#### GET BACK TO NATURE.

Live the Simple Life and Win Health and Happiness.

The movement to return to nature and simple life is the solution offered to the high cost of living problem, but health experts and enthusiasts have found it to be the only way of right living or healthful living known today. They have adopted it as a safe road to health. They say that a return to nature means good digestion, sound sleep, a clear head, a placid mind, contentment and joy to be alive.

But first, they say, it means getting close to nature—living out of doors as much as possible by working, playing and resting in the open air and, above all, by sleeping in the open air. "Outdoor sleeping is the best life preserver known." It means also going to the garden and orchard for your bill of fare—tomatoes, lettuce, celery, spinach, turnips, beans, corn, peas, melons, berries, apples, peaches, plums and all other fruits and green stuffs untouched by fire.

The real value of adopting the simple life, according to the health experts, lies in the pleasure we find in living it. To do it grudgingly or without knowing and appreciating its benefits we botch it and fail, but to love health more than appetite and seek it is to have health, comfort, efficiency and a long life. "Start the simple life—begin it today." is the motto of this health movement.—North Carolina State Board of Health Bulletin.
