Why the Electric Cleaner?

There is really no comparison between the ease and thoroughness with which an Electric Cleaner removes dirt and the difficulty of sweeping.

True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up SOME of the dirt; and if you like the exercise and have plenty of time and strength a broom and a carpet beater will do the work after a fashion.

In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease."

But people use soap because it cleans more easily and better than water alone.

For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.

Lost her Canary Birds

A lady in town, had a pair of canary birds, which she had had for some time and were very tame. She had been accustomed to letting them out, and after flying around, they would always return to their cage. A short time ago, she traded off the hen bird for a new one. Evidently this "female of the species" was more flighty than her predecessor, for on being let out, she flew off with the male and did not return. Where, O where are they? Have they met an untimely death from the sling shot of some boy, or the claws of a marauding cat? Possibly however, they are on an extended honey moon, and will yet return. We have noticed that this is often the case when a widower takes unto himself a young wife.
