In charge of Ray Eschleman as guide, a party of Estacada ladies, consisting of Mrs. Eschleman, Mrs. Annie Morton, Miss Florie Kendall, Mrs. Wm. Kuhrasche, Mrs. C. F. Frazier and Mrs. W. B. Simmons, left Wednesday for a trip to the Cary Hot Springs.

FLOUR

The Ford auto sales record of 550,000 cars in the past year was last week increased one more, by the purchase of a touring car by Archie Howell of Springwater, the deal being handled through the Estacada Garage. Rural Credits Act

Would Aid Farmer

An an nual saving of interest and mortgage cost in excess of three-quarters of a million dollars annually, is expected to result from the operation of the pending rural credits bill if it is enacted by the people at the next annual election. "But this is not," says Dr. Hector Macpherson, of the O. A. C. Bureau of Organization and Markets, in discussing this bill. "It means an end to the perpetual worry and expense of mortgage renewing. It means an end to forclosures, lost homes and blighted hopes. It means better equipped farms and a greater rural prosperity. This in turn means more business for railroads, factories and stores and more work for laborers in our cities.

"Although agriculture is the basic industry of Oregon, our farmers are now far from being prosperous. In addition to high interest rates the long and expensive freight hauls to distant markets and inflated land values have placed Oregon agriculture under an almost unbearable handicap. It is estimated that the average Oregon farm is not making wages at two per cent. on the investment represented. "The farm debt of Oregon se-

cured by real and chattel mortgage is estimated conservatively at \$30,000,000, On this debt the farmers are paying an average rate of 8¼ per cent. interest. Adding to this the cost of renewal and commission the average rate is probably but little under 9¼ per cent. "It is the purpose of the proposed constitutional amendment to take the burden out of the farm mortgage cubus of the state. It purposes to give the farmer a period of 36 years in which to pay his mortgage. The actual rate of interest is 5 per cent. The cost of title and land appraisal varies from \$10 to \$50. The farmer pays off one per cent. of the original sum borrowed each year, that is a payment of six per cent. a year will be sufficient to pay the interest and cost of operation and wipe out the debt entirely in a period of thirty-six years.

"The system is inexpensive. The loan funds will be supplied on the credit of the state, which can obtain lower rates of interest and better terms than any of its sub-divisions or any individual. The cost of operation in loaning the state school funds is only twotenths of one per cent. and this system will be handled in much the same way by the state land board."

Bridge Should Be Lighted

The City of Estacada should go to a slight additional expense to have an electric light placed within the covered part of the bridge crossing the Clackamas.

Last week one of the Estacada women, while driving home with her little son about nine o'clock at night, was held up by some party or parties unknown. While the holdup amounted to

While the holdup amounted to nothing more than the stopping of her horse and the fright ening of the driver, a repetition of the affair would not happen with the bridge lighted.
