A seven-year-old in a town down south was asked by his teacher at the primary school to produce a composition upon the subject of his favorite literary work. The youngster went into executive session with himself and turned out the following succinct criticism of a well known and popular classic:

"The Book I like best is called Pilgrim's Progress. My mother reads this Book to me every Night before I go to Bed. I love to hear about The Pilgrim. He had a hard time, but he got by!"—Saturday Evening Post.

Growing Cotton.

The yield of cotton is dependent upon the number of flowers we are able to induce the plant to form, and root space is necessary to flowering. The cotton plant's normal rooting may occupy two square yards of earth, which is several times more than given it in practice, and the yield may often be reduced by this fact, as the roots must interlap.—Los Angeles Times.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts thru the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Cure fails to cure. Send for circulars and testimonials.
