able to attend school for several days on account of illness.

Rev. John McLennan who comes from Mt. Vernon, is our new pastor.

### Smooth Running Depends on Correct Lubrication

Motorists seldom realize the damage which can be done to their cars unless the correct consistency of lubricating oil is used. The hidden parts of the car, that require the most careful lubrication, are so seldom exposed to view that the injury done them by an incorrect grade of oil does not become evident until something gives way. Scored cylinders and badly worn piston rings are common troubles.

Correct lubrication has become an exact science. The Standard Oil Company maintains a Board of lubrication. Engineers who have determined by exhaustive study of actual tests the correct consistency of Zerolene for every type of automobile engine. This Board is continually at work determining the best oil for keeping the moving parts of the automobile engine at the highest pitch of efficiency.

For the convenience of motorists, the Standard Oil Company has prepared a Correct Lubrication Chart covering every type of car. These charts show the correct consistency of Zerolene oils and greases as determined by the tests and studies of the Board of Lubrication Engineers. By following the chart, every man can rest assured that his automobile is correctly lubricated which means better performance and longer life for his car.

Mrs. Bartlett is chairman of the local Red Cross committee.

The Red Cross—a work of the heart on a sound business basis. Membership in the Red Cross is insurance against regret. The Red Cross never intrudes—but she has a mother's sensitive hearing. Red Cross is not a responsibility—it's an opportunity. JOIN.
