

SUPPLEMENT

EAST CLACKAMAS NEWS, SEPTEMBER 4, 1919

UPPER EAGLE CREEK

Omitted last week.

J. P. Woodle and family attended the A. C. camp meeting down near Troutdale last Sunday.

Mr. and Mrs. Roy Douglass were the guests of Mr. and Mrs. George Preisher recently.

Mr. and Mrs. J. P. Steinman spent Sunday afternoon with Mr. and Mrs. R. B. Gibson.

Mr. and Mrs. E. Naylor, Chas. Murphy and son Perry and Roy Douglass were Portland visitors Monday.

Will Douglass made a brief business visit to Portland on Saturday.

VIOLA BREEZES

(Omitted last week)

The farmers are quite busy just now getting their grain threshed. So far the grain has turned out good, for which they are thankful.

Mrs. Wm. Brown and her two children from St. Johns, Portland, are spending a few days at the home of her parents, Mr. and Mrs. Wm. Mattoon.

Mr. and Mrs. Fred Brash and their two little girls had a narrow escape from being killed on Thursday, as they were on their way to Estacada. On the plank road near the main Springwater hill, their team got stung with yellow jackets which made the horses run away turning the covered top wagon over a couple of times. Mr. Brash had his hand and hip quite badly hurt and Mrs. Brash had her chest hurt. They were all bruised quite badly. Mrs. Brash was in bed a couple of days.

Dr. and Mrs. G. A. Crockwell from Portland, spent Saturday and Sunday at the home of J. H. Sevier and wife.

Charlie Hicinbothem and wife and daughter Alice, from River Mill, spent Sunday at the Sevier home. Wm. Hicinbothem and wife and three daughters were also there to help eat the big chicken dinner and to celebrate the birthdays of Mrs. Crockwell and Mrs. Hicinbothem.

Babe White has moved back on to the H. Cross place which he has leased for another year.

All residents of Clackamas county should be interested in their county fair at Canby Oct. 1, 2, 3 and 4.

Canada and Bull Thistle

The Canada thistle is a noxious plant that we cannot afford to let grow. It is sometimes confused with other plants the principal one being the bull thistle. As the treatment for these two plants is different it is essential that we know which one of these plants is being dealt with. The following points of difference should be noted:

The head of the bull thistle is larger and of a different shape from that of the Canada thistle.

The bull thistle is a biennial plant and does not possess the creeping roots so characteristic of the Canada thistle; hence the bull thistle plants usually occur isolated in the field, whereas the Canada thistles grow typically in patches.

The leaves of the bull thistle are larger and thicker than those of the Canada thistle.

The main stem of the bull thistle possesses a tuft of roots close to the ground, which is not true of the Canada thistle.

The mature plant of the bull thistle is larger and darker green in color than the mature plant of the Canada thistle. The main stem is heavier than that of the Canada thistle.

Whenever there is doubt about the identity of the plant, specimens should be sent to the State agricultural experiment station or at present they may be sent to the Estacada High school agricultural department.

Notice to Canadian Soldiers

We have received the following communication:

"Under the original Order in Council dealing with the payment of War Service Gratuities, men who did not see service in France and men who were discharged previous to the signing of the armistice on Nov. 11th, 1918, were not entitled to participate in same."

"Under a recent Order in Council this ruling has been changed and men who come under the above classification are now entitled to payment of gratuity."

"If any man who comes under the above category will write me enclosing a copy of his discharge certificate I will be pleased to furnish him all particulars regarding this gratuity also the necessary application forms."

George F. Pike, Gen'l. Sec'y.

GENERAL MERCHANDISE

Nothing To Freeze

Pumps freeze up. Watering troughs have to be chopped open. Water storage tanks are liable to burst. But a MILWAUKEE AIR POWER WATER SYSTEM has nothing to freeze. There is no water storage tank and the piping is carefully put beyond the reach of Jack Frost.

You do not realize fully the benefits of a water system on the farm till the blizzards come.

Don't forget that all the water supplied by the MILWAUKEE SYSTEM comes "Direct from the Well"—absolutely fresh. It costs you nothing to learn the price of a water system for your place. Phone us about it now.

FARM UTILITIES Co.,

281 East Morrison St., Portland, Oregon.

See ROY MEYERS, Local Agent, Eagle Creek.

Terms to suit. Treat your wife right. Stop Carrying Water!
"IT'S FRESH FROM THE WELL"

"OREGON"—YOUR UNIVERSITY
