ROYAL CORDS POPULAR

Standing on Broadway in Portland and watching the endless stream of handsome automobiles pass by is good enough entertainment for any visitor to the metropolis.

One thing that strikes such a watcher is the predominance of the United States Royal Cord tires on the finest cars. The watcher will also note the same predominance on the taxicabs that mingle with the throng of passenger cars.

To the automobilist this popularity of Royal Cord on these two type of cars demonstrates that this tire has made its reputation not only as a tire suitable to the purse of the wealthy, but also as adapted to service of the roughest and most exacting nature, for no vehicle gets harder service than a Portland taxicab.

Royal Cords are built so as to be light and flexible, and at the same time to stand hard usage. It costs more to equip a car with these tires than with ordinary tires, but they give so many more miles that, reckoned on the basis of mileage, they are cheaper in the end than ordinary tires.
