eastern portion on the north side of the Clackamas, including Barton, Dover, George, Garfield and Estacada and a small portion on the south side of the river—this new Small Claims Department should be a busy one and a time and money saving one for the settlement of accounts too small to warrant the expense of regular court trials.

MAKE YOUR MONEY WORK.

Get It Out Earning For You, but Be a Careful Investor.

Money is a workman. It works for its owner while the owner sleeps, and it will work for anybody who has it if he will only put it to work, for there is always somebody ready to hire money and pay for its use.

Let every reader who has a few hundred dollars to spare put it in a good \$500 or \$1,000 bond on the partial payment plan and let it earn something. Five hundred dollars invested in a 6 per cent bond (with the income deposited in a savings bank at 4 per cent) will double itself in twelve years—that is, the \$500 will have become \$1,000 in that time. This \$1,000 at 6 per cent will earn \$60 a year, or over \$1 a week, for its possessor. Even at 5 per cent it will double in fifteen years and at 4 per cent in eighteen years.

The lesson the small investor wants to learn is that his money is just as good as that of the larger investor. The former has greater need of being careful because he has less to spare.

Learn to be a careful investor. The first thing the careful buyer does if he wants to buy a horse, a cow, a house or a farm, a bond or a share of stock is to make a careful investigation. Schoolboys may swap the jackknives they hold in their closed hands, but grown up men ought to know better. The humblest investor can buy with as great safety as the proudest, for both can deal with the same bankers or brokers in these days when small lots are popular with firms of established character.
