

## Goodyear Tires

Built as well as we know how, the Goodyear tire has come to a stage of perfection. Years of experience has taught us a great deal and you who use the Goodyear get the benefit of years of experience. Its reputation and employment are steadily and swiftly gaining, as word of its advantages become more widely spread. Today it is the standard equipment on a pronounced majority of the finest motor cars built in this country. Goodyear cord tires cost more money to build than do tires of an earlier type. It is the experience of users, that despite the somewhat higher cost the Goodyear cords cost less in the end.

## LITTLE ISLAND HAS HISTORY

Helgoland, Small as It Is, Figured Prominently in the Affairs of the World.

Before Germany acquired the island of Helgoland and sent 2,000 soldiers there to man the fort, the citizens were law abiding. When there was an occasional misdemeanor no need to send a police "lookout" warning. An islander, when arrested, would go to the little jail and inform the keeper he was imprisoned.

In ancient times the island was called Hertha. A temple of Foesta, a Frisian goddess, was there. From the tenth until the fourteenth century it was independent. Then the dukes of Schleswig took it over and used it mainly as a pawn for loans until the Danes acquired it 400 years later. Denmark ceded it to Great Britain early in the nineteenth century and the British, while recognizing its military importance, fortified it only for defensive purposes. But the Germans built a great sea wall of granite and steel, at a cost of \$30,000,000 and spent millions more on turrets and big guns.

Visited by so many nationalities, the islanders absorbed customs and ideas of many lands, yet seemed to adorn each with a distinctive touch. They even had a curious quirk in their Satan—a wooden leg—so painted in a picture of the "Nuptial of Christ" in the historic church by the island artist of the seventeenth century, Andreas Amelink. Hence a Schleswig saying: "In Helgoland the devil goes on crutches."

## NO CHANCE FOR PICKPOCKETS

Woman Can Carry Her Valuables and Indulge in Laugh at Light-Fingered Gentry.

The traditional bank in which women keep their money is not always a very convenient place, although it is safe, for the money has a tendency to slip down, and then the owner has to dig perhaps as far as her shoe tops to get it. To obviate this disadvantage Leonard Careless of St. Paul, Minn., has invented a purse which is attached to the pendant garter and may be fastened either inside or outside the stocking.

The inventor has just received a patent upon this device, the details of which will readily be understood from the diagram.

### Full Explanation.

Private Hodges sat in his hut trying to clean his rifle. Suddenly he heard his name called.

"Here!" he shouted, running out. "Wanted in the orderly room," said the sergeant; and Hodges followed him with bulging eyes and a sad heart. But he cheered up when the adjutant addressed him thus:

"I have a letter from your father. He is anxious to purchase your discharge, as he needs you to help him in his business," remarked the adjutant looking at him keenly. "Now, Private Hodges, what is your father's walk in life?"

Hodges eyes bulged more than ever. "P-please, sir," he blurted, "he's b-b-bandy!"

## The Scrap Book

### BEGUN BY THE ABORIGINES

Use and Abuse of Narcotics Cannot With Justice Be Laid to the White Race.

The use of cocaine and tobacco as narcotics was begun by the aborigines long before the new world was discovered by white men. Cocaine is a derivative of cocoa. Natives mixed it with dried cocoa leaves, lime or other alkalis, or shells ground fine. This was chewed by the natives along the west coast of South America. The practice of mixing alkalis with narcotics was also practiced by tobacco chewers in sections adjoining the "cocoa chowers" land. Then it suddenly made its appearance on the Pacific coast of North America. Just how this happened is a puzzling ethnological problem, as the two countries are so widely separated.

Taking snuff was correlated with the chewing habit. Smoking was the most widely distributed method of using tobacco. Three original ways were localized: with the elbow pipe in the greater part of the United States, Canada and the eastern part of South America; with the cigarette in Mexico, Central America and the western United States, and the cigar in the West Indies and the greater part of the Amazon countries.

### TO THOSE WHO STAYED AT HOME

You stayed at home? Ah, is it anywhere  
Written or said you did not do your share?

