under such headings as—

Value of Silo on Dairy and Live-stock Farms;  
Chute for Silo;  
Painting the Silo;  
Kind of Silo Should Vary with Conditions;  
Locating the Silo;  
Essentials in Plans of Construction;  
Best Size and Capacity of Sizes;  
Laying out Foundations for Stave Silo;  
Silo Floor;  
Silo Door Construction;  
Erecting Silo Staves;  
How to Place Hoops;  
Roof of Silo;  
Using of Scaffolding in Building;  
Use and Make of Forms for Concrete Silo;  
Scaffolding Inside Concrete Silo;  
Constructing the Metal Lath Silo;  
Method of Building Hollow Tile Silo;  
Modified Wisconsin Silo;  
The Octagon Silo; etc.

In writing to the O. A. C. kindly mention this article in the News, as it is the desire of this paper to cooperate more closely with the agricultural college in the dissemination of information of interest to this community.

## ESTACADA GETS CANNERY

### Woodburn Machinery

#### Being Installed Here

It remained for R. C. Deming of Garfield, one of the leading small fruit growers and enthusiastic workers in Clackamas County, to solve the problem of a cannery for Estacada.

For years past, Estacada has made efforts to start such a plant with local cooperative financing, but lack of true cooperation, coupled with scarcity of funds had always killed the project.

Deming has now obtained the necessary financing from outside parties and last week purchased the machinery from the Woodburn, Oregon cannery, which failed some time ago. Aided by the P. R. L. & P. Co., who are furnishing a large boiler for the plant, work on the installing of the machinery is now underway.

The plant is being housed in the old brick plant on the Terrace Addition flat and will be ready for operation by the time the small fruits are ripe.

The plant this year will confine its efforts primarily to the canning of loganberries, raspberries, evergreen-berries, blackberries and possibly gooseberries. Mr. Deming and his Garfield neighbors are now raising sufficient logan and raspberries to keep the plant running and probably will be able to handle all of these fruits that are grown locally, and this fall will specialize on packing prunes and apples.

Mr. Deming will actively manage the cannery, handling the processing and selling, as he is conversant with the work, having put in several months recently in eastern canneries.

Last year, Mr. Deming and neighbors had their loganberries canned at the Gresham plant and marketed through brokers and wholesalers throughout the east, under the wholesalers' own labels. All goods from the Estacada cannery, will be labeled, "Demestore Delicious Quality"—the Demestore, being an abbreviation for Deming, Estacada, Oregon.

The News is safe in assuring Mr. Deming of the good-will and promise of cooperation of the growers of this community and wish him all kinds of success in this infant industry for Estacada and surrounding country.
