Prize for New Name

The Oregon Growers Cooperative Association announces a prize of \$100.00 for the best suggestion for a trade name, and \$50.00 for the second best. This name should be of such a nature that it will apply to all and any parts of the state, including the eastern as well as the western part. Such names as Skookum, Phez, Sunkist, Sunsweet, etc., are typical wellknown fruit trade names. The contest is open to all, and will be closed April 1st.

World's Largest City.

According to statistics, New York is bigger in population than London by a quarter of a million, the figures for 1919 being 8,045,000 in New York against London's 7,787,326.

For many years before the war the area and population of New York was steadily increasing and the margin between the size of the two communities growing less and less until, in 1917, New York gained the lead.

The land area of Greater London is 693 square miles, while Greater New York covers 630 square miles, of which, however 95 square miles is uninhabited marsh land. Like London, the population of the business capital of the new world is densest at the center, where there are 100,000 people to the square mile compared with London's 80,000.
