### "Oregon Voter" Says

#### Oregon City Hogged Road Money

The "Oregon Voter" in its issue of Feb. 3rd, in commenting on the Clackamas County division question, in part says:—

"At the hearing, the inequalities in the handling of road funds by the Clackamas County court were strikingly presented in a series of graphic charts prepared by the accounting firm of Whitfield, Whitcomb & Co. The standing of this firm insures the accuracy and impartiality of anything it sets forth in the way of a report or presentation.

It was brought out that for the last seven years, the districts in the proposed new county had levied an average total of 52 mills for road purposes, while the districts near Oregon City had during the same seven years levied an average of only 12 mills. Of the heavy tax levies made in the districts within the proposed new county, only 83 percent was returned for expenditure within those districts, while 88 percent of the taxes levied by districts near Oregon City were returned for road work. It was also shown that the "Cascade County" districts had received a far less proportion of the general road fund of the county, in proportion to the money raised in their districts, than had the districts adjacent to Oregon City.

The lesson of the figures was that Oregon City, by virtue of its preponderance of population had "hogged" the road money, leaving the taxpayers of "Cascade County" districts in the lurch.

The Cascade County people are hopeless of getting a county division by vote. They feel their only chance for justice is in relief by the legislature.

Miss Edna Kennedy called on Miss Myrtle Hoffmeister last Friday evening.

Mr. and Mrs. Roy Douglass and daughter, Reva; Mrs. Viola Douglass, Mrs. H. S. Jones and Mrs. R. B. Gibson were guests at the home of W. H. Douglass Sunday afternoon.

### Bethlehem's Bid on Shells for the United States Navy

To the American People:

The Secretary of the Navy has awarded contracts amounting to over \$3,000,000 to a British bidder for 14 and 16-inch projectiles for the Navy because of very much lower prices offered by the English bidders.

We know nothing of the basis upon which the British bids were made, but the public is entitled to know the facts upon which we ourselves bid for this work.

Two years ago we took contracts to make 4,200 14-inch shells at a price of \$1,515,000. Up to now not a single shell has been accepted by the Government, although we have expended, in wages, materials, etc., on these orders \$522,881, and we have not received a SINGLE DOLLAR on these contracts.

In addition, a literal interpretation of the contract might make us liable for penalties amounting to \$678,916.

In the light of our experience, and having no other basis, we bid for 16-inch shells approximately the same rate per pound as that which the Navy Department actually awarded a 14-inch shell contract one year ago.
