

OUR STOCK OF  
**Imported Christmas Toys**  
 HAS ARRIVED

and will be on display about the first of next week. Bring the children in and let them decide what they want SANTA CLAUS to bring this year.

**Park & Closner**

Broadway at 2nd - Estacada, Oregon

**E. H. S. Echoes**

Contributed

The E. H. S. football team has voted to disband for the season.

As a result of last Saturday's football game, Oregon City has the undisputed championship of Clackamas County.

Mr. Guthrie's phone-line was kept busy Saturday night with anxious inquiries, from fond parents concerning the non-arrival of their wandering boys.

The orations to be given by the students of E. H. S. on Dec. 5th, have been sent to the University of Oregon to be graded as to composition.

A new and larger radiator has been installed in the sewing room in the basement.

The Estacada Schools lost a number of good pupils when the Turels left for California to join the Socialist Colony.

The Freshman - Sophomore affair last Friday evening was a "howling" success. Among the "guests of honor" were some of the "rough necks" from the upper classes.

Lloyd Ewalt, according to information received at the principal's office, is now manager of the Eclipse Stock Farm near Mollala.

The football game at Oregon City was not the only attraction as several of the old students and friends of E. H. S. were present. Among them were Miss Lela Traylor and Mr. Irvine.

Glenn Douglass is expected to return to school soon, after an absence due to a severe attack of whooping cough.

Earl Wagner returned Wednesday to Estacada, following a few months absence at Tidewater, Oregon, where he reports having shot a deer or two and landed his share of the big fish.

**Shooters Attention**

To date about a half dozen shot gun enthusiasts have notified R. M. Standish, Secy. of the Estacada Rod & Gun Club, of their desire to attend a clay pigeon shoot on Thanksgiving Day or the day before.

If a dozen participants can be gotten together, a shoot will take place, with turkeys, geese and fowls for prizes, but unless more marksmen notify the club that they wish to take part, the affair will be called off.

Of the half dozen who have signified a willingness to attend, the majority prefer to hold the shoot on Wednesday, the day before Thanksgiving. So if you want to join with the scatter gun artists, advise the club secretary at once and state what day you prefer to shoot.

**DANCE**

**Garfield  
 Country Club**

All Night  
**Friday**  
**November 24th**

**Tickets \$1**  
 Supper Included

**Estacada Music**

**Everyone Invited**

**Electric Lights**

**On Your Farm**

**For Less Than 5c Per Day.**

This is made possible by the installation of the new

*Delco Lighting System*

for farms and homes that are not served by the power companies.

This *Delco Light* consists of a gasoline engine, a dynamo and switch-board combined in one unit, weighing but 325 pounds, exclusive of the storage batteries, which are furnished as a part of the outfit.

It is a *Low Voltage System*. (32 volts), as this saves battery expense, at the same time it is sufficient voltage to operate light machinery, in addition to furnishing light for the house, barns and other buildings.

It also enables the use of *Standard Lighting Fixtures* without the slightest danger in handling.

The *Gasoline Engine* is of the air cooled type, with no danger of freezing, and being *Self-starting*, requires only the closing of a switch which starts the engine and automatically stops when the batteries are charged.

The *Batteries* are of the sealed glass jar type and will not freeze at 20 degrees below zero.

*Any number of Lights* may be installed up to 50, as the average farm uses only a few at a time.

The *Storage Battery alone* will carry 15 twenty-watt lights for 8 hours, and when the engine is running, will carry 32 twenty-watt lights continuously.

By using the same precaution as on a meter system the engine need only be run at intervals of perhaps twice a week to keep the batteries fully charged.

As limited space prevents us giving a full description of this wonderful system. *You Owe It To Yourself* to come in and see it operate - on exhibition at