The silver chevrons!—cast them not aside  
But wear them, wear those honor stripes with pride.

You stayed at home, but if you only knew  
How we, across the seas, relied on you!

Were we unmindful that, with hearts of flame,  
You re-enforced us, though you never came?

Had it been ours in vain attempt to bleed,  
You would have come, to help us in our need.

You did come over, for your hearts were there,  
And thus, more than you know, you did your share.

Whose merit, if by fate's decree we went?  
Whose fault, if you by fortune were not sent?

Chance smiled on us, and so, in battle's din,  
We took the part you would have gloried in.

They say we fought full well—we fought and won,  
Is that not just the thing you would have done?

If we went bravely through the nether hell,  
You, who are like us, would have done as well.

Then share with us the glory, for we found,  
You helping us, enough to go around.  
—Capt. Vernon A. Vrooman, U. S. A., in New York Times.

### City Will Guard Its Records.

Kansas City, to guard against the destruction by fire of the records of the city engineer's office, is going to buy a camera and have photographic copies made of every record. The copies, which will be 11 by 14 inches in size, will be stored in some place away from the city hall. It is estimated that the whole expense will be less than \$2,000.

### Temperamental Differences.

She—A man doesn't love as long as a woman.  
He—Humph! She doesn't love long if she finds the man is short.

## DEAN OF PAINLESS SURGERY

Joseph Lister Lives in History as One of the Greatest Benefactors of Mankind.

One of the world's greatest benefactors was Joseph Lister, the eminent English surgeon who was the first to apply the antiseptic system of surgery, of which he was the discoverer and pioneer. Lister died seven years ago. The first great advance in modern surgery was made during the second quarter of the nineteenth century, when Godwin, Mitchell, Jackson, Wood-Bahe and Doctor Morton discovered and applied anesthesia, which did away with the pain and horrors of the operating room. Since then vast improvements have been made in anesthesia. It remained for Lister to introduce antiseptic surgery or treatment to kill germs in surgical operations and accidental wounds, by which the lives of thousands have been saved. In addition to this important discovery, he made important observations on the early stages of inflammation, the coagulation of the blood and other matters. Lord Lister (he was elevated to the peerage) was surgeon extraordinary to Queen Victoria and later to King Edward.

### Red Cross Work to Continue.

The ambulances of the British Red Cross are to be among the war-workers that will never be demobilized. The pick of that great park of ambulances, familiar to every soldier who has landed at or left Boulogne, will form the nucleus of a permanent service, in which all England will share. A commissioner is now at work finding homes for 500 of these ambulances, and is so mapping out the country that, if possible, no place shall be more than 15 miles from an ambulance, which shall be at the service of any doctor who has a serious case to move to hospital. All these ambulances will be under a central control, which will guarantee the efficiency of the car and the service; and the organization will have the active assistance of those who have learned all there is to learn about the running of ambulances during the war. The rest of the ambulances being over-much war-worn, or not specially well suited, will be added to the enormous total of cars and motorcycles now being sold or scrapped.

### First Thrift Day.

The first "Thrift day" in America was August 11, 1915. That was the first time one special day was ever officially set aside for the purpose of encouraging attention to thrift. The day was celebrated in California as "Thrift day" in response to a proclamation of Governor Johnson. The occasion marked the opening of the thrift congress, held at the Panama-Pacific exposition by the American Society for Thrift.—Thrift Magazine.

### Two Sides to It.

Mamma—Now, Freddy, mind what I say. I don't want you to go over into the next garden and play with that Binks boy; he's very rude.

Freddy (heard a few moments afterward calling over the wall)—I say, Binks, ma says I'm not to go in your garden because you're rude, but you come into my garden—I ain't rude.—Farm and Home.

### A Real Ambition.

"Is he ambitious?"  
"I should say so. He says he'll never be content until he can drive a golf ball 200 yards every time."

### Of Course Not.

"Cost me \$10 today just because I was honest."  
"Oh, well, you don't mind paying a small premium on a good policy."—Louisville Courier-Journal.
