To Whom it May Concern:—

We wish to inform the readers of this column that the official editorial staff of the E. H. S. has decided to take a much needed vacation, and have asked us to substitute our untrained talent for their fluent and exuberant flow of English.

The basket ball season is now on. The girls will have a school team this year and with such players as Nettie Woodle, Sadye Wilcox, Josie Harkenrider, Emma Barr and others we expect to win every contest.

The boys expect to make a better showing than in previous years. Atle Erickson, Clyde Denny, Herbert Kraush, and other able men are trying out for the team.

A report has reached us thru several of the High School pupils who attended the meeting of the Garfield Grange that Mr. Guthrie, unfamiliar with chicken dinners, ate too much, and as a result, was unable to talk fluently when called upon by the lecturer and retired early because of an attack of indigestion.

Thanksgiving vacation began Wednesday afternoon. We consider it a fortunate event as many of the Freshies look gaunt and weary. They have not become accustomed to saving for the turkeys and pumpkin pie, like their upper classmen.

Fancy steps and snatchy tunes which might be observed when the instructor's back is turned indicate the pupils plan for the holidays.

An attack of arm bands and school penants has besieged the

members of Estacada High so please don't mistake us for I. W. W.'s or Salvation Army enthusiasts when you see us wearing our green and white. We are only patriotic to our "Good Old High."

The Gresham Cannery, which for two years past has been one of that city's leading industries, was last week destroyed by fire.

Lew Palmateer of Garfield returned home last week, after a four months absence at Morgan, Oregon, where he has been employed.

Floyd Spurlin of Springwater, who up to a few months ago was manager of the Springwater Store, is leaving this week with his family for Corvallis, where he will enter the mercantile business.

Mr. and Mrs. W. R. Reid of Garfield are entertaining a number of friends on Thanksgiving Day.

Among the Thanksgiving guests at the Walter Givens home in Estacada will be Mr. and Mrs. Jake Hutton, Mr. and Mrs. Sam Sweetland and Mr. and Mrs. Shafer of Portland.

C. A. Carothers, a stock man of Robinette, Baker County, Oregon is visiting at the home of his half-brother, S. E. Wooster of Estacada. In as much as the brothers had not met for over 29 years, the present visit is an especially welcome one.

Electric Lights

On Your Farm

For Less Than 5c Per Day.

This is made possible by the installation of the new

Delco Lighting System

for farms and homes that are not served by the power companies.

This *Delco Light* consists of a gasoline engine, a dynamo and switch-board combined in one unit, weighing but 325 pounds, exclusive of the storage batteries, which are furnished as a part of the outfit.

It is a *Low Voltage System*, (32 volts), as this saves battery expense, at the same time it is sufficient voltage to operate light machinery, in addition to furnishing light for the house, barns and other buildings.

It also enables the use of *Standard Lighting Fixtures* without the slightest danger in handling.

The *Gasoline Engine* is of the air cooled type, with no danger of freezing, and being *Self-starting*, requires only the closing of a switch which starts the engine and automatically stops when the batteries are charged.

The *Batteries* are of the sealed glass jar type and will not freeze at 20 degrees below zero.

Any number of Lights may be installed up to 50, as the average farm uses only a few at a time.

The *Storage Battery alone* will carry 15 twenty-watt lights for 8 hours, and when the engine is running, will carry 32 twenty-watt lights continuously.

By using the same precaution as on a meter system the engine need only be run at intervals of perhaps twice a week to keep the batteries fully charged.

As limited space prevents us giving a full description of this wonderful system, *You Owe It To Yourself* to come in and see it operate - on exhibition at
